

Vista™ 464 TLSO

Highly adjustable & effective motion restriction

The Vista® 464 TLSO offers patients support within the thoracolumbar spine, providing a versatile system that accommodates appropriate motion restriction throughout the healing process.

The three shoulder strap configurations and height adjustment technology accommodate all body styles for an effective and comfortable fit. With many opportunities for customization, the one-size adjustable Vista 464 TLSO can be stepped down to the other Vista Lower Spine configurations and comfortably fits waist sizes ranging from 66 to 152 cm.

This brace is part of the Aspen MP brand!

With **25 years** of research driven design, committed to providing patients with effective solutions to their unique spinal conditions.

Advanced Inelastic Compression

Aspen's Super SlickTrack™ System features an independent upper and lower tightening mechanism that provides direct compression where needed, regardless of patient's strength.

Sure Slot™ System

Unique sizing mechanism allows for quick and easy adjustment, without the use of tools.

Customization Options

Removable panels include designated trim lines enabling experts to customize the brace to accommodate individualized patient anatomical and medical needs.
