

COMPLEXITY APPROACH

Baseline Data

Single-word assessment of single phonemes
Single-word assessment of clusters

Imitation Phase

Practice targets in imitation for:
7 sessions or 75% accuracy for 2 sessions

1	2	3	4	5	6	7

Check Generalization

Administer single-word assessment of single phonemes and clusters

Spontaneous Phase

Practice targets in natural speech for:
12 sessions or 90% accuracy for 3 sessions

1	2	3	4	5	6
7	8	9	10	11	12

Check Generalization

Administer single-word assessment of single phonemes and clusters.
Check immediately after treatment completes, 2 weeks, and 2 months.
