

# Vulkan™ Elbow Supports

## Vulkan Classic Neoprene Braces

Our elbows have a tough job. They have to be mobile and flexible enough to give us the range of motion we need, but also provide strength and power.

The elbow is often subjected to repetitive movements, making it extremely vulnerable for injuries. As a result, repetitive strain injuries are very common, causing damage to the ligaments or tendons through overuse.

### AEROTHERM® TECHNOLOGY

Designed to provide the therapeutic benefits of heat retention provided by neoprene, while promoting air flow.

- 1. Protective Top Layer**  
Tough nylon fabric is Mauser stitched along key stress points
- 2. Neoprene Core**  
Closed cell neoprene core insulates and retains body heat
- 3. Aerotherm® Lining**  
Allows air circulation, drawing perspiration away from skin

### Elbow Support 3016 & 3017

Ideal for use in sports or occupations where repetitive strain injury may be an issue such as golf, racquet sports or manual occupations. Available as a standard support (3016) or with an adjustable tension strap (3017) to provide targeted compression.

Reference 3016 Without strap	Reference 3017 With strap	Circumference
003890-S	006827-S	22 - 25 cm
003890-M	006827-M	25 - 29 cm
003890-L	006827-L	28 - 31 cm
003890-XL	006827-XL	31 - 34 cm

**Size:** measure elbow circumference.

### Tennis Elbow Strap 3074

Adjustable strap applies direct pressure to the forearm muscles and tendons around the elbow. Ideal for use with forearm strains, repetitive strain injuries, tennis and golfers elbow.

Reference	Circumference
009750	Universal size
