

# KINETEC 6080™

The original KINETEC® design  
dedicated to the elbow joint

- Synchronised and anatomical movements
- Extension / flexion combined with pronation/supination
- Easy to use in bed or in a sitting position
- Patient friendly remote control & adjustments

Full flexion: 135°

Full extension: -10°

One-button  
remote control

## A design built for immediate post-operative treatment

Post-operative treatment using this device provides an effective deterrent to stiffness and loss of range of motion. Its 135° ROM enables countless applications, and variable speed control allows progressive changes in the therapy.

## Synchronised movements for a more anatomically correct therapy

This unit can provide extension/flexion with synchronised pronation-supination. As extension-flexion movement begins, the hand starts its rotation from full pronation to full supination.

## Safety first

Lockable ROM settings prevent misuse and enhance patient safety. The KINETEC 6080™ rolls on locking wheels and is usable in bed or a chair

## Technical specifications

- Start / Stop and reverse always available for the patient.
- Load reverse ensures patient protection when excessive force is exerted on the joint.
- 2-year full warranty.
- Type B Class I electrical device.
- Speed: 35° to 135° per minute.
- Weight : 21 kg.
- Size of the device: Length 72 cm, width 65cm, height 130cm.
- Patient sizing: from 1,40m to 1,90m
