

INTEGRATED PHONOLOGICAL AWARENESS TRAINING (IPA)

Choose 10 words

Targets should contain error pattern or target sound

Session focus:

Letter-sound knowledge, phoneme identity, phoneme segmentation and blending, and phoneme manipulation with letter tiles.

- **Letter Sound Knowledge:** Produce sound for associated letter
- **Phoneme identity:** The child will identify a picture/object containing target sounds (Find all of the toys that start with the /b/ sound)
- **Phoneme segmentation:** Identify individual sounds in a word
- **Phoneme blending:** Provide the child with the segmented phonemes and ask them to tell you the word ("c-a-t, what is that word?")
- **Phoneme manipulation with letter tiles:** Provide the child with a word and ask them to change it by one phoneme (This says cat, can you make it say cot?). Start with the manipulation of initial sounds and then move to other word positions.
