

# Vista Multipost Therapy Collar

Adjustable collar with active influence compression

**The Vista® Multipost Therapy Collar is designed to reduce the symptoms of Forward Head Carriage.** This disorder is a growing problem on the ever increasing use of cell phones and computers. The unnatural head position can shift the cervical spine out of alignment, leading to radiculopathy, neuropathy and cervicogenic pain. Patented sizing system offers six height adjustment settings.

**This brace is part of the Aspen MP brand!**

With **25 years** of research driven design, Aspen is committed to providing patients with effective solutions to their unique spinal conditions.

## Treating Forward Head Carriage

The collar applies gentle pressure to the chin in the front and to the mid cervical region in the back to counteract the unnatural forces caused by Forward Head Carriage.

## Targeted Therapy

The Therapy Pack delivers hot/cold therapy to reduce inflammation and spasm. Moving its location inside the back panel focuses the targeted compression where desired.

## Integrated Air Pump for compression

Easily accessible, the air pump and pressure release valve allow patients to quickly achieve the level of compression that works best for them.

Activating the NEW matix™ System bladder can aid in healing and help reduce symptoms by taking stress off the vertebra, discs and nerves.
