### THE SLEEP-FRIENDLY LIGHT THAT LOOKS AS GOOD AS IT FEELS

We designed Soraa HEALTHY™ lamps with our unique Soraa ZEROBLUE™ technology, which means your body recognizes the time for sleep as nature intended. Evenings are more restful, your body relaxes, and sleep comes more easily.

### SORAA ZEROBLUE TECHNOLOGY

Soraa HEALTHY lamps have no blue content in the spectrum (as opposed to just dimming the light and producing a warmer tone) so there is no overexposure to blue light in the evening which can negatively impact our sleep cycles and longer-term health.

Soraa's patented ZEROBLUE technology advances LED science by creating an emitter of high-quality white light without blue radiation. Based on Soraa's world leading violet LEDs, Soraa combines an engineered mix of green and red phosphors to produce a spectrum with a wide gap in the blue range.

Soraa HEALTHY lamps not only provide circadian-health benefits of no blue content to support better sleep and healthy environments, but they also retain a beautiful, white light quality, making these lamps functional for any space.

### FLICKER

Soraa lamps demonstrate low levels of flicker in both dimmed and undimmed states.

### THERMALLY COMPATIBLE

Suitable for use in fully enclosed fixtures, subject to the maximum heatsink temperature limits stated in this data sheet. A list of qualified enclosed fixtures can be found at [www.soraa.com/resources](http://www.soraa.com/resources). Soraa lamps are designed to safely turn down in any thermal environment not conducive to minimum airflow or proper ventilation.

### ELECTRICALLY COMPATIBLE

Works with trailing edge and leading edge phase cut dimmers. A list of compatible dimmers and transformers can be found at [www.soraa.com/resources/compatibility](http://www.soraa.com/resources/compatibility).
