

Vista CTO4

Motion control in all 3 planes of motion

The Vista® CTO4 is designed to provide increased motion restriction in all three planes of motion: flexion/extension, lateral bending, and axial rotation. Even while providing this level of motion restriction, the Vista CTO4 is comfortable for patients, and is padded at all contact points to help ensure compliance. It can easily be stepped down to the Vista CTO and MultiPost Collar to support the progression of care.

This brace is part of the Aspen MP brand!

With 25 years of research driven design, Aspen is committed to providing patients with effective solutions to their unique spinal conditions.

Locking Sternal Adjustment

Angle of support strut to fit a patient's anatomy.

Flexible Thoracic Adjustment
One size fits essentially all patient anatomies and unlocks to adjust during original fit and repositioning.
