

Sierra™ 464 TLSO

Aspen
MEDICAL PRODUCTS

Highly adjustable & effective motion restriction

The Aspen Sierra™ TLSO 464 is an adjustable brace that features **clinically effective motion restriction** for pre-, post- and non-operative patients.

This brace can be applied in the over the shoulder or underarm configuration to optimize rotational control.

All structural components are accessible and can be removed, molded, bent or trimmed, providing individualized customization options to meet various anatomical and medical needs.

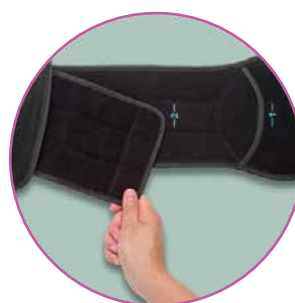

This brace is part of the Aspen MP brand!

With **25 years** of research driven design, committed to providing patients with effective solutions to their unique spinal conditions.

Enhanced Rotational Control

The Aspen Sierra TLSO 464 can be easily applied in the over the shoulder or underarm configuration to optimize rotational control.

One Size Adjustable

Fully adjustable, Aspen Sierra braces offer the broadest range of sizes per SKU on the market. Each brace can be custom assembled and tailored to accommodate a wide range of patients.

Lateral Panel Angulation

Lateral panels can be easily angled to provide the best possible fit for a variety of patient anatomies.
