Daily, we gather forces to support health care professionals with expert advice and an outstanding pre- & after sales service.

At MOOVARTES, we commit to continuously improve standards of orthopedic care thereby providing the highest quality solutions with compassion, respect, and dedication to all our clients and their patients.

Leading people the way to a life in which they can move without restrictions or pain, that is our true vision!

Our vision

Create a world in which people can move freely without restrictions or pain.

Our mission

Integrate state of the art solutions and orthopedic innovations in our product portfolio to create the highest quality care pallet to choose from when treating patients.

Our values

Being a trustworthy, allround partner with focus on innovation, efficiency, and quality, offered by a passionate and dedicated team.

YOUR ALL-ROUND PARTNER IN ORTHOPEDICS THANKS TO TWO BUSINESS UNITS

Founded in 1999 as a distribution company 'pur sang', over the years we transformed into a company that offers full range orthopedic solutions with focus on prevention and pre-, intra- and post-surgical care.

To streamline our extensive portfolio of more than 2000 products, we created two business units. The business unit "SUPPORT", including our well-known bracing, rehabilitation and splinting products is now fortified by the new business unit "SURGICAL".

Feel free to contact
our sales representatives
for advice!

NEW: linealastik

The new range of stretch knit fabric supports with targeted compression.

The new Lastik range has been created to meet the needs of patients with a minor or temporary condition or trauma that requires support for the joint as well as the mind, an aspect that is sometimes unfairly neglected. The recovery of joint mobility, the certainty of restoring normal function and the highest level of comfort make wearing a support even easier, which means a faster return to good muscle tone and a good mood. An excellent result designed for people of all ages, from sportspeople to the elderly

BENEFITS

COMFORT

The stretch knit fabric and creation of areas that exert and relieve pressure (silicone inserts) ensure that the support provides just the right amount for compression on the joint. The edges of the supports are designed to provide less compression and avoid the harmful tourniquet effect.

THE “MASSAGE EFFECT”

As the joint moves with the inserts the level of compression exerted by the stretch knit fabric constantly changes to create a beneficial massage effect, enabling a better flow of blood and lymphatic fluids

THE PROPRIOCEPTIVE EFFECT

The supports aid proprioceptive awareness (the ability to perceive and recognise where your body is and the degree of muscle contraction), making it easier to control and refine your movements and in turn reduce pain.

FREEDOM OF MOVEMENT

The graduated elasticity, soft knit fabric and anatomic design ensure maximum freedom of movement.

THE PERFECT FIT

Soft, lightweight and anatomically designed, the supports are ever so easy to slip on and off. They also disappear discreetly under clothing and inside footwear.

epilastik 32 pg. 94

manulastik 19 pg. 53

genulastik 04 pg. 129

malleolastik 37 pg. 139

GRADUATED COMPRESSION: FOUR ACTIONS IN ONE

Compression generates synergic actions:

- It provides support where the joints need it most;
- It produces an intermittent massage which, when combined with muscle movement, stimulates the flow of blood and lymphatic fluids;
- The improved blood flow to the tissues aids the delivery of oxygen and nutrients to tissue cells, which speeds up healing;
- The improved circulation of lymph helps to reabsorb or prevent oedema.

SILICONE INSERTS

The special anatomically shaped silicone inserts reduce the compression produced by the fabric over bony areas to ensure pressure is only exerted where needed. The inserts are in thermowelded pockets to avoid the use of seams which may leave indentations on the skin.

MICRO SILICON TUBE

A small silicone tube is incorporated into the stretch fabric on one of the two edges. This tube has a dual function: to ensure a softer feel against the skin and strengthen the support so it is more resistant to the wear and tear of being pulled on by the patient.

100% ANATOMIC DESIGN

Anatomic design is all about the patient, and ensuring they enjoy effective support and maximum comfort.

The design and materials ensure:

- The optimum secure grip around the joint;
- The joint is kept in the correct position, even when moving; and
- The perfect fit.

STRETCH KNIT FABRIC

The supports are made with a stretch knit fabric that is woven on special 2D looms that create 3D structures with tighter and looser weaves specifically to provide the perfect fit over muscles and bones in every area of the body.

The elastic weft thread is incorporated as the fabric is woven so that four different types of weave with varying degrees of tightness can be produced.

thermoplastics

Moovartes as key figure in hand therapy

For over 20 years, Moovartes has been the allround trustworthy partner for hand therapists, offering them a complete range of splinting materials and accessories from the best brands.

We hand you the tools, as well as the know-how!

Not only do we offer the best materials for your practice, we also love sharing the knowledge and expertise that goes with it. Moovartes frequently organises incompany workshops on how to use our products as well as possible. Contact us for all the details!

About the Rolyan brand

Therapists turn to Rolyan to provide innovative therapeutic splinting materials and the creative canvas for optimal patient outcomes. By offering the most extensive spectrum of splinting products globally, we inspire therapists to mold and shape their patients' recoveries.

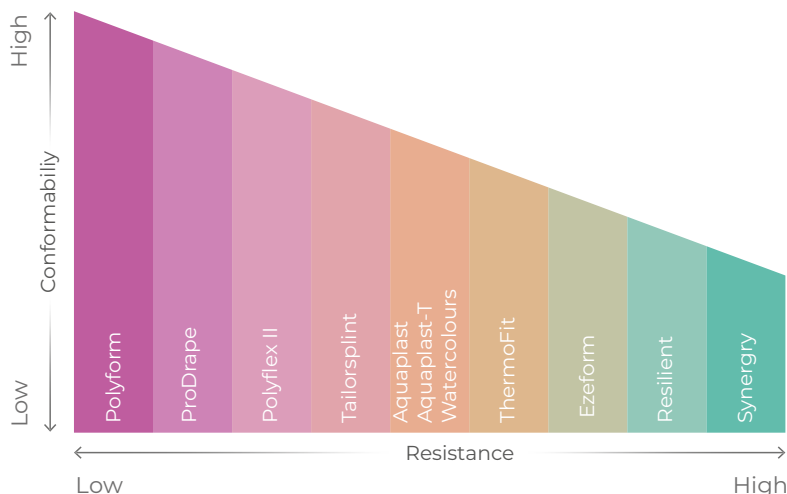

Therapists can select a material that suits their splinting needs from a broad, comprehensive range of high-quality thermoplastic splinting materials and accessories.

Because the people who need healing are just as unique as the healers, Rolyan makes it easy to find the right material for the right splint.

We know it is not just a piece of plastic. It is a critical tool that will get your patients back to doing what they love.

Overview in splinting materials

We recognize that therapists in various fields have different splint-making requirements, and the availability of a broad range of materials across a spectrum of handling and physical characteristics is essential.

The development of the Rolyan spectrum not only illustrates the relationship between splinting material families, but it also serves as a tool for clinicians to identify materials that will support their needs.

Handling Characteristics

Resistance to stretch: how easily material stretches when heated

- Higher resistances means the clinician must work more forcefully and steadily to stretch the material. Comparatively, lower resistance means the clinician can use less force to shape the material.
- Materials with higher resistance typically have greater tensile strength.

Conformability: ease at which heated splinting material conforms to surface contours while a force is applied

- Specifically, drape is conformability where the force applied is gravity alone.
- Materials with high conformability work best with gentle handling because they conform easily. By contrast, materials with low conformity require firmer handling.

Rigidity: strength of splint once formed and cooled

- High rigidity means the splint will be less likely than lowrigidity material to deform or fracture after the clinician exerts force on it.
- Based on the mechanical property, Young's Modulus (kpsi), Rolyan materials now have been evaluated for strength. The higher the kpsi value, the stronger the material.

Memory: the ability of the material to return to its original shape and size after being reheated

- When the material is put back into the hot water bath, it "remembers" and returns to its original shape.
- Clinicians can correct mistakes made while molding and perform frequent remolding when necessary.
- Useful trait for first-time or less experienced therapists

Physical characteristics

Sheet thickness

- Rolyan materials are available in three thicknesses: 3.2 mm, 1.6 mm and 2.4 mm.
- Thinner materials are better for smaller orthoses, such as those for fingers and thumbs.
- Larger orthoses may require thicker material.
- Thinner materials soften and harden quicker than thicker materials, meaning their working time is typically shorter.

Perforations

- Perforations are holes in the splinting material designed to make the splint lighter and to offer some degree of ventilation of the skin.
- Perforations are identified as a percentage (1 percent, 19 percent, etc.), which indicates the amount of material removed due to the perforation. The higher the percentage, the more material has been removed.
- Perforations can affect the drape and handling of the material.

Bonding

- Coated: Splinting material can be treated with a non-stick coating to prevent accidental bonding to itself when heated.
- A coated material will not feel tacky when warm. A temporary bond can be formed by pinching together the heated material.
- A permanent bond can be formed by scrubbing off the coating or removing it with a bond solvent.
- Uncoated: Splinting material that is not treated with a non-stick coating will stick to itself when heated without additional preparation. The heated material will feel tacky and produce an instant bond.

thermoplastics

Polyform™

Maximum stretch. Coated.

Characteristics

- **The splinting material with the most stretch and maximum rigidity when cool.**
- Drapes naturally, leaving the clinician's hands free to mold the intricate contours of the splint gently.
- Provides a precise fit for increased comfort and fewer pressure areas.
- **Minimum memory** allows ability to be reheated and reshaped but will not return to original shape.
- **With coating:** Create a temporary bond by pinching together when heated.

Clinical recommendations

- Acute trauma
- Pain and joint disease
- Patients that cannot endure rigid splints
- Dynamic outrigger bases
- **1,6 mm: for light weight splints**
Ideal for conditions that require light material
pe. elderly, children, oncology,...

Heating

- 1,6 mm: 65°C to 70°C for 30 seconds
- 3,2 mm: 65°C to 70°C for 1 minute

Handling time

- 1,6 mm: 1 minute
- 3,2 mm: 3 to 5 minutes

Bonding capacity

- Temporary bonding: pinch warm surfaces together
- Permanent bonding: take off the coating with spiritus or by scraping with a sharp instrument

Minimum resistance,
maximum strength.

Aquaplast™ ProDrape™-T

Maximum stretch. Coated.

Characteristics

- **Stretches and conforms easily** to surface contours and detail with excellent draping.
- Retains shape without reinforcement.
- **100% memory** allows for repeated reheating and reshaping for splint revisions.
- White colour **turns transparent** when heated, making pressure points and markings visible.
- **With coating:** Create a temporary bond by pinching together when heated.

Heating

- 1,6 mm: 65°C to 70°C for 30 seconds
- 2,4 mm: 70°C to 75°C for 1 minute
- 3,2 mm: 70°C to 75°C for 1 minute

Handling time

- 1,6 mm: 1 minute
- 2,4 mm: 2 to 3 minutes
- 3,2 mm: 4 to 5 minutes

Slight resistance,
100% memory.

Clinical recommendations

- Acute trauma
- Pain and joint disease
- Thumb, finger, wrist and hand splints
- Dynamic outrigger bases
- Light pediatric splints

Bonding capacity

- Temporary bonding: pinch warm surfaces together
- Permanent bonding: take off the coating with spiritus or by scraping with a sharp instrument

thermoplastics

Polyflex II™

Maximum stretch. Coated.

Characteristics

- Balance of stretch and good conformability.
- **Still has excellent strength, rigidity and flexibility when cooled.**
- Easy to apply and remove.
- **Minumum memory** allows ability to be reheated and reshaped but will not return to original shape.
- **With coating:** Create a temporary bond by pinching together when heated.

Heating

- 1,6 mm: 70°C to 75°C for 35 seconds
- 2,4 mm: 70°C to 75°C for 1 minute
- 3,2 mm: 70°C to 75°C for 1 minute

Handling time

- 1,6 mm: 1 to 2 minutes
- 2,4mm: 2 to 3 minutes
- 3,2 mm: 4 to 6 minutes

pinch warm surfaces together
- Permanent bonding:
take off the coating with spiritus or by scraping with a sharp instrument

Outstanding drape,
rigid when cool.

TailorSplint™

Moderate stretch. Coated.

Characteristics

- **The most versatile material**, perfect balance between stretch and conformability.
- Easy to handle: appropriate for beginners.
- Retains shape without reinforcement.
- **Minumum memory** allows ability to be reheated and reshaped but will not return to original shape.
- **With coating**: Create a temporary bond by pinching together when heated.

Heating

- 1,6 mm: 70°C to 75°C for 35 seconds
- 2,4 mm: 70°C to 75°C for 1 minute
- 3,2 mm: 70°C to 75°C for 1 minute

Handling time

- 1,6 mm: 1 to 2 minutes
- 2,4 mm: 2 to 3 minutes
- 3,2 mm: 4 to 6 minutes

Clinical recommendations

- Acute trauma
- Pain and joint disease
- Dynamic outrigger bases
- Neurological pathologies
- Wide range of medium and large splints

Bonding capacity

- Temporary bonding: pinch warm surfaces together
- Permanent bonding: take off the coating with spiritus or by scraping with a sharp instrument

The most versatile
splinting material

thermoplastics

Aquaplast™ Original

Moderate stretch. Uncoated.

Characteristics

- **Versatile** material: Has a moderate stretch, flexibility and conformability.
- Retains shape without reinforcement.
- **Tan colour turns transparent** when heated, making pressure points and markings visible.
- **100% memory** allows for repeated reheating and reshaping for splint revisions.
- **Without coating:** Bonds permanently by pinching together heated surfaces.

Heating

- 1,6 mm: 70°C to 75°C for 35 seconds
- 2,4 mm: 70°C to 75°C for 1 minute
- 3,2 mm: 70°C to 75°C for 1 minute

Handling time

- 1,6 mm: 1 to 2 minutes
- 2,4 mm: 2 to 3 minutes
- 3,2 mm: 4 to 6 minutes

Special features

- Gets sticky when heated, making it easier for the therapist to mold and shape the splint.
- **Has the same characteristics as the Aquaplast-T™ but without coating and therefore immediate and permanent stickyness.**
- Perforated materials allow for ventilation and less weight of the finished splint.
- No unwanted fingerprints.

Clinical recommendations

- Ideal for dynamic splints and attaching outriggers.
- Appropriate for various pathologies of the upper and lower extremities.

Bonding capacity

- Uncoated: Bonds permanently by pinching together heated surfaces.

100% memory,
without coating.

- 13% UltraPerf®: ideal for light finger or hand splints made of breathable material
- 19% OptiPerf™: excellent ventilation while maintaining material strength
- Easy to cut edges
- **Has the same characteristics as the Aquaplast™ Original but with coating.**

Clinical recommendations

- Serial splints
- Hand, wrist, finger and thumb splints
- Dynamic outrigger bases

Bonding capacity

- Temporary bonding:
pinch warm surfaces together
- Permanent bonding:
take off the coating with spiritus or by scraping with a sharp instrument

100% memory,
with coating.

thermoplastics

Aquaplast-T™ Watercolors™

Moderate stretch. Coated.

Characteristics

- **Versatile** material: Has a moderate stretch, flexibility and conformability.
- Retains shape without reinforcement.
- Colours **turn transparent** when heated, making pressure points and markings visible.
- **100% memory** allows for repeated reheating and reshaping for splint revisions.
- **With coating:** Create a temporary bond by pinching together when heated.

Special features

- **Fun colours for children and adults**
- Combination of strong conformability and elasticity
- **13% UltraPerf™**: ideal for light finger or hand splints made of breathable material
- **19% OptiPerf™**: excellent ventilation while maintaining material strength
- Easy to cut edges

Heating

- 1,6 mm: 70°C to 75°C for 35 seconds
- 2,4 mm: 70°C to 75°C for 1 minute
- 3,2 mm: 70°C to 75°C for 1 minute

Handling time

- 1,6 mm: 1 to 2 minutes
- 2,4 mm: 2 to 3 minutes
- 3,2 mm: 4 to 6 minutes

Clinical recommendations

- Finger and hand splints made out of breathable material
- Hand and upper limb splinting
- Occupational splints where conventional white materials can show stains

Bonding capacity

- Temporary bonding: pinch warm surfaces together
- Permanent bonding: take off the coating with spiritus or by scraping with a sharp instrument

thermoplastics

Ezeform™

Minimum stretch. Uncoated.

Characteristics

- High resistance in stretch and moderate conformability.
- **Stays in place while shaping**, giving the clinician more control. Still easy to mold when some force is applied.
- **Uncoated** sticky surface acts like an extra pair of hands during splint fabrication. Create a permanent bond by pinching together heated surfaces.

Heating

- 1,6 mm: 70°C to 75°C for 35 seconds
- 2,4 mm: 70°C to 75°C for 30-45 seconds
- 3,2 mm: 70°C to 75°C for 1 minute

Handling time

- 1,6 mm: 1 to 2 minutes
- 2,4 mm: 2 to 3 minutes
- 3,2 mm: 4 to 6 minutes

Clinical recommendations

- Upper and lower limb splinting
- Splints that require a firm approach
- Functional support and positioning splints

Bonding capacity

- Uncoated: Bonds permanently by pinching together heated surfaces.

High resistance to stretch,
with a moderate conformability.

Aquaplast-T™ Resilient™

Minimum stretch. Coated or uncoated.

Characteristics

- **Does not stretch or deform**, giving the clinician even more control.
- **100% memory** allows for repeated reheating and reshaping for splint revisions.
- White sheets **turn transparent** when heated, making pressure points and markings visible.
- Material with high rigidity for large splints, **available with and without coating**.

Heating

- 1,6 mm: 65°C to 70°C for 35 seconds
- 3,2 mm: 70°C to 75°C for 1 minute

Handling time

- 1,6 mm: 1 to 2 minutes
- 3,2 mm: 4 to 6 minutes

Clinical recommendations

- Splints that require frequent revisions
- Medium and large splints for upper and lower limbs, including fracture bracing

Bonding capacity

- Resilient™: Uncoated for permanent bonding
- Resilient-T™ : Coated for temporary bonding by pinching together heated material; however, it will come apart when cooled.

For medium and large splints, requiring frequent revisions.

thermoplastics

Synergy™

Minimum stretch. Uncoated.

Characteristics

- Minimum stretch, conformability and drape.
- Will not stretch out of shape until placed and molded, **allowing firm handling** of the material.
- The cooled splint is rigid and strong.
- **Minumum memory** allows ability to be reheated and reshaped but will not return to original shape.
- **Without coating:** Bonds permanently by pinching together heated surfaces.

Heating

3,2 mm: 70°C to 75°C for 1 minuut

Handling time

3,2 mm: 4 to 6 minutes

Clinical recommendations

- Indications that require a strong splint
- Functional support and positioning splints
- Splints for upper and lower limbs, spinal braces

Bonding capacity

- Synergy has no protective coating and will bond to itself instantly without surface preparation.
- Bonds permanently by pinching together heated surfaces.

High resistance to stretch
for ultimate control.

ThermoFit™ Sticky

Permanent bonding. Uncoated.

Characteristics

- Moderate stretch with moderate flexibility and good conformability.
- **100% memory** allows for repeated reheating and reshaping for splint revisions.
- Reduces waste for less experienced therapists.
- All sheets **turn transparent** when heated, making pressure points and markings visible.
- **Without coating:** bond permanently by pinching together heated and dry surfaces.

L	From 10,9 cm

2. Immo+ thumb immobilizer

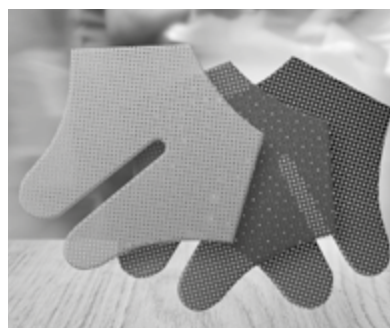

Indications

- Immobilization of the thumb
- After soft tissue injury

Features & benefits

- The material can be cut when hot or cold using scissors or a box cutter knife.
- By pressing firmly together the hot surfaces of the material, a permanent bond may be made.
- Rough edges may be polished or leveled by hand
- Material: 1,6 mm thickness - micro perforation
- Colour: Black

1. Gauntlet Thumb Spica

Splint is designed to immobilize the thumb MCP joint, and to treat **arthritis** or **tenosynovitis**. The Pre-Cut Plus versions have a perforation pattern for **increased air circulation** under the splint. The solid edges are useful for edge-finishing. Latex free.

Size: measure across the dorsal surface of the MCP joints including the soft tissue.

2. Rolyan Thumb Support Splint

The Rolyan Thumb Support Splint is constructed of a **flexible, supportive thermoplastic** that can be molded to any thumb for any need.

Designed to provide support and stabilization to the CMC and MP joints of the thumb, while **allowing the range of motion** in the wrist and other fingers to be unhindered by the splint.

Perfect for **CMC arthritis** and **ligamentous injuries**, this splint can help alleviate joint pain, promote healing, and aid individuals suffering from these conditions.

Latex free.

Size: universal, can be cut to size.

Reference	Material	Colour	Quantity

4. Dorsal Blocking Splint

Dorsal Blocking Splint designed to immobilize wrist, MCP's and IP joints, following flexor tendon repair. It is often called the "back slab" splint. Palmar bar protects the metacarpals and prevents distal splint migration. Latex free.

Size: measure the width of the second to fifth MCP.

Reference	Size	Dimensions	Quantity

NEOPRENE SPLINTING

Neoprene splinting can be a good addition to thermoplastic splinting. Suited for various indications such as:

- Osteoarthritis & rheumatic disorders
- Congenital hand injuries
- Nerve damage
- Stiff joints
- Swelling

1. Regular neoprene sheets

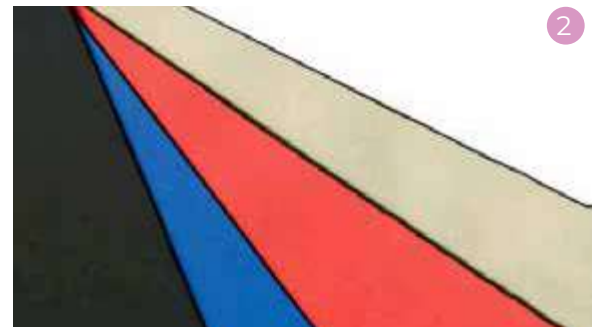

Reference	Colour	Thickness	Dimensions
091165992	Green	1 mm	46 x 61 cm

3. Black neoprene roll

This black neoprene material has a loop side and nylon lining. **Its moderate elasticity** allows for controlled movements. Ideal for **gentle immobilisation**, wrapping the wrist and other applications.

Reference	Dimensions
M300000022	3 mm x 5 cm x 200 cm

neoprene

4. Tan neoprene roll

Indications

- Can be used either as strapping or for soft splints.
- Warmth may be beneficial with hypertonicity.

Features & benefits

- Degree of elasticity enables controlled movements.
- Consists of **nylon lining** on one side and **pile material** on the other over a **rubber core**.
- Easy hook attachment.
- Lightweight and thin, enhancing joint function and providing warmth that is ideal for arthritic joints.
- Latex free and with loop material.

Reference	Dimensions
A8105	3 mm x 5 cm x 3,2 m

4

5. Neoprene sealing iron

Ideal for **fusing sheets together** while fabricating your own splint from neoprene sheets and seam tape.

- The iron is lightweight and easy to use.
- Ideal for fixing iron-on tapes and fasteners to customised soft splints made from neoprene.
- For safe storage, the iron is supplied with a metal stand and cotton sock that reduces heat.

Reference	Specifications
091184043	UK-plug + EU-adapter

5

6. Iron-on hook strap

Attach to neoprene, breathoprene (opposite) or other fabrics with an iron on medium setting.

Reference	Dimensions
HK-HO-AIO-25-0002	25 mm x 25 m

6

7. Neoprene glue

Can be used to glue two sheets of neoprene together. Must be applied to both surfaces and allowed some time to dry before the two surfaces are pushed together.

1. VELCRO® BRAND HOOK & LOOP STRAPS

This high quality VELCRO brand hook and loop offers superior, adjustable closure over a long life cycle. Ideal for everyday, long term use on medical applications such as splints, casts and equipment.

The quick setting rubber based adhesive backing can be used on a variety of surfaces including steel, plaster and textiles.

The tape can be washed or dry cleaned. **Latex free.**

For a full strapping closure:

Combine self-adhesive hook with sew-on loop strapping. These are separate item codes.

strapping

4. Velcro® One-Wrap™ Continuous Tape

Reusable hook and loop tape featuring the patented Ultra Mate low profile hooks, which give consistent strength and infinite adjustability. This fabric fastener will not separate or delaminate, no adhesive is used and the hook and loop elements are integrally fused. The soft fabric loop is comfortable if worn close to the skin. The continuous tape creates no costly wastage - you just cut the tape to create the strap size you require.

heating

ROLYAN HEAT PANS

Rolyan Digital Heat Pans are made from durable stainless steel with hinged lid and perforated tray.

Concealed heating element with over-heat protection and also features **recessed handles to facilitate moving** from one location to another.

- Hinged lid models ensure that spillage does not occur outside of the pan. Open the lid slowly to avoid water splashing.
- Compliant to the European Electromagnetic Compatibility Directive (EMCD).
- Two year warranty as standard.

Should NEVER be switched on without water.

1. 5L Compact heat pan

Compact and easy to transport, ideal for small splints.

- **Internal dimensions:**
Height 65 mm, Depth 300 mm, Width 325 mm
- **External dimensions:**
Height 135 mm, Depth 332 mm, Width 361 mm
- **Weight:** 4 kg
- **Capacity:** 5 liter
- **Characteristics:** single hinged lid, syphon drainage.

Reference	Product
091441773	See image 1

1

2. 9L Shallow heat pan

Compact, but extra wide design for bigger splints.

- **Internal dimensions:**
Height 65 mm, Length 500 mm, Width 300 mm
- **External dimensions:**
Height 135 mm, Length 535 mm, Width 332 mm
- **Weight:** 5 kg
- **Capacity:** 9 liter
- **Characteristics:** single hinged lid, syphon drainage.

1. Stainless Steel Universal Scissors

High quality, German made universal scissors. Ideal for **cutting warm plastics**. Long steel blades for **smooth long cuts**. Long loop handles for powerful comfortable cutting.

Reference	Dimensions
M40112520	Length 20 cm - Blade length 9,5 cm

2. Stainless Steel Straight Shears

High quality shears suitable for cutting tough materials. **Short sturdy blades, with long handles for leverage**. Robust and easy to clean. Ergonomic steel handles. German made, life time guarantee.

Reference	Dimensions
M400000013	Length 21 cm - Blade length 7,5 cm

3. Curved Mayo Scissors

Curved Mayo scissors with small curved knives for **trimming braces and splints as hardening begins**. Create cuts to the left or right. Made of stainless steel.

Reference	Dimensions
CAT-617110	Length 17 cm

4. Curved Shears

High quality shears suitable for cutting warm splinting material. **Short sturdy, curved blades**.

Reference	Dimensions
M400000012	Length 20 cm - Blade length 7 cm

5. Super Shears

Excellent for trimming splints evenly as hardening begins. Double plated chrome over nickel.

Reference	Dimensions
A3715	Length 20 cm

6. Short-Bladed Shears

Pointed, sturdy, short blades for detailed cutting across most materials. Ice-tempered stainless-steel blades. Large handles with rubber inlays, provide a secure grip.

Reference	Dimensions
M40773718	Length 20 cm - Blade length 8,5 cm

7. Heavy Duty Shears

Ideal for cutting cold plastics up to 3,2 mm thick. Self-opening, with short, sturdy blades hot forged for endurance.

Reference	Dimensions
S-602040	Length 24 cm - Blade length 4,5 cm

cutting

1. Fiskars™ Scissors

High-quality, ultra-light stainless-steel scissors ideal for cutting **heated, low-temperature thermoplastic material**. Leaves a **smooth edge** after cutting.

Reference	Dimensions	Model
727301	20 cm	Right handed
727302	20 cm	Left handed

2. Fiskars™ Non-Stick Scissors

Scissors cut through hook and loop, glue, tape and other adhesives without damaging the blades. Sticky material can be wiped off easily with damp cloth. The offset handles of large scissors increases cutting efficiency on flat surfaces. **The small version is ideal for arts, crafts, and cutting in small places.**

Reference	Image	Dimensions
553232	B	20 cm

3. Bandage Shears

With blunted lower blade to protect the patient.

Angled to allow easier cutting under bandages. Plastic grips with stainless steel blades.

Reference	Dimensions
M400000007	Length 19 cm - Blade length 4,5 cm

4. Curved Bandage Shears

Designed for patient safety with upward curve to take blades away from the patient.

Rounded tips to prevent digging in to a patients skin. Plastic grips with rubber inserts.

Reference	Dimensions
M40772313	Length 13 cm - Blade length 5,0 cm

1. Deluxe Revolving Hole Punch

With a **side spring that automatically adjusts tubes in position for punching**, the Deluxe Revolving Hole Punch is always positioned and ready for punching. For reliable service, the hole punch is made with steel.

Reference	Dimensions
A4452	Length: 22 cm - Throat depth: 3,8 cm

2. ThermoFit Rolls

Thermoplastic material with foam coating, designed to be applied as a first aid for immobilization of the injuries to fingers and wrist.

Tape-based orthoses provide quick means for precise and tight-fitting modeling. Can be applied on the intact skin, or post-operatively.

The **ease of application** also facilitates post-traumatic/operation rehabilitation whereby the ease of re-application of the orthosis may support a progressive range of motion.

Micro-perforation - 0,8 mm thickness - peach color

Reference	Dimensions	Quantity
081075120	7,5 cm x 120 cm x 0,8 mm	Per roll
081010150	10 cm x 150 cm x 0,8 mm	Per roll
081030300	3 cm x 300 cm x 0,8 mm	Per roll
081050300	5 cm x 300 cm x 0,8 mm	Per roll

3. ThermoFit Strips

ThermoFit strips are perfectly suited for molding small splints (e.g., fingers, nose, etc.).

ThermoFit strips are thin, light and stable. They are micro-perforated for **improved air circulation**. They can be easily cut to size with scissors without preheating.

Double-sided foam coating on ThermoFit products is hypo-allergenic and prevents adhesion to body hair and bandages, it protects a patient's skin from macerations.

Micro-perforation - 0,8 mm and 1,6 mm thickness

015602-400	XL			

2. Individual Units for Flexion and Extension

Typically ideal for one or two digits, the pre-bent outriggers can be placed on the fingers or over the metacarpals. For perfect positioning of MCP, PIP, or DIP joint in flexion or extension, each outrigger can hold one rod adjuster.

Kit includes each item

- Pre-bent outriggers (5)
- Rods (5)
- Rod adjusters (5)
- Tip protectors (5)
- 10 cm tension-adjustable finger loops (5)
- D-string straps (5)
- Allen key (1)

The rest of the splinting material, straps, and rubber bands are **not included** within the kit.

Reference	Product
A6012	Kit: 5 pieces of each part
553235	5 Pe-bent outriggers

3. Adjustable Outrigger Kit

For replacing the Rolyan Adjustable Outrigger.

Kit includes each item

- Rod adjusters (5)
- Extender rods (5)
- Five tip protectors (5)

Reference	Product
A6013	Kit: 5 pieces of each part

4. Individual Line Guides

To make splinting easier, faster and more precise.

These durable accessories are compatible with Rolyan splinting material and are designed to be used by medical professionals.

Reference	Quantity
A1791	Pack of 10

1. Rolyan Wrap-on Finger Hooks

Alternative to gluing hooks directly onto fingernails.

Great for use with burn patient's and amputees as well as people with sensitive nail beds and general hand trauma.

Made of thin strapping material and lined with slip resistant material to help prevent migration.

Secure to fingertips with a hook strap. Adequately sized for large fingers; easy to trim to fit any size.

Reference	Quantity
A4283	Pack of 10

2. Tension Adjustable Finger Loops

Eliminate the need to tie the monofilament to the finger loops, saving you time.

To achieve the correct traction forces, the monofilament is slid through the connecting pieces. The finger loops are made from Ultrasuede material.

Reference	Dimensions	Quantity
A44410	76 mm	Pack of 10
A44411	102 mm	Pack of 10

3. Colour-coded Rubber Bands

Packs of 85g colour-coded rubber bands. No latex.
± 134 pieces per package.

Reference	Colour	Width
A3482	Yellow	3,2 mm
A3483	Red	6,4 mm
A3484	Green	9,5 mm
A3485	Blue	1,3 mm

4. Levame Type Blade

Extension traction system of the fingers of the hand. Padding of slats in pre-cut 5 mm thick polyurethane foam. Perforation at the end for quick setting of rivets.

Indications

- Extension of finger joints
- Immobilization of lateral movements
- Extension deficit
- Correction

Dimensions: 200 mm x 10 mm

Quantity: per 50 pieces

Reference	Thickness
M800000003	0,3 mm

dynamic splinting

1. Adjustable Outrigger Kit for extension

Designed for low profile dynamic splinting.

Outrigger comes in a complete kit and can be used with all low temperature splinting materials.

- Fully adjustable to accommodate extension of the MCP, PIP or DIP joints. Detachable rod adjusters allow individual positioning of fingers. Extender rods are secured in the rod adjusters to position the 10 cm tension adjustable finger loops for the desired MCP, PIP or DIP extension.
- Convenient hook and D-Ring attachment provide ease of attachment and replacement of rubber bands or graded springs. Multiple finger kit fits most adult hands.
- Complete kit for several fingers, suited for most adult hands.

Splinting materials, straps and springs available separately.

Reference	Quantity
A6011	Kit for several fingers

2. Adjustable Outrigger Kit for MCP Flexion

Provides ample space for four finger rod adjusters, yet does not limit thumb motion.

An optional thumb positioner can be applied to the vertical bar of the outrigger. Extender rods and rod adjusters are simple to apply and adjust.

Kit includes each item of:

- Pre-bent outrigger wires (2)
- Rods (5)
- Rod adjusters (5)
- Tip protectors (5)
- 10 cm tension-adjustable finger loops (5)
- D-string strap (1)
- Complete fabrication instructions

Material for static base, rubber bands, and straps sold separately.

Reference	Quantity
A8321	Kit for several fingers

POLFIT WRIST SPLINTS

Wrist immobilizers with rigid and malleable stays.

Indications

- Wrist sprain
- Wrist tendinitis
- Arthritis and arthrosis
- After wrist fractures or plaster's early removal
- Arthrosis of trapezio-metacarpal joint and metacarpophalangeal of thumb
- Damage to ulna section of thumb joint

Features & benefits

- 3D breathable fabric for structure
- Reinforcing dorsal stays
- Velcro® fastening system
- Aluminum splint, preformed and removable on medical prescription
- Full dorsal opening

1. D-Ring™ Wrist Brace

The classic choice for treating the pain and discomfort of **carpal tunnel syndrome, arthritis, tendonitis** and other wrist disorders.

- A **non-elastic construction** that does not restrict circulation.
- Circumferential design holds the brace in position during application.
- **D-Ring closures** provide **tension control** to adjust the amount of support required.
- A double layer of **cotton stockinette** under closures cushions the straps and the forearm length is proportional to the brace size.
- Removable, adjustable **aluminium support bar**.
- Fabricated from a polyester / cotton fabric laminated to 1 cm foam.

Size: measure circumference of the wrist.

2. D-Ring™ Wrist and Thumb Spica Splint

Protection to allow healing after injury or to decrease pain, relieve inflammation and prevent further deformity of painful wrists and **thumb tendonitis**.

- **Circumferential design** with D-Ring closures makes the splint easy to put on and extremely comfortable.
- **Available in two versions:**
 - Beige cotton/polyester fabric fully lined with cotton stockinette
 - Black workhard design with soft pliable leather for more durability
- **Two metal stays** support the wrist and the thumb.
- Removable **aluminium support bar** to adjust extension.

Size: measure circumference of the wrist.

1. Sof-Stretch™ Extension Splint

Dynamic force assists the PIP joint into extension with minimal extension of the MCP joint.

- The splint is ideal for PIP joint tightness, contractures, and boutonniere deformity.
- The plastic coated wires of the Rolyan Sof-Stretch Extension Splint simplify modification for finger size and fluctuations in edema.
- The angled distal pad applies pressure evenly, providing complete surface contact.
- “P” on proximal pad reminds patient to apply the splint with the P near the palm.

Size: measure from the MCP crease to the distal finger crease on the volar surface.

2. Sof-Stretch™ Short Extension Splint

Provides dynamic force to assist the PIP into extension while allowing full motion of the MCP joint.

- Easily adjusts for finger width as plastic-coated wires accommodate finger size and fluctuations in edema. Ideal for PIP joint tightness and boutonniere deformity.
- Angled distal pad reduces pressure by providing complete surface contact on the middle phalanx, applying pressure evenly.
- The “P” on the proximal pad reminds the patient to apply the splint with the P near the palm.

Size: measure from the MCP crease to the distal finger crease on the volar surface.

finger splints

3. Sof-Stretch™ Coil Extension Splint (Capener)

Coil springs placed laterally to the PIP joint move with the joint to help increase PIP extension.

Helps reduce tightness in the PIP joint and surrounding soft tissue from flexor tendon tightness, flexion contractures and boutonniere deformity.

- Best suited for contractures up to 45° that feel elastic when stretched.
- Contoured proximal and distal pads distribute pressure evenly.
- The splint doesn't move when moving the finger.

Size: measure from the MCP crease to the distal finger crease on the volar surface.

Reference	Size	Length	Quantity

A99777	XL	8,3 cm	(per piece)

4. Sof-Stretch™ Long Coil Extension Splint

The coil springs of the Rolyan Sof-Stretch Long Coil Extension Splint assist PIP and DIP joints into full extension.

The splint is ideal for helping reduce tightness from flexor tendon and volar joint, and soft tissue tightness.

- Best suited for contractures up to 45° that feel elastic when stretched.
- Contoured proximal and distal pads distribute pressure evenly.
- The splint doesn't move when moving the finger.

Size: measure from the distal palmar crease to middle of distal phalanx.

Oval-8® Splints

Strong and nearly invisible splints stabilise and align the DIP or PIP joint to enhance hand function.
Moulded from 1.6 mm translucent plastic without seams.

- Can be used to correct lateral deviation, swan-neck deformity and flexible boutonniere deformity, support mallet finger injury, and help prevent trigger finger.
- Two Oval-8 finger splints can be used to give full immobilisation at the PIP or DIP for rest and control.
- Each Oval-8 splint fits a full size and, when rotated 180°, an additional half size, to accommodate fluctuations in oedema and temperature that can affect finger size.

1. Oval-8® Kit

This cost effective kit includes 44 Oval-8 finger splints (with the majority in the most common sizes of 5-10), carrying case, and instruction booklet.

Reference	Product
927279	Oval-8 Kit

2. Oval-8® Sizing Set

Includes one of each of the 14 sizes on an easy-to-open binder ring. Allows clinicians to use the actual splint to accurately and quickly size each client and then order the correct splint(s) to be issued. Instructions included.

edema care

1. Thermoskin Gloves

Thermoskin Thermal Compression Gloves are anatomically shaped to provide **warmth and even compression** for the temporary relief of **arthritic pain**.

A **textured inner layer** provides additional grip for everyday activities and finger tips cut out, allow a better sense of touch.

Sold in a pair.

Indications

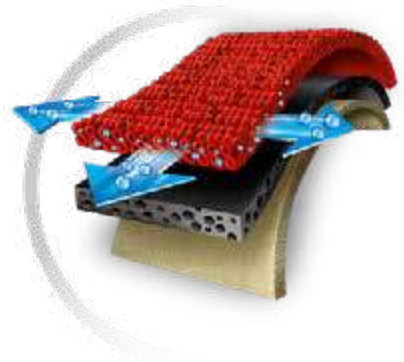

Arthritic Pain Management:

- Pain, stiffness
- Inflammation and damage to joint cartilage and surrounding structures.
- Joint weakness and instability
- Visible deformities.

Trioxon Advantage

Exclusive **3 dimensional lining** that provides insulation and wicking of moisture via air circulation. This allows the skin to remain well oxygenated and comfortable for extended periods.

929337	XX Large	> 30 cm

2. Edema Gloves

Comfortable, economical gloves provide gentle compression to help control edema.

Made from an easy to care for blend of Lycra and spandex.

Size: measure circumference of hand through the thumb web space.

A. full fingers

Reference Left	Reference Right	Dimensions	Quantity
A571221	A571220	XS 17,8 cm	Per piece
A571223	A571222	S 20,3 cm	
A571225	A571224	M 22,9 cm	
A571227	A571226	L 25,4 cm	

B. open fingers

Exposes finger tips for function and to monitor swelling.

Reference Left	Reference Right	Dimensions	Quantity
A571201	A571200	XS 17,8 cm	Per piece
A571203	A571202	S 20,3 cm

A571207	A571206	L 25,4 cm	

positioning splints

1. Post Surgical Arm Support

After a hand or wrist surgery or injury, maintaining **proper elevation** is critical to reduce edema and pain.

This arm support positions the hand upright and features **open areas** on the side for **ventilation** and observation of correct arm position, vascular changes, or drainage. Made of soft foam for greater patient comfort. Foam color may vary. Latex free.

Reference	Dimensions
A1862	38 x 23 x 23 cm

2. Palm Protector

Designed to prevent contractured fingers from digging into the palm. Made of closed-cell foam lined with thick Sherpa fabric. Pre-formed, one-size left or right options with simple hook and loop strapping.

Reference Per piece	Reference Pack of 3	Side	Size
A812101	A8121	Left	Universal
A812201	A8122	Right	Unversal

3. Palm Protector with Finger Separators

Designed to prevent contractured fingers from digging into the palm and **separates the fingers to decrease tone.**

Fabricated from closed-cell foam, lined with a pile fabric.

Soft finger separator strap weaves between fingers and can be cut to adjust fit. Hand washable. **Per piece.**

Reference	Side	Size
A81201	Left	Universal
A81202	Right	Unversal

4. Palm Protector with Vinyl Pocket

This palm protector has the quality of the standard palm protector but with an additional feature. A **vinyl pocket** is situated on the palmar aspect of the splint for the application of and **Ezeform thermoplastic insert** which enables the splint to be **custom moulded** for an individual fit.

Fingers are kept in place by Softstrap strapping material and secured by hook and loop fastening. **Ezeform insert included. Per piece.**

Reference	Side	Size
AA9297L	Left	Universal
AA9297R	Right	Unversal

5. Palm Shield

Foam splint helps increase comfort for people who have **moderate to severe hand tightness** by separating and positioning the fingers and thumb. **Large thumb piece** provides excellent thumb positioning.

One size fits most adults. **Per piece.**

Reference	Side	Size
A812401	Left	Universal
A812402	Right	Universal

exercise putty

Silicon based hand exercise clay

Designed to meet a wide range of **strengthening needs**, the putty can be squeezed, stretched, twisted or pinched.

It is a clean therapy clay that leaves no colour or residue on the client's hands. It will not fragment, separate or stick to the skin.

- ✓ Latex free
- ✓ Non toxic
- ✓ Non oily
- ✓ Bleedproof
- ✓ Non greasy

Also available: Putty containers

Large quantities of putty can be bought and distributed to individuals this way, saving money.

These soft, plastic containers will not dent or break.

They are easy-to-open and flat enough to fit in a pocket.

Reference	Quantity
AO-A32810	Pack of 10 (85 grams)

1. Basic Hand Exerciser

Provides progressive resistive hand strengthening.

Lightweight frame uses clips to block flexion and extension and permits a custom fit for different hand sizes.

Includes 3 pairs of **graded, colour-coded rubber bands**, which can be changed to adjust resistance, and two clips.

Reference	Product
A3488	Full set
A3486	Pack of 4 spare clips

2. Ergonomic Hand Exerciser

The same exerciser as above but **with a padded handle**.

Reference	Product
A3481	Full set
A3486	Pack of 4 spare clips

Replacement latex free rubber bands (packs of 85 g)

Reference	Colour	Resistance
A3482	Yellow	X Light
A3483	Red	Light
A3484	Green	Medium
A3485	Blue	Heavy

3. Digi-Flex™ Exerciser System

Develops isolated finger strength, flexibility and coordination as it builds hand and forearm strength.

Reference	Product
A39710	Full set with 5 hand exercisers

4. Graded Pinch Exerciser

Designed for graded resistive exercise for **increasing pinch strength and co-ordination**.

Features 5 graded springs in colour-coded pinchpins. 3 metal rods of different diameters accommodate the various openings of each pinchpin.

Reference	Product
10-0840	Complete set with 50 pinchpins
10-0846	Set of 5 pinchpins without tub

hand trainers

1. Handmaster™ Plus

Provides complete reciprocal muscle group exercise for the hand through full, natural planes of motion.

Recommended for improving strength, balance, coordination, speed, and general blood flow, stimulates all peripheral nerves to the hand and allows for unattended therapy. Designed for daily outpatient use to complement the treatment of hand, wrist, and forearm conditions.

Great for **stroke rehabilitation**, treatment and prevention of **carpal tunnel syndrome**, **tennis elbow** and **RSI**.

Each package contains one resistant ball, two flexible cords (for varying hand sizes) and complete instructions.

Reference	Colour	Indication	Resistance
929600	Purple	Early rehabilitation	Soft
929601	Red	Late rehabilitation	Medium
929602	Orange	Strength training	Firm

2. Gel Ball Hand Exerciser

Gel balls colour coded to provide variable resistance training for hands, fingers and forearms.

The balls are pleasant to touch and return back to their original shape after each squeeze.

Reference	Colour	Resistance	Quantity
AA9800	Pink	Very soft	Per piece
AA9801	Blue	Soft	Per piece
AA9802	Green	Medium	Per piece

exercise bands

ROLYAN ENERGISING EXERCISE BANDS

The Rolyan energising exercise bands are available in various sizes and levels of resistance. They improve strength, range of movement and co-ordination.

1. Rolyan Energising Exercise Bands

High quality exercise bands at great low prices.

Progressive colour scheme is easy to remember without charts. Great for home or clinic use.

Progressive resistive bands improve strength, range of motion and co-ordination.

Gripable Pro

EMPOWERING HAND AND ARM THERAPY KEY BENEFITS

The Gripable Pro is an intelligent 2-in-1 device dedicated to evaluation, measurement and training, intended for people with **reduced motor skills** in the hand, wrist or arm.

- Ideal for professional use
- Create a dedicated profile for each of your patients
- Dynamometer function; different grip measurements possible (isometry, endurance, right/left comparison, GRIT, etc.)
- Targeted work on each movement (grip/release, extension/flexion, ulnar/radial deviation, pronation/supination of the wrist)
- Motivating, interactive activities adapting to the progress of the patient, including varying levels of difficulty

Why choose Gripable for upper limb rehabilitation?

The Gripable gives you access to a platform of activities, each more enjoyable & motivating than the next.

Each activity focuses on a specific movement to perform such as grip, extension/flexion, ulnar/radial deviation or even pronation/supination which gives you instant data on the activity performed and the number of repetitions of the movement.

Contact us for more info!

KINETEC Maestra™

THE HAND & WRIST CPM WITH THE MOST EXTENSIVE EXERCISES AVAILABLE ON THE MARKET.

The KINETEC MAESTRA™ is a complete solution for wrist, fingers and thumb passive rehabilitation. It is the most extensive CPM device on the market and fulfils most of the requirements in hand & wrist passive therapy.

Reference	Product
4621005002	Kinetec Maestra™

Ulnar deviation

Thumb
Opposition

Wrist extension/
flexion

Digital remote control

The digital remote control technology from KINETEC® has been featured in the device to provide a visual feedback to the patient as well as movement accuracy during therapy. The top panel is dedicated to each movement available with the unit.

Interactive guide

The device is also delivered with an educational DVD guiding the user through the patient set up and therapy. This useful tool also provides tips and advice from health professionals on the pathologies and protocols to be covered by the device.

Technical specifications

- Possibility to block the adjustment of the parameters.
- Start/Stop and reverse are always available to the patient.
- Precise adjustment of the parameters of the movement: ROM, speed, pauses at the limit of extension or flexion, for improved outcomes.
- Internally contained medical grade transformer eliminates handling extra components.
- 2-year full warranty.
- Type BF class II electrical device.
- **Speed:** 150° to 440° per minute.
- **Weight:** 8 kg without the case.
- **Size of the device:**
Length 35 cm, width 41 cm, height 30 cm.
- **Patient size:** All hand sizes from 7 years.

1. Thick Plastrozote Foam Tubing

Closed cell foam tubing, available in various sizes to provide a built up handle for easier gripping e.g. cutlery, pens etc. Nonabsorbent, non-sticky, washable and dishwasher safe.

- Supplied in one metre lengths
- Can be cut to size
- Exact lengths may vary plus or minus 50 mm
- Colour: White

scar care & bandages

1. Silicone Sicasil ferme 30-32 sh

Elastomer putty. Use equal proportions of blue putty base to white putty catalyst for consistent work/set times. 50/50 Mix leaves **no oily residue** on hands while mixing. Each kit comes with convenient measuring scoops. Store at or below 23°C.

Reference	Product
ML-SISI	500 gram (30-32 sh)

2. Mini-massager

Compact but powerful massager includes three heads for concentrated massage of specific areas. Cap can be left on for massage over larger areas. Battery operated massager vibrates at approximately 5500 cycles per minute.

Reference	Product
AA9200A	Massager - Battery included

3. Cohesive Flexible "CoFlex" Bandage

High-quality cohesive bandage **provides compression and support**. Can be used to secure dressings or orthotics. Adheres to itself, NOT to skin, and remains secure without clips.

Maintains consistent compression with **non-slip support** that won't loosen even during strenuous activity. Lightweight and cool. Non-sterile. **Contains latex**.

HAND DYNAMOMETERS

For measuring hand and grip strength.

1. JAMAR® Hydraulic hand dynamometer

Ideal for routine screening of grip strength and initial and ongoing evaluation of clients with hand trauma and dysfunction.

Virtually leak proof hydraulics and isometric design ensure accurate, reproducible results and years of reliable service.

In today's health care environment, accurate and objective data is required for reimbursable rehabilitation service, making the JAMAR Hydraulic Hand Dynamometer an indispensable tool.

Built to last, a shock resistant rubber cap protects the stainless steel gauge and a wrist strap prevents accidental damage if dropped. The JAMAR Hydraulic Hand Dynamometer combines precision with convenient features:

- Dual scale readout displays isometric grip force from 0 to 90 kg
- Peak hold needle automatically retains the highest reading until reset
- Handle easily adjusts to five grip positions, from 35 to 87 mm, in 13 mm increments
- One year warranty. The warranty does not cover calibration.
- At minimum, an annual calibration and tune up is recommended to ensure long term accuracy of the unit.
- Includes: carrying/storage case and complete instructions.

Reference	Brand
5030J1	Jamar

2. Baseline® Hydraulic hand dynamometer

Used to assess hand grip strength.

Baseline and JAMAR dynamometer measurements are interchangeable, permitting use of previously collected data.

- Increase grip spacing using five positions, 35 to 87 mm
- Tests strength to 90 kg

Adult norms included. moulded hard-plastic case.

3 year warranty.

Reference	Brand
AA72910	Baseline

An annual calibration is recommended to ensure long term accuracy of the unit. Please contact customer service for full details of this service.

evaluation tools

Precize testing of grip strength has never been so easy!

1. JAMAR® Plus+ Digital hand dynamometer

The Jamar Plus+ Digital Hand Dynamometer provides **improved accuracy** in measuring strength improvements and features an **easy-to-read display** for easier patient care. It gives PTs, OTs, and CHTs an easy way to track and document their patient's progress.

Advantages of Using a Digital Hand Dynamometer

If you already have a hydraulic hand dynamometer, you're probably wondering about the benefits of upgrading to a digital dynamometer. There are several benefits including more precise grip strength measurements. The Jamar digital hand dynamometer has **electronic load cells which increase accuracy** when measuring grip strength. The electric hand dynamometer also eliminates mathematical calculation errors by **automatically calculating statistics**, like average, standard deviation, and coefficient of variation, for you. Plus, without hydraulics, there is **no need to worry about leaking**. Upgrade your evaluation tools with the Jamar Plus+ Digital Hand Dynamometer.

Easier Clinician and Patient Use

This digital handheld dynamometer has a clear, **easy-to-read LCD display**. The **automatic calculations** save time so you can focus on your patients. Quickly measure changes as the result of your therapy and your patient's therapy putty work at home. Adjust the grip handle to one of **five different positions** to fit each user's hand. The Jamar digital hand grip dynamometer makes strength testing easy.

Reference	Features
091178458	Digital, does <u>not</u> work with tablet

2. JAMAR® SMART Digital hand dynamometer

The Jamar Smart can be used with the Jamar Smart App for a more detailed display of testing and results.

Download the Jamar® Smart app and use the Jamar® Smart handdynamometer with your iPad tablet. This app allows you to display, store and track various results on your tablet. For boosted and improved patient evaluations.

For iPad Air, iPad Mini, original iPad version 3 or later versions. **2 year warranty**, does not cover calibration

Reference	Features
091556034	Digital, works <u>with or without</u> tablet

Measure grip strength with your tablet!

The free app allows users to

- Calculate the average, standard deviation and coefficient of variation
- Adjust the number of reps from 1 to 5
- Decide which hand and position to test
- Contrast results to averages

The fully featured app allows more features:

- The ability to save and redo tests with the same parameters
- Save patient profiles
- Graph results
- Save results as PDFs
- Perform 5 position grip, sustained grip
- Rapid exchange tests

1. JAMAR® Smedley hand dynamometer

Spin handle increases or decreases grip width as needed. Scale dial remains at the maximum reading.

Calibrated to 100kg.

Includes instructions, norms and Client Record Charts.

Comes in an attractive storage/carrying case. Latex free.

Reference	Product
AA964901	See image 1

1

2. Baseline® Pneumatic hand dynamometer

Vigorimeter measuring hand strength, even where grasping power has been severely impaired or other disabilities inhibit gripping effort.

It is lightweight and should be used when accuracy and repeatability are required.

Maximum reading remains until reset. The smallest bulb may be used for children and to test pinching function of intrinsic muscles.

Scale is calibrated in an international unit of energy (bars).

Includes carrying case with instructions.

Bulb contains natural rubber latex.

Reference	Product
AA96001	See image 2

2

HAND EVALUATION KITS

Everything you need for hand & finger strength measuring included in one convenient set.

3. Baseline® 7-Piece hand evaluation kit

Complete kit of 7 instruments necessary to measure hand strength and range of motion.

The kit includes one:

- Hydraulic hand dynamometer AA72910
- 13,6 kg finger pinch gauge 7486
- 15 cm stainless steel goniometer
- 2-point discriminator with 3rd point
- Wartenburg pinwheel
- Finger circumference gauge
- Functional finger motion gauge

Comes in an attractive storage/carrying case.

AA72910 has 3 year warranty, does not cover calibration. All the other components have 1 year warranty.

Reference	Product
A44140	See image 3

3

evaluation tools

4. JAMAR® hand evaluation kit

For easy ROM-measurement of the metacarpal, phalangeal and interphalangeal joint.

This set includes:

- JAMAR Hydraulic hand dynamometer 5030J1
- JAMAR Hydraulic pinch gauge 749805
- JAMAR 140 mm metal finger goniometer

Comes in an attractive storage/carrying case.

Reference	Product
5030KIT	See image 4

5. JAMAR® hand evaluation kit II

Reliable and accurate dynamometer that features a dual scale readout and displays isometric force from 0 - 90 kg.

The **Jamar Pinch Gauge** is designed to measure isometric tip, key, and palmar pinch strength in pounds and kilograms.

Deluxe Small Joint Goniometer features linear inch and centimeter markings on both sides of the protractor in opposite directions, with measurements from 0° to 150° in 5° increments.

The kit includes one:

- JAMAR Hydraulic hand dynamometer 5030J1
- JAMAR Finger pinch gauge of choice:
13,6 kg (091546977), 20,4 kg (091547009)
or 27 kg (091546985)
- JAMAR Deluxe Goniometer for small joints

Comes in an attractive storage/carrying case.

Reference	Included pinch gauge
091555119	0 - 13,6 kg
091555135	0 - 20,4 kg
091555143	0 - 27 kg

6. JAMAR® Plus+ hand evaluation kit

With de JAMAR® Plus+ digital dynamometer which has a clear, **easy-to-read LCD display**. The **automatic calculations** save time so you can focus on your patients.

This set includes:

- JAMAR Plus+ Digital hand dynamometer 091178458
- JAMAR Digital pinch gauge 091536754
- JAMAR 150 mm metal finger goniometer

Comes in an attractive storage/carrying case.

Reference	Product
091536697	See image 6

FINGER PINCH GAUGES

For measuring finger pinch strength.

1. JAMAR® Hydraulic Pinch Gauge

Unlike other traditional pinch gauges, this one has a **unique design that frees the client to perform a true pinch pattern because the therapist, not the client, supports the weight of the gauge.**

This results in a very accurate measuring of pinch strength.

Dual scale readout measures in both pounds and kilograms, up to 20 kg, with a peak hold needle that retains highest reading until reset.

Instructions and storage/carrying case included.

1 year warranty, does not cover calibration.

Reference	Force
749805	Up to 20 kg

2. JAMAR® Digital Pinch Gauge

The Jamar Digital Pinch Gauge has an **easy-to-read LCD display** and features an **electronic zero calibration system.** The push-button console includes a button to zero the last reading stored in memory and two toggle buttons used to accurately **store up to 99 readings.**

Handy wrist strap included

1 year warranty, does not cover calibration.

Reference	Force
091536754	Up to 27 kg

3. JAMAR® Pinch Gauges

Measures force in pounds and kilograms, and is used for isometric tip, key, and palmar pinch strength evaluation.

The red pointer stays at the highest achieved force after the tool has been squeezed to measure maximum pinch capabilities.

Reference	Force
091546977	0 - 13,6 kg
091547009	0 - 20,4 kg
091546985	0 - 27 kg

4. Baseline® Pinch Gauges

The Pinch Gauge by Baseline® is a precision instrument that is designed to record isometric lateral, chuck or tip pinch in pounds and kilograms. The red pointer stops at the maximum pinch recorded for the highest degree of accuracy, and is designed for medical professionals.

Comes in an attractive storage/carrying case.

3 year warranty, does not cover calibration.

Reference	Force
7486	0 - 13,6 kg
7485	0 - 27 kg

evaluation tools

DISCRIMINATORS

1. Baseline® Discrim-A-Gon™

Discrim-A-Gon 2-point discrimination set includes two discrimination octagons (wheels).

Each octagon measures a different range of 8 labeled, fixed 2-point intervals ranging from 1 mm to 25 mm.

The easy-to-use, lightweight plastic wheel is the perfect sensory evaluation tool to test static and dynamic 1 and 2-point discrimination.

Reference	Product
091182997	See image 1

2. Baseline® 2- and 3-point Discriminator

Evaluate cutaneous sensitivity and touch threshold. Plastic points minimize influence of temperature.

Two point discriminator with third point permits alternating between single and double point stimulation without changing setting.

Measures up to 14 centimeter discrimination

Reference	Product
AA9661	Two point
AA9662	Three point

MONOFILAMENTS

Monofilaments are used to measure skin sensitivity and determine peripheral nerve involvement.

3. Baseline® Tactile Monofilaments

The Baseline tactile monofilament evaluator is used to measure cutaneous sensory perception threshold.

Each monofilament represents a unique amount of force and has a fitted protective case enables safe storage and transport.

5-piece Set of hand monofilaments:
2.83, 3.61, 4.31, 4.56, 6.65 gram

Reference	Product
12-1662	See image 3

4. WEST™ Monofilaments

Weinstein Enhanced Sensory Test (WEST) offers an improved version of the Semmes-Weinstein monofilaments.

Monofilaments are used to measure skin sensitivity and determine peripheral nerve involvement.

WEST monofilaments provide reliable test results with textured, round monofilament tips.

Reference	Product
12-1406	See image 4

METAL GONIOMETERS

1. Baseline® Metal 'Robinson' Goniometer 15 cm

A goniometer measures range-of-motion (ROM) of various joints. Tension between the arms is controlled by the thumb knob.

- Length: 15 cm
- Scale: 180°
- Increments: per 5°

Reference	Product
12-1042	See image 1

2. Baseline® Metal Goniometer 20 cm

- Length: 20 cm
- Scale: 180°
- Increments: per 1°

Reference	Product
12-1040	See image 2

3. Baseline® Metal 'Conzett' Goniometer 35 cm

- Length: 35 cm
- Scale: 180°
- Increments: per 1°

Reference	Product
12-1041	See image 3

4. Baseline® Metal Goniometer 35 cm - 360°

- Length: 35 cm
- Scale: 360°
- Increments: per 1°

Reference	Product
12-1050	See image 4

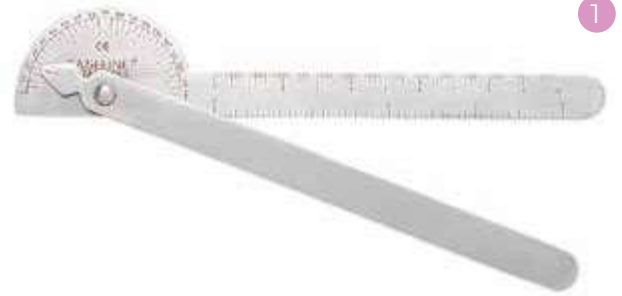

5. Baseline® Metal Goniometer Set

Set of **6 Baseline goniometers** includes the following metal goniometers:

- 12-1042: Goniometer 'Robinson' 15 cm - 180°
- 12-1041: Goniometer 'Conzett' 35 cm - 180°
- 12-1050: Goniometer 35 cm - 360°
- 12-1040: Goniometer 20 cm - 180°
- 12-1014: Finger goniometer 15 cm
- 12-1031: X-Ray goniometer 20 cm - 180°

All 6 instruments are in a protective carry case.

Reference	Product
12-1043	See image 5

evaluation tools

FINGER GONIOMETERS

1. Baseline® Finger Goniometer

A finger goniometer measures **range-of-motion (ROM) of finger joints** (metacarpophalangeal and interphalangeal) and other small joints including toes.

- Length: 15 cm
- Head with opposing scales: 180° - 30°
- Increments: per 5°

Reference	Product
12-1010	See image 6

2. Baseline® Finger Goniometer - 1 finger design

Unique design allows measurements to be taken by the therapist **using only one hand**; this frees up the therapist's other hand to stabilize the patient during measurement or to record the measurement.

- Length: 15 cm
- 110° flexion - 40° hyperextension
- Increments: per 5°

DIGITAL GONIOMETERS

3. Baseline® Digital Plastic Goniometer 25 cm

This plastic goniometer permits observation of a joint's axis of motion and its range of motion.

The 360 degree head permits reversible readings, allowing for the device to be flipped so the display is read more easily.

The digital display reads continuously as arms are adjusted. This is an essential tool for treatment, rehab and surgical recovery and evaluation.

This goniometer lets you measure joint limits and range-of-motion as well as check extension, flexion, abduction, adduction and rotation.

The arms have a linear scale in both inches and centimeters. **They also will remain at the last measurement position until reset.**

The plastic of the goniometer allows the device to be placed directly on a joint or limb for easy observation.

- Length: 25 cm
- Scale: 360°
- Increments: per 0,5°

Reference	Product
12-1049	See image 8

PLASTIC GONIOMETERS

Plastic transparent goniometers of high quality.

The special **HiRes** models have a **white line behind the measurement gradations** to make the readings even easier to read.

PEG TESTS

1. Jamar® 9-Hole Peg Test

This hand testing kit is easy to understand for patients and gives accurate feedback for practitioners.

It is designed to test and develop an individual's **fine motor skills** or help diagnose **neurocognitive disorders**. This is accomplished with timed hand-eye coordination tests that gauge hand dexterity and control.

Includes the peg board, 9 pegs, and a stopwatch.

Reference	Product
A8515	Full kit
A8516	Spare pegs (per 9)
A8423	Spare stopwatch

2. Jamar® Grooved Peg Board

More challenging and requires **more complete visual motor coordination** than most pegboards. This model contains holes with randomly positioned slots. The pegs must be rotated before they can be inserted.

Includes the peg board and grooved pegs.

Reference	Product
7446	Full kit
A9685	Spare pegs (per 30)

3. Jamar® Pegboard Test

Provides **both gross and fine motor skill tests**. Can be used to test arms, hands, fingers, and wrists. Great addition to any physical therapy center or clinical setting.

Includes 55 pins, 45 washers, 25 collars, 25 record blanks, Quick Reference Guide, normative data, instruction manual.

Reference	Product
A9291	Full kit

4. Jamar® Tweezers Dexterity Test

Pins have to be placed in holes using tweezers. Specialised test requires using tweezers to place pins in holes. Requires precision, steadiness and a high degree of hand/eye coordination.

Includes tweezer, 100 pins and manual with norms.

Reference	Product
7521	Full kit

5. Jamar® Wooden 9-Hole Peg Test

The Jamar 9-Hole Pegboard is ideal for motor coordination and evaluations. The wooden pegboard helps with **finger dexterity exercises**. With 2 two side slots for storage.

Includes tweezer, 100 pins and manual with norms.

Reference	Product
5309	Full kit
927037	Spare pegs (per 9)

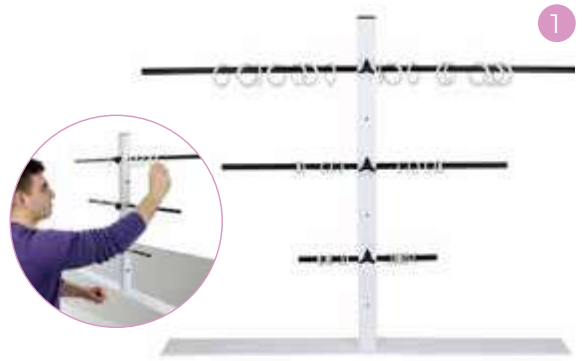

1. Rolyan Horizontal Ring Tree

Horizontal Ring Tree features three height-adjustable horizontal bars on which to place the sliding rings. The rings assist in graded coordination tasks to improve **cognitive motor skills** and **perceptual motor skills**.

Ideal for use by individuals in need of upper extremity rehabilitation, including those with **neurological disorders**, burns, and **orthopedic issues**.

Includes 36 plastic rings (12 with 3, 4 and 5 cm diameters)

Reference	Dimensions
A4055	72,4 cm length

2. Rolyan Climbing Board and Bar

The Rolyan Climbing Board assists in rehabilitation of the shoulders and arms. The horizontal bar can be guided to the top of the board to improve range of motion and upper extremity endurance. Padded handle grips on the bar allow for easier grasp and greater comfort. Two drilled holes in the base allow for permanent attachment to an exercise table.

Reference	Dimensions
A3591	See image 3

3. Incline Board

Designed for **upper extremity progressive resistance exercise**, the incline board can be used to test shoulder strength and range of motion. The board allows for **bilateral** and **unilateral use** and can be positioned at various angles, from flat to 45°. Ideal for shoulder and arm rehabilitation after surgery or injury.

Reference	Dimensions
A4101	79 x 21,5 cm with 61 cm base

4. E-Z Exer-Board

Provides resistive finger flexion, extension and lateral prehension, forearm supination and pronation, and wrist flexion and extension. Use 2.5cm hook strip and small object for increased resistive motion. Suction-cup base provides stability during exercise. Easy to use for home exercise programmes.

Reference	Dimensions
A7251	See image 5

rehabilitation

1. Rolyan Pronation/Supination Wheel

Shoulder rehabilitation device allows for pronation and supination exercises and features a **non-slip rubber exterior** for smooth, stable motions.

The wheel allows for targeted training of the **pronator teres and pronator quadratus** during injury and surgery recovery.

A comfortable middle handle accommodates any hand size and can be used with a flexion glove when necessary.

Reference	Dimensions
-----------	------------

A4141	See image 1
-------	-------------

2. Jux-A-Cisor Arm Exerciser

This exercise game will challenge its user's ability to **mobilize his/her upper extremities** as well as improve stamina and promote **joint strengthening**.

Simply manipulate the white circular disk around the bends in the wire. Its basic, straightforward design is excellent for someone who is attempting to **regain their motor skills** after suffering a **stroke** or sustaining a **brain injury**.

Plastic-coated, tempered-steel wire has 25 different twists and turns that will test its user's upper extremity strength and range of motion.

Reference	Dimensions
-----------	------------

5288	32 cm height
------	--------------

3. Roeder Manipulative Aptitude Test

For arm and hand rehabilitation or pre-employment assessments, the test measures the **speed and dexterity in hand and finger movements**.

The movements include twisting and thrusting one's arm, hands, or fingers. The test is a durable plastic board with 4 receptacles for washers, rods, caps, and nuts. For special tests, a T-bar is included.

Includes T-bar, manual, norms, record, rods, rings.

Reference	Dimensions

shoulder & elbow

clavicle supports

1. Octofix

This orthosis is designed to provide **optimal support and immobilisation of the collarbone** while recovering from a broken or injured clavicle. It encourages a correct posture through stabilisation.

Indications

- Clavicle fractures
- Subluxation of the acromioclavicular joint

Features & benefits

- Gauzed fabric with padding
- 8 type bandage with Back Velcro® fastening system

Reference	Size	Chest circumference
OS-M8503-XS	XS	55 - 70 cm
OS-M8503-S	S	70 - 85 cm
OS-M8503-M	M	85 - 100 cm
OS-M8503-L	L	100 - 110 cm
OS-M8503-XL	XL	110 - 120 cm
OS-M8503-XXL	XXL	120 - 135 cm

2. Ortho 14-315

Pediatric clavicle splint.

Indications

- Clavicle fractures
- Subluxation of the acromionclavicular joint

Features & benefits

- Made of gauze fabric with padding
- Applied similarly to the figure of eight bandage with Velcro® closure at the back

Reference	Size
OS-MOFT315	Universal size

slings & immobilizers

1. UomoFix

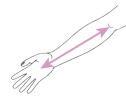

Shoulder immobiliser with push buttons.

Comfortable soft neck pad for neck protection.

- **Thumb loop** for extra comfort.
- Waist strap limits shoulder movement.
- **Extra deep pocket** improves arm positioning.
- Latex free.

Size: measure the length from elbow to knuckles.

Reference	Size	Length forearm
S-FIT-40-013-U1	XS	> 28 cm
S-FIT-40-013-U2	S	28 cm
S-FIT-40-013-U3	M	36 cm
S-FIT-40-013-U4	L	43 cm
S-FIT-40-013-U5	XL	51 cm

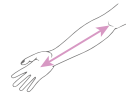

2. Deluxe Shoulder Immobiliser

Comfortable soft neck pad for added neck protection.

- **Thumb loop** for additional comfort.
- Waist strap limits shoulder movement.
- **Extra deep pocket** improves arm positioning.
- Latex free.

Size: measure the length from elbow to knuckles.

Reference	Size	Length Forearm
A545801	S	28 cm
A545802	M	36 cm
A545803	L	43 cm
A545804	XL	51 cm

3. Shouldfix II

Arm and shoulder immobiliser with removable elbow pocket.

Indications

- Stable humerus fractures
- Gleno-humeral luxation
- Distorsions of shoulder
- Post surgery humerus fractures and gleno-humeral luxation treatment
- Post surgery after tenorrhaphy of long head of humeral biceps

Features & benefits

- Pocket sling made of Velcro padded fabric, perfectly adjustable
- Soft Velcro braces
- Exclusive mesh elbow-block band
- Fixation band made of padded fabric, perfectly adjustable

Reference	Size
OS-M8412	Universal size

BACK**

slings & immobilizers

UOMOFIT BY FITLINE

The UomoFit from the FitLine brand is a 3-in-1 sling. It is made of a skin friendly and breathable mesh base material. With **Thermal-moulded foam padding** for more support. Helps the healing process after surgery.

Indications

Immobilisation after:

- Rotator cuff repair
- Capsular shift
- Soft tissue repair / strain
- Shoulder instability / injury

Features & benefits

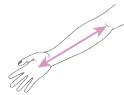

- Preformed underarm for better fitting
- Moulded removable elbow padding
- Magnetic closing
- Adjustable thumb and size.
- Fits left and right

1. FitLine UomoFit Regular

The original UomoFit model.

- Preformed armsling with cork
- Small pillow
- Cork is processed in the sling
- Ball insert and exercise ball not included

Reference	Size	Length forearm
S-FIT-40-004-U2	S/M	± 31 - 38 cm
S-FIT-40-004-U4	L/XL	± 38 - 44 cm

2. FitLine UomoFit Short

The UomoFit Regular with smaller preformed armsling.

- Ball insert and exercise ball not included

Reference	Size	Length forearm
S-FIT-40-006-U2	S/M	± 31 - 38 cm
S-FIT-40-006-U4	L/XL	± 38 - 44 cm

3. FitLine UomoFit with zipper

Same product as the UomoFit but the sling has a zipper so the arm can be set free to make it possible to make arm movements.

- Preformed armsling without cork
- Large pillow
- With zipper for pendulum exercises
- Ball insert and exercise ball are included

Reference	Size	Length forearm
S-FIT-40-011-U1	XS	< 31 cm
S-FIT-40-011-U2	S/M	± 31 - 38 cm
S-FIT-40-011-U4	L/XL	± 38 - 44 cm

slings & immobilizers

1. Figure-of-8 Sling

Provides support to the shoulder, elbow and forearm. Supportive for orthopaedic and neurological conditions.

- Strapping system helps distribute pressure. Hook and loop construction provides wide adjustability.
- Soft and comfortable strapping material.

Size: measure the length from the elbow to the knuckles..

Reference	Size	Length Forearm
A5451	S/M	28 - 41 cm
A5452	L/XL	40 - 55 cm

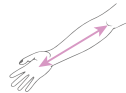

2. Deluxe Sling and Swathe

Provides contention, stabilization and immobilization of the scapulohumeral joint. For shoulder dislocations and other pathologies requiring shoulder immobilization or forearm support.

- Shoulder strap crossed in back.
- Designed with a wide swathe.

Size: measure the length from the elbow to the knuckles.

Reference	Size	Length Forearm
S-FIT-40-010-U2	S/M	28 - 41 cm
S-FIT-40-010-U4	L/XL	40 - 55 cm

3. C.V.A. Sling

Provides soft cushioning for maximum comfort of the shoulder, hand and arm. Washable.

Reference	Size
A5492	Universal size, fits most adults

4. Vulkan® Pro Sling

Lightweight, comfortable, easy to apply and reversible. The material is soft and the sling is easily adjustable.

Reference	Size
011612	Universal size, fits most adults

5. FitLine UomoSling

Strap arm sling, appropriate for trauma at wrist, elbow or shoulder. Arm support in combination with a cast.

- Non-stretch foam maintains position of the limb while wearing, with no slipping
- **Wide, soft foam** distributes pressure evenly around neck.
- Attractive blue colour does not dirty as easily as some competitors and raises patient compliance
- **28 included Y-tab Velcro fasteners** allow an easy adjustment for clinician and patient

Size: one size fits most adults, both left and right side.

Reference	Size
LS4103	Universal - 2 rolls - 5,5 mm x 12 m

slings & immobilizers

1. Lancaster Paediatric Shoulder Brace

Universal sling with shoulder strap and body wrap for shoulder immobilisation. Can be adjusted to fit most paediatric patients.

Features & benefits

- Fully adjustable padded shoulder strap with for comfort
- Arm envelope can be easily trimmed for custom-fit

Reference	Size	Age
LSSB/10	Baby	0 - 18 months
LSSP/10	Pediatric	2 - 10 years

2. Ortho 14-310

Pediatric arm sling

Indications

- Forearm and wrist support aid
- As support in cases of cast limb
- Useful if resting of the acromioclavicular (after a subluxation grade 1) or glenohumeral joint is required
- Useful in case of immobilisation of the upper arm with the elbow in flexed position

Features & benefits

- Structure made of cotton blended fabric
- Velcro® fastening
- Shoulder strap with neck protection padding

Reference	Size
OS-MOFT310	Universal size - length: 24 cm

3. Ortho 14-305

Pediatric immobiliser for arm and shoulder, with elbow support

Indications

- Compound humerus fracture
- Glenohumeral subluxation
- Shoulder sprain
- Post-surgical care of humeral fractures and interventions on humeral subluxations
- Postoperative care of the long head of the biceps tendon

Features & benefits

- Cotton blend fabric sling
- Soft padded fabric immobiliser swathe
- Shoulder straps with Velcro® fastenings
- Elbow support

Reference	Size
OS-MOFT305	Universal size - length: 23 cm

rom elbow braces

1. FitLine ROM Elbow Brace

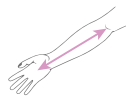

Indications

- Conservative treatment of ligamentous elbow injuries
- Post-operative treatment after elbow arthroplasty.
- Functional aftercare of stable fractures of the distal humerus.
- Orthotic treatment of fractures of medial/lateral epicondyles.

Features & benefits

- Soft padded shoulder straps
- For comfortable immobilisation / ROM of the shoulder
- Easy application

Reference	Side	Size	Length forearm
S-FIT-50-001-L2	Left	Small	< 34 cm

elbow & shoulder supports

VULKAN SHOULDER & ELBOW SUPPORTS

Flexibility and strength. Our elbows and shoulders have a tough job and they have to be mobile and flexible.

By the way: did you know that the shoulder is the most mobile joint in the body? Vulkan supports keep you on the move!

1. Vulkan® Neoprene Full Shoulder Support 3021

Provides support following **shoulder dislocation** and helps alleviate **bursitis** and **tendonitis**. Adjustable closures for added comfort.

Reference	Size	Chest circumference
006828S	S	80 - 90 cm
006828M	M	90 - 100 cm
006828L	L	100 - 110 cm
006828XL	XL	110 - 120 cm

2. Vulkan® Neoprene Half Shoulder Support 3018/3019

Provides **warmth and support** to the shoulder joint. Adjustable closures for added comfort and fit. Individually left or right shoulder protection.

Reference Left 3018	Reference Right 3019	Size	Chest circumference
006831S	006832S	S	80 - 90 cm

4. Vulkan® Neoprene Tennis Elbow Strap 3074

Helps to reduce the pressure on the tendon complex at the elbow during repeated movements. Ideal for tennis players and golfers.

Reference	Size
009750	Universal size

elbow & shoulder bandages

1. Epilastik 32

Elasticated fabric elbow sleeve.

Indications

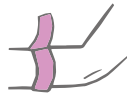

- Lateral epicondylitis (tennis elbow)
- Medial epicondylitis (golfer's elbow)
- Chronic pain from bursitis or tendinitis

Features & benefits

- **Stretch knit fabric** featuring areas of different targeted compression
- Anatomically designed
- **Silicone inserts** shaped to redistribute compression on the epicondyle and epitrochlea and pressure pads on the forearm
- The **edging is strengthened** with silicone trim so the support feels softer and keeps its shape when being pulled on

upper spine

1. Philadelphia™ Tracheotomy Collar

This collar provides **rigid immobilisation**, **reduces rotation**, and **slightly hyperextends** the cervical spine.

Constructed of lightweight, closed cell foam material. Hook and loop closure provides easy application and removal.

2. Ortho 14-105

Pediatric bivalve cervical collar with tracheal hole.

Indications

- Medium severity to severe distortion of the cervical spine
- Multiple discopathies of the cervical spine
- Cervical spine traumas
- Pathological instability as result of cervical spine metastases
- Support of Post-surgical spinal surgery care

Features & benefits

- Central front and back rigid support plates
- Radiolucent
- Shaped for perfect fit at chin, neck and shoulders
- Trachea hole

MOFT105	4 - 9 years old

Introducing the VRTX system

ONE SYSTEM, EXPANDED SOLUTIONS

**AN OFF-THE-SHELF TOTAL SPINE SOLUTION
READY WHEN YOUR PATIENTS NEED IT.
THE FIRST FULLY INTEGRATED SPINAL SUPPORT
SYSTEM FOR CERVICAL TO SACRUM TREATMENT.**

The VRTX System provides optimal motion restriction for multi-level stable spinal injuries in a modular design. The prefabricated Collar, CTO, LSO, TLSO, and CTLSO can be stepped up or down depending on patient need, and intuitive universal sizing helps drive efficiency in clinical settings.

Cervical Collar

upper spine

1. VRTX Cervical Collar

Designed to improve fitting application, fit a wider range of patients, and connect with the VRTX system of products.

- Symmetrical back panel design to ensure proper fit.
- Automatically adjusts to patient neutral head position.
- Shorter lateral sides and more finite height adjustments to fit a wider range of patients.
- Window for time stamping pad replacement.
- Ability to step up to CTLSO (with upgrade kit).
- Singular pad design for front and back panel for easier replacements.

ASP-985011	VRTX Cervical Collar
ASP-985030	Extra Replacement Pads
ASP-985013	VRTX Cervical Collar + Extra Replacement Pads

1

2. Vista Cervical Collar

Improves patient care while saving time, money and storage space. With its innovative height adjustment, this collar is actually **6 collars in 1**.

The right size is always at hand, reducing storage and inventory costs, while improving patient care.

Reference	Product
ASP-984000	Vista Adjustable Collar
ASP-984020	Extra Replacement Pads
ASP-984002	Vista Adjustable Collar + Extra Replacement Pads

2

3. Vista Multipost Collar

Fully adjustable collar with **pivoting occipital panels**. Like the Vista Cervical Collar this collar is one size adjustable. Features Aspen's proven cotton-lined pads designed to enhance skin care by reducing patient contact points in the occipital area.

Reference	Product
ASP-984200	Vista Multipost Collar
ASP-984220	Extra Replacement Pads
ASP-984202	Vista Multipost WCollar + Extra Replacement Pads

3

4. Vista TX Collar

This collar encompasses all of the features and benefits of the Vista Cervical Collar with a **thoracic extension**.

Reference	Product
ASP-984100	Vista TX Collar
ASP-984120	Extra Replacement Pads
ASP-984102	Vista TX Collar + Extra Replacement Pads

4

4. Vista Multipost Therapy Collar

The Vista Multipost Therapy Collar is designed to reduce the symptoms of **Forward Head Carriage**. This disorder is a growing problem on the ever increasing use of cell phones and computers.

The unnatural head position can shift the cervical spine out of alignment, leading to radiculopathy, neuropathy and cervicogenic pain.

- A **compression bladder** enhances the collar's ability to hold the head in cervical neutral.
- Cradles the chin.
- **Integrated air pump** to quickly achieve the level of compression that works best.
- **One size adjustable** (6 sizes in 1 collar) by simply pulling and turning the Height Adjustment Dial.
- **One-time adjustment** with the locking strap on the left side.
- **Hot/cold therapy pack** can be moved for targeted therapy.
- Activating the compression bladder can enhance healing and help reduce symptoms by taking stress off the vertebra, discs and nerves.

4

ASP-984257	Replacement Therapy Pack

5. ICU Back Panel

Designed for patients at risk of occipital breakdown due to extended periods of lying supine. The ICU back panel utilizes the standard back panel of the Vista back panel providing the same superior motion restriction. Back panel extension can be removed once the patient becomes ambulatory.

Features & benefits

- Maximum skin care and comfort
- Pressure reducing pad
- Extended back panel height for rotating or repositioning patients safely
- One size adjustable

For use with

- Vista Adjustable Collar
- Vista TX Collar
- Vista Multipost Collar

Reference	Product
ASP-984600	ICU Back Panel

5

upper spine

1. Aspen Cervical Collar

Designed to optimize support and comfort, two key components for better patient outcomes.

The structure of the collar was engineered to provide **substantial motion restriction without producing painful pressure points** that can lead to skin breakdown or poor patient compliance.

All contact surfaces are cushioned with cotton-lined, breathable foam padding.

Reference	Size
ASP-983108	Short
ASP-983110	Regular
ASP-983112	Tall
ASP-983114	Extra tall

Reference	Product
ASP-983159	Universal spare padding

2. Aspen Pediatric Cervical Collar

Available in five sizes to provide a custom fit for all infants and children.

Features & benefits

- Safe for the delicate skin
- Gentle by design
- Effective motion restriction

Reference Collar	Reference Collar + Extra Pads	Size	Age	Height	Weight

1. VRTX CTO & CTO4

Designed to provide **increased motion restriction in all three planes of motion** — flexion/extension, lateral bending, and axial rotation.

- Locking sternal adjustment
- Flexible thoracic adjustment
- Fully padded at all contact points
- Easily stepped down to the VRTX MultiPost Collar to support the progression of care

Reference	Product
ASP-985510	A. VRTX CTO
ASP-985550	B. VRTX CTO4
ASP-985530	Full Replacement Pads

2. Vista CTO & CTO4

Has **multiple adjustment points** to ensure a comfortable, effective fit for the vast majority of patient anatomies.

The Vista CTO is **fully adjustable** and only one size is required, reducing inventory costs and keeping patients care the main priority.

Features & benefits

- Maximum motion restriction
- **Pivoting occipital panels:** pivot bilaterally and self-adjust to cradle all head shapes
- Fully adjustable front and back panels
- **Adjustable low profile back strut,** even in the supine position
- Progression of care: can be stepped down again to the collar quickly and without tools
- Fully padded at all patient contact points

Indications

- Post Surgical
- Cervicothoracic instability

upper spine

1. VRTX CTLSO

The VRTX CTLSO addresses the market need for a fully integrated line of products for a trauma setting. This **off-the-shelf cervical to sacrum solution** improves hospital efficiency, saves resources, and expedites patient care.

MODULARITY IN TREATMENT

The all-in-one system allows clinicians to support multiple or singular levels of the spine based on the severity of trauma. Can be stepped down to the VRTX Collar or VRTX TLSO/LSO.

INTUITIVE VRTX COLLAR

Symmetrical back panel design, shorter lateral sides, and widows for time stamping pad replacements allow for an improved fitting experience and easier patient application.

BIVALVE TLSO/LSO DESIGN

Allows for more simplified fitting and less logrolling of patients during clinician application and improved at home application for patients.

Reference	Product
ASP-985650	VRTX CTLSO
ASP-985030	Collar replacement pads
ASP-995613	Lower spine replacement pads

1

2. VRTX TLSO

Years of Aspen technology have been integrated into an intuitive and specialized design for efficient supine patient application, perfect for providing optimal motion stability in trauma and post-operative patients.

VRTX TLSO contours comfortably to the vast majority of patient anatomies without compromising support.

- Simplified two-piece **bivalve design**
- **Limit logrolling** patient fitment
- **Underarm straps** for optimal motion stabilization.
- Ability to step down to LSO or step up to CTLSO

SlickTrack Technology for a customizable amount of compression with easy to pull tabs and side handles.

Reference	Product
ASP-995610	VRTX TLSO
ASP-995613	Replacement Pads

2

3. Vista 464 TLSO

Offers patients support within the thoracolumbar spine, providing a versatile system that accommodates appropriate motion restriction throughout the healing process.

The **three shoulder strap configurations** and **height adjustment technology** accommodate all body styles for an effective and comfortable fit.

Fits waists ranging from 66 to 152 cm.

Reference	Product
ASP-993640	Vista TLSO 464

3

1. Horizon PRO 456 TLSO

Creates a dynamic environment for healing within the thoracolumbar and lumbar spine. Targets patients with indications that have historically been a challenge to treat such as **compression fractures, burst fractures** and **hyper-kyphosis**.

New PRO version!

- Enhanced SlickTrack system
- Integrated front pockets
- Optimized access to anterior & lateral panels
- Low-profile design

One Size Adjustable. Fits waists ranging from 61-127 cm and up to 178 cm with the extension panel.

Reference	Product
ASP-994740	Aspen Horizon PRO 456 TLSO
ASP-993745	Horizon Extension Panel

2. Elite TLSO

The Aspen Elite TLSO provides clinicians with a **light weight, low profile** option to treat patients with symptoms related to **osteoporosis**.

- Adjustable and customizable strut height
- Ergonomic pull tabs and integrated pockets
- Targeted independent tightening system

Reference	Size	Waist circumference

3. Sierra 464 TLSO

Aspen Sierra™ offers quality with clinically effective motion restriction for post-operative patients. Featuring a side entry system from either the left or right side, Aspen Sierra braces are easy to apply on supine or ambulatory patients.

One Size adjustable.

Fits waists ranging from 71 - 137 cm.

Features & benefits

- Controlled Compression
- Easy to Locate Pull Tabs
- Posterior Wound Relief
- Lateral Panel Angulation

Reference	Product

ASP-501321	Update kit

lower spine

1. VRTX LSO

Provides trunk stability and targeted compression designed to support the lower spine in trauma and post-operative patients. To further support patient recovery, the VRTX LSO has the ability to upgrade to the TLSO and CTLSO.

- Optimal Motion Restriction
- Two Piece Design
- Modularity In Treatment
- Limit Logrolling

One Size Adjustable.

Fits waists ranging from 61 - 127 cm

Reference	Product
ASP-995410	VRTX LSO

ASP-992310	Universal	66 - 152 cm

1. Aspen Lumbar Support

The Aspen Lumbar Support features a simple, elegant design with the essential elements required in a spinal brace to effectively relieve pain.

Aspen's **patented 4:1 tightening mechanism** allows the patient to independently adjust the top and bottom of the brace to provide localized compression where is needed for maximum pain relief.

Features & benefits

- **Simple, elegant design** can be worn under clothing.
- **2-stage pain relief.** When first applied, the brace provides the comfort of an elastic brace. Extending the pull tabs gives a highly effective pain relief.

1. Aspen Elite Active

The Aspen Elite Active helps stabilize the pelvic and lumbar region through the unique combination of Aspen's patent pending **UltraKnit™ technology** and patented 4:1 mechanically advantaged **independent compression system**, which can be easily adjusted by patients to provide a therapeutic level of support.

This elegant design helps provide massaging pressure, stabilization and control for patients, helping to restore functional mobility.

Features & benefits

- Comfortable, Intimate Fit
- Essential Lumbar Stability
- **Lumbar Pad** for Massaging Pressure
- Targeted, Therapeutic Level of Compression
- Covers Complete Lumbar Region
- Hot/Cold Therapy Pack Option Available

2. Lumbosacral Orthosis Premium S

Indications

- Prophylaxis against recurrent injuries and excessive loads
- Follow-up treatment after neurological and orthopedic surgeries
- Non-invasive treatment of the movement segment
- Inborn faults of the lumbar segment of the spine
- Chronic pain in degenerative diseases
- Stabilisation of the lumbar segment

Features & benefits

- Dynamic stabilization allows ROM control and posture correction
- Balances the pressure on the intervertebral disc and joints
- Soft, flexible, air permeable lacing made of hypoallergenic fabric
- Semi-rigid plastic braces and removable baleens
- Tightening tapes allow adjustment of dorsum pressure.

VULKAN BACK SUPPORTS

Your back is your foundation, playing a huge role in how your entire body functions and stabilising your body during nearly all daily activities. The Vulkan back braces provide significant stability and support to avoid or reduce lower back pain.

1. Vulkan® Contoured Back Support 3013

This neoprene support provides **compression** and **warmth** to the lumbar area. Contoured for an improved fit with easy touch/close fastening. Ideal for **lower back pain** and **rheumatic pain**.

Reference	Size	Waist circumference
AO-006826XS	XS	60 - 70 cm
AO-006826S	S	70 - 80 cm
AO-006826M	M	80 - 90 cm
AO-006826L	L	90 - 100 cm
AO-006826XL	XL	100 - 110 cm
AO-006826XXL	XXL	> 110 cm

2. Vulkan® Criss Cross Back Brace 3093

Provides significant levels of lumbar support for those recovering from a **severe episode of back pain**. The **additional stays** and **compression strap** help to limit unwanted twisting and bending movements to allow recovery without strain.

Reference	Size	Waist circumference
AO-006841S	S	70 - 80 cm

1. Hyperextension Brace

Indications

- Traumatic fracture
- Compression fractures of the thoracic vertebrae dorsolumbar transition caused by osteoporosis or metastasis
- Osteomalacia
- Osteoarthritis in the thoracic and lumbar regions
- An alternative to a body cast

Features & benefits

- Immobilisation without hindering breathing or blood flow.
- Adjustable vertical stays and top bar.
- Innovative underarm hinges: Right amount of tilt, polymer spring, lighter and self flexing.
- Soft, water-repellent padding, moveable offset sternal pad.
- Less intrusive, equally effective rear strap.
- New side-release buckle with an orange safety button.
- Strap side fastening with 3-step self-fastening system.
- Dorsolumbar plate.

2. Hyperextension Brace with Pubis

Indications

Vertebral compression fractures, osteoporosis and arthritis

Features & benefits

- Lumbar hyperextension of the spine by 3 support points
- Anodized duralumin keeps the spine in hyperextension, limiting anteroposterior and lateral movements.
- Adjustable sternal and lateral plates.
- Tilted sternal plate.

hyperextension

3. E-stab

3-point hyperextension brace.

Indications

- Traumatic fractures (T10-L1/L2)
- Osteoporotic or metastatic-related compression fractures of the thoracic spine and the dorsolumbar transition (T10-L1/L2)
- Osteomalacia with fractures
- Dorsolumbar osteoarthritis
- Substitute for plaster corse

Features & benefits

- Shock-absorbing sternal plate for increased comfort
- Easy closure thanks to lightweight lever with safety button
- Anatomically shaped lumbar plate with central relief zones
- Pelvic band made out of flexible and resistant polymer

Measure pelvis circumference and height to choose the right size by consulting the appropriate table.

1. Nhyco

Cruciform spinal hyperextension orthosis.

Indications

- Extension and immobilisation of the dorso-lumbar spine
- Post-operative immobilisation
- Hyperkyphosis and roundback
- Scheuermann disease
- Collapsed vertebra caused by osteoporosis
- Collapsed vertebra caused by metastasis

Features & benefits

- Lightweight T6 aluminum alloy frame (allows a weight of less than 700 g)
- Adjustable and movable sternal and pubic pads
- Lumbar pad in 3 sizes: small (horizontal), regular, long
- Replaceable EVA padding-waterproof, non toxic and latex-free
- New PLUS fastening made from light, durable compound material. Simple to open and close, guarantees constant lumbar pressure. With safety fastening
- Simple telescopic adjustment of frame no need to remove screws

1. Hipocross

Brace for hip and coxalgia.

Indications

- Post-arthroscopy care
- Post-surgical care (compatible with the degree of stabilization required)
- Conservative treatment of hip dislocations
- Arthrosis of the hip joint
- Coxalgia or inoperable joint misalignment

Features & benefits

- Made of breathable **Aer-OS fabric**
- Lateral and anterolateral spiral support stays
- Front Velcro® fasteners
- Colour-coded Velcro® areas for fastening the straps.
- **Elastic calibrated rods**, with lateral crossing, for:
 - Prevention of excessive adduction
 - Partial limitation of flexion-extension
- **Gel Insert** to prevent oedema
- A rigid bar that locks the joint in flexion and neutral abduction during the initial days following a dislocation

VULKAN
FASTER INJURY RECOVERY

The Rehablock® is made of a sturdy material that can provide good support to patients with basic or poor trunk stability.

INNOVATIVE

This healthcare innovation provides stability in the back and under both arms. In this way, the patient can sit upright safely and comfortably and physical support from caregivers is no longer necessary. By removing the Rehablock®, trunk stability can also be trained in a controlled manner.

MAINTENANCE FRIENDLY

The cover is antibacterial and made of waterproof and fire-retardant material. The cover is resistant to water, blood, urine and can be easily cleaned with disinfectant wipes (e.g. Bacillol) without compromising the color of the cover. The Rehablock® is available in different colours.

SAFE

The Rehablock® complies with all applicable EU legislation and is therefore CE marked.

knee

functional knee braces

1. ArtroFit

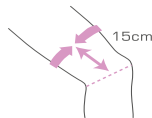

To support moderate to severe levels of osteoarthritis.

Indications

- Conservative treatment of advanced unilateral osteoarthritis
- Post-operative pressure relief & compartmental protection
- Instability of the cruciate ligaments
- Functional pre- or post-operative care of knee instabilities

Features & benefits

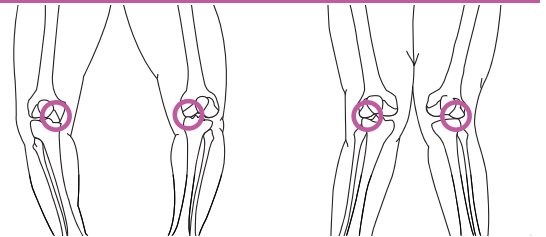

- Extension stops: 0°, 10°, 20°, 30° and 45°
- Flexion stops: 0°, 10°, 20°, 30°, 45°, 60°, 75°, 90° and 120°
- Immobilisation at: 0°, 10°, 20°, 30° and 45°
- High quality, 100% aluminium frame
- Pressure relief of the medial or lateral hinge compartment by the 3-point principle which off-loads the knee into varus or valgus position between 5-15°

Size: Measure circumference 15 cm above the mid-patella.

Size	Circumference
XS	31 - 37 cm
S	37 - 45 cm
M	45 - 51 cm
L	51 - 57 cm
XL	57 - 67 cm
XXL	67 - 74 cm

functional knee braces

2. LigaFit

Polycentric physioglide hinges based on the principle of 4-chain linkage.

Low profile, lightweight frame and hinge construction. Numbered straps ensure a simple and correct fastening of the brace. Air supracondyle pad minimises migration.

New soft-grip padding material gives excellent comfort.

Indications

Conservative pre- and postoperative treatment of knee instabilities.

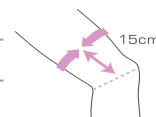

ACL, PCL or CI injuries and ruptured colateral ligaments.

Features & benefits

- Extension stops: 0°, 10°, 20°, 30° and 45°
- Flexion stops: 0°, 10°, 20°, 30°, 45°, 60°, 75°, 90° & 120°
- Immobilisation at: 0°, 10°, 20°, 30° & 45°
- Anatomically pre-moulded frame
- Malleable aluminium frame allows correct patient fitting
- Straps are numbered for easy application
- Polycentric hinge and 4-chain linkage system
- Prevents anterior and posterior tibial translation: 4-point system
- Low profile, lightweight

Size: measure circumference 15 cm above the mid-patella.

3. Fitline ROM knee brace

Knee brace with control of Range of Movement.

Indications

Pre- and post-operative immobilisation.

Features & benefits

- Controlled range of motion possible
- Also provides collateral stability
- Extension stops: 0°, 10°, 20°, 30°
- Flexion stops: 0°, 10°, 20°, 30°, 45°, 60°, 75°, 90°, 105° & 120°
- Immobilisation at: 0°, 10°, 20°, 30°
- Metal bars can be shortened due to the break lines
- Malleable metal side bars

3. Aspen CI Knee

The Aspen CI Knee Orthosis was developed to treat different types of instabilities (e.g. cruciate ligament and meniscus injuries).

It improves the patient's selfconfidence during increased mobility demands.

The double strut construction helps to maintain knee stability, while flexion / extension limits can be easily adjusted at the joint to control the range of motion.

Easy to use

Advanced alu quality

functional knee braces

PLUSPOINT KNEE BRACES

Functional knee orthosis

Indications

- Functional treatment of first and second sprain injuries of lateral / medial collateral ligament
- Prevention of recurring sprain LCM and LCL injuries during sports
- Mid-lateral chronic instability
- Patellofemoral arthrosis
- Conservative treatment of knee instability

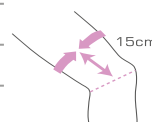

Extension: 0°, 10°, 20°, 30°, 40° - **Flexion:** 45°, 60°, 75°, 90° - **Block:** 0°, 10°, 20°, 30°

Size: Measure circumference 15 cm above the mid-patella.

1. Pluspoint 4

- **New anatomical design** for a perfect adherence
- Innovative frame made of a special aluminum alloy, light and stable, adjustable (facilitating modeling on thigh and calf). Matt black painted.
- **New buckles** (individually removable) made of special and flexible foam with anti-rotation system to apply the brace with ease;
- New reinforced Velcro® straps and divided for better adaptation
- MTP pads made of soft velvet with no adhesive and no seem
- **Ultra-low polycentric CLICLACK joint** easy to adjust using pins and WITHOUT any tool:
- **Pre-installed anatomic medial condyle pad** to provide stability
- Two sets of condyle pads of different thicknesses are included
- Internal frame pad (removable for cleaning) with low profile clickclick to ensure safe positioning.
- Hypoallergenic, anti-migration and multi-grip material

2. Pluspoint FAST

Front fit and easy to use straps

The Pluspoint Fast knee brace is put on from the front without having to insert the foot. This feature makes it extremely **practical and easy to use**. The straps don't need to be removed and reinserted every time, because they **fasten with small levers**, which maintain the regulation made on the first application.

functional knee braces

GO UP KNEE BRACES

Telescopic post-operative knee orthosis with graduated movement.

Indications

- Post-operative treatment requiring protection of the knee's flexion-extension (ligament reconstruction, transposition of the anterior tibial apophysis, fractures of the distal third of the femur, fractures of the proximal third of the tibia, patella fractures, tendon injuries of the extensor system)
- Post-traumatic phase of knee sprains
- Valgization and varization osteotomies

Features & benefits

- Lateral telescopic element made of light aluminum alloy
- Adjustable telescopic length with easy-to-use buttons on valves
- Valves with strap-loops and structural hook-and-loop system
- Removable and washable condyle protection pads
- MTP Pads to limit brace migration and protect leg from direct contact with hinge; lined only externally, cuttable and perfectly adaptable to leg circumference
- Non-metallic adjusting joint, light and intuitively adjustable

1. Go Up-T

- Flexion: from 0° to +120° with intervals of 10°
- Extension: from -10° to +60° with intervals of 10°
- Fast lock joint with specific button, from 0° to +60° with intervals of 10°

Reference	Size
OS-MG1046	Universal size

2. Go Up Pro

Renewed, even more durable and firm design!

New flexion-extension adjustment joint "PUSH&SET", made of a lightweight polymer material; intuitively and safely adjustable:

- Flexion: from -10° to +120° with intervals of 10°
- Extension: from -10° to +90° with intervals of 10°
- Fast lock joint with specific button, from -10° to +90° with intervals of 10°

functional knee braces

GENUFIT KNEE BRACES

Long wraparound Aer-OS knee orthosis with hinges and F-E control.

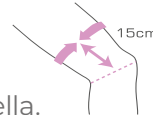

Indications

- Functional treatment of first and second sprain injuries of lateral/medial collateral ligament
- Prevention of recurring sprain LCM and LCL injuries during sports
- Mid-lateral chronic instability
- Patellofemoral arthrosis
- Conservative treatment of knee instability

Features & benefits

- New anatomical, ultra-flat design for a flexible movement and perfect adherence
- Breathable Aer-OS fabric and Velcro® fastening system for better comfort
- New softer Soft-X fabric for kneepit insert (with no central stitch) for better comfort
- Softer and elastic edge
- New front Velcro® fastening system design to apply the brace with ease: internal fastening system for prefixing and external for final fixing.
- Patella cut-out

Size: Measure circumference 15 cm above the mid-patella.

1. GenuFit 27A

Ultra-low polycentric CLICLACK joint easy to adjust using pins and WITHOUT any tool:

Extension: 0°, 10°, 20°, 30°, 40°; **Flexion:** 45°, 60°, 75°, 90°

Block: 0°, 10°, 20°, 30°

functional knee braces

1. GenuFEEL OA

Knee brace for treatment of gonarthrosis orthosis.

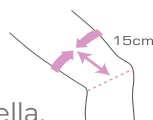

Indications

- Moderate unicompartmental gonarthrosis
- Post-operative cartilage or meniscus surgery

Features & benefits

- Patented fastening and tensioning system: interlocking buckles and tensioning levers make it fast and easy
- Ring unloads brace pressure for better comfort
- Efficient: three-point pressure system lightens the load on the painful side of the knee
- Support when needed: tensioned while walking and in stand-by when seated
- Breathable elastic fabric Aer-OS light:
- Front opening for an easy fit
- Soft pocket tips to facilitate fastening
- Technopolymer valve for optimal pressure distribution and effective anchorage to the limb.
- Single-sided steel stay with flexion (20°, 40°) and extension (0°, 10°) limitation
- Polymer stay with integrated unloader ring, for correct positioning of the brace
- Gel pad for additional protection against pressure from the thrust ring
- Padding for additional valve protection
- Velcro® strap adjustment

Size: measure circumference 15 cm above the mid-patella.

knee supports

VULKAN CLASSIC & AEROTHERM® TECHNOLOGY

The Vulkan Classic supports allow you the freedom to move.

It's unique Aerotherm® system is designed to provide the therapeutic benefits of **heat retention provided by neoprene**, while promoting air flow.

1. Vulkan® Knee Support 3029 / 3011

Contoured 3 piece design that provides a comfortable fit. Ideal for minor tendon and ligament injuries, sprains and twists. Does not restrict movement. Latex free.

Reference 3 mm Model 3029	Reference 5 mm Model 3011	Size	Knee circumference
003876XS	003873XS	XS	26 - 30 cm

Remote Control

Range of motion

From -10° to 120° of flexion.

The KINETEC SPECTRA™ range of motion allows treatment of most knee & hip pathologies. Anatomically correct alignment increases patient compliance and decreases joint stress.

Patient feedback & unique features

The digital remote control provides a precise yet clear feedback to the patient as well as helping the therapy with unique functions such as warm-up or by-pass.

Technical specifications

- Patient lock-out prevents accidental program changes and potential injury.
- Start/Stop and reverse are always available to the patient.
- Internally contained medical grade transformer eliminates handling extra components.
- 2-year full warranty.
- Type BF class II electrical device.
- **ROM knee:** -10° to 120°, **Hip:** 75° to 10°.
- **Foot positioning:** Plantar flexion: 40°, Dorsal flexion : 30°, Abduction/adduction: 30°
- **Speed:** 45° to 155° per minute.
- **Weight:** 12 kg without the case.
- **Size of the device:**
Length 95cm, width 33cm, height 33cm.
- **Patient size:** Full patient: 145 to 195 cm, User weight: 135 kg

Fitline®

2. ROM Walker

Walking boot with range of motion.

Indications

- Malleolar fractures conservative treatment
- Grade 3 ankle sprains
- Post-surgical care for osteosynthesis of malleolar fractures, ankle ligament reconstruction and Achilles tendon tenorrhaphy
- Walking recovery in consolidation delay of tibial fractures
- Charcot foot

Features & Benefits

- Structure made of durable, light plastic
- Non-slip rubber sole
- Inner padding of the sole made from non-toxic Evazote®
- Velcro® fastening tapes and struts with Velcro for padding grip
- Soft foam pad with double lining in brushed nylon for Velcro® grip
- Washable padding
- Range of Motion: 0° - 7,5° - 15° - 22,5° - 30° - 37,5° - 45°

4. Squared offload healing shoe

4

Indications

Minimizes pain and discomfort of plantar fasciitis and Achilles tendonitis.

Features & benefits

- Reduced 10% angle to minimize leg strain
- Removable insole
- Square toe design to accommodate the presence of K wires

Reference	Size	Width	Length
S-FIT-92-013-U1	XS	110 mm	240 mm

S-FIT-92-013-U4	L	115 mm	285 mm
S-FIT-92-013-U5	XL	120 mm	300 mm

5. Stepper Surg

Indications

For feet requiring stability and offloading after surgery (e.g. osteotomy of the foot, hallux valgus, etc.)

Features & benefits

SOLE

- The square toe design acts as a bumper to protect the toes
- Nonslip sole
- The removeable EVA insole can be adapted or replaced if necessary
- The stiff sole reduces pressure on the heel and forefoot.
- The rocker-style sole facilitates rollover when walking

UPPER

- Lightweight and breathable
- Heel counter for enhanced stability in the heel area
- Opens fully so is always quick and easy to don
- Pull-back Velcro® strap across the instep with D-ring and padding
- Buckle-free symmetrical fastening over the forefoot
- Low-profile design so no height compensation is required for the opposite leg

Opens fully for ease-of-use

Fitline

diabetic shoes

TECNICA DIABETIC SHOE LINE

It is one of the complications in patients with diabetes.

It consists of the progressive loss of sensitivity of the foot, which presents ulcers and skin alterations that must be kept under control.

If they don't heal, they can progress to foot muscle atrophy or a very serious infection that sometimes leads to amputation of the limb. The causes are found in the classic effects of diabetes itself, namely the narrowing of the arteries.

These are no longer able to supply blood to the lower limbs which therefore find themselves having a very reduced sensitivity and therefore being subject to the cold and to traumas or wounds that find it difficult to heal.

1. Plantar S-Cloud

The innovative S-Cloud insole allows to remove little squares in the lower part of the entire insole surface thanks to the pre-incision of the 6 mm Evaform.

The orthopedic technician will identify the squares to be removed in order to off-load immediately the pressures on the ulcerated area or at risk of ulceration, allowing to create a precise zone of unloading of the necessary size in a precise point.

The 3 mm self-modeling memory foam inside the insole, reduces the forces of the edges of the unloading area on the plantar area, distributing thus the body weight over a wider surface avoiding in this way pressure peaks.

Features & benefits

- The On-Steam coverage is breathable, antibacterial, antimicrobial, anti-odor and hypoallergic
- 3 mm self-shaping memory foam
- Modular inserts in Evaform with dimensions 10 mm x 10 mm, thickness 6 mm
- Adhesive base in fiber to stabilize the Evaform modules
- Washable by hand, maximum 30 degrees
- Available in version for Biomed shoe and DIAB shoe

Sold per piece

2. Tecnica Biomed

Indications

- Post-operative treatment of **hallux valgus** (minimal-invasive protocol).
- Protection of **bone structures** and **surrounding tissues** of the forefoot.
- Post-operative treatment after a **Morton's neuroma**.
- **Swelling and injury of the forefoot** that make wearing a shoe impossible.
- **Protection and support** of foot, toes and forefoot in an adequate position.

Features & benefits

- Lightweight shoe with an **ergonomic and wide fit**.
- Made to be easily worn with a cast or bandage.
- Highly adjustable thanks to the velcro strap.
- **Ambidextrous design**: can be worn left and right.

Sold per shoe.

diabetic shoes

4. Tecnica Heel

Indications

- Post-surgery rehabilitation and/or wounds or ulcers of the heel area
- Post-surgery fractures and/or calcaneus ulcers (second treatment) and ulcers at the insertion of the Achilles tendon
- Bursitis

Features & benefits

The balance of the weight is moved to the front of the foot thanks to the **unloading insole** and the outsole, which is designed to totally release the heel from the pressure load.

- Square shape offers space for bandages.
- **Movable rear-cover** to preserve the heel from impacts.
- **Non-slip outsole** to ensure safety.
- Total opening with velcro-straps.
- Removable insole.

Sold per shoe.

Reference	Shoe size

5. Tecnica DIAB

Indications

- (Diabetic) plantar ulcer
- Post-amputation rehabilitation (up to trans-metatarsal amputation)
- Post-operative rehabilitation or fractures of the tarsus
- Management of the chronic phase of Charcot's foot
- Malleolus fracture

Features & benefits

High and **lightweight** leg-foot brace allows the displacement of part of the load on the ankles and calves.

The outsole, thanks to the features of **movement control** and **pressure redistribution** decompresses the areas affected by the injury, improving significantly the ambulation.

The **difference in leg length remains limited** in comparison to other walking boots. High thermoformable stiffener.

- **Rigid, anti-flexion and rocking outsole.**
- **D-rings** for good closure.
- Variable volume.

Sold per shoe.

sorbothane®

Performance Insoles

MEDICAL PROFESSIONALS RECOMMEND SORBOTHANE.

Sorbothane insoles can help limit the trauma caused to a body during exercise, such as back problems, joint pain, tendonitis, fatigue fractures and knee pain. They help prevent and re-occurrence of old injuries and offer unrivalled comfort.

Shockwaves are created every time your feet strike the ground, causing damage to joints, muscles, ligaments and tendons.

Sorbothane's unique visco-elastic material mimics the characteristics of human flesh, and at the moment of impact changes shape to disperse shockwaves sideways.

- Unrivalled shock absorption
- 100% effective with every stride
- Up to 30% lighter
- Nano silver antibacterial technology for maximum comfort
- New cutting edge pack design

SORBOTHANE SHOCK STOPPER

- Anti-bacterial
- Suitable for all sports footwear
- Trim to fit lines
- Sold as a pair

1. Single Strike Shock Stopper

Ideally suited for **low shock** absorption sport & activities.

Ideal for activities where the heel is subjected to impact shock.

Replaces existing insole.

4. Sorbo-Pro Total Control

4

Indications

Ideally suited for maximum shock absorption sport & activities

Features & benefits

- Pronation control insoles with Sorbothane shock impact
- protection
- Suitable for all sports footwear
- Replaces existing insole
- Trim to fit lines
- Anti-bacterial

Sorbothane Reactor Pads

Highly-responsive, technical forefoot compound inlaid to compliment your foot's natural energy return during 'toe-off'.

Sorbothane Impact Protection

Sorbothane's unique shock absorbin compound contains a unique molecular structure that gives sustained cushioning with impact protection and unrivalled comfort.

Sorbothane Biofit Technology

Foot-related pain can affect the way you run, walk and stand, which can often lead to pain in your ankles, knees, hips end back. When your foundation is correctly supported, aligned and cushioned, it starts a chain reaction of pain relief throughout your entire body. Sorbo-Pro's carefully crafted insole geometry is central to achieving its biomechanical aim. The holds the heel in position after the foot hits the ground and the stabilising arc cradles the bones of the arch of the foot to reduce excessive foot pronation.

Sorbothane Total Control Topsheet

Sorbothane's total control anti-bacterial top system contains advanced nano silver technology to wick away moisture and provide maximum comfort.

Sold as a pair.

KINETEC Breva™

THE KINETEC BREVA™ PROVIDES ANATOMICALLY CORRECT MOVEMENTS FOR THE ANKLE AND REAR FOOT.

- Plantar Flexion 40° to Dorsiflexion 30°
- Eversion 25° to Inversion 25°
- Intuitive remote control with unique features

Reference	Product
4621006502	Kinetec Breva™

Inversion 25°

Eversion 25°

Anatomical and precise motion

The KINETEC BREVA™ enables ankle and rear foot motion in 2 dimensions from the most common plantar/dorsi flexion (-40° to 30°) to the more advanced eversion/inversion movement. (-25° to 25°).

Patient feedback and unique features

The digital remote control provides a precise yet clear feedback to the patient as well as it helps the therapy with unique functions such as warm-up or by-pass.

Safety First

The remote control features a keyboard locking system preventing misuse and enhancing patient safety.

Technical specifications

- Remote control dedicated storage place when the machine is not used or during transport.
- Possibility to block the adjustment of the parameters.
- Start/Stop and reverse are always available to the patient.
- Precise adjustment of the parameters of the movement: ROM, speed, pauses at the limit of extension or flexion, for improved outcomes.
- Load reverse ensures patient protection when excessive force is exerted on the joint.
- Supplied with washable hygienic pads.
- 2-year full warranty.
- Type BF class II electrical device.
- **Speed:** 50° to 150° per minute.
- **Weight:** 11 kg without the case.
- **Size of the device:**
Length 56 cm, width 37cm, height 45cm.
- **Foot sizing:** from 19 cm(7 Inch) to 29 cm (11 Inch)

pediatric braces

1. Ortho 14-310

Pediatric arm sling.

Indications

- Forearm and wrist support aid
- As support in cases of cast limb
- Useful if resting of the acromioclavicular (after a subluxation grade 1) or glenohumeral joint is required
- Useful in case of immobilisation of the upper arm with the elbow in flexed position

Features & benefits

- Structure made of cotton blended fabric
- Velcro® fastening
- Shoulder strap with neck protection padding

Reference

Size

OS-MOFT310 Universal size - length: 15,5 cm

2. Ortho 14-305

Pediatric immobiliser for arm and shoulder, with elbow support.

Indications

- Compound humerus fracture
- Glenohumeral subluxation
- Shoulder sprain
- Post-surgical care of humeral fractures and interventions on humeral subluxations
- Postoperative care of the long head of the biceps tendon

Features & benefits

- Cotton blend fabric sling
- Soft padded fabric immobiliser swathe
- Shoulder straps with Velcro® fastenings
- Elbow support

Reference

Size

OS-MOFT305 Universal size - length: 16 cm

3. Pediatric Uomosling

Pediatric strap arm sling.

Indications

- Appropriate for trauma at wrist, elbow or shoulder
- Arm support in combination with a cast

Features & benefits

- Non-stretch foam maintains position of the limb
- Wide, soft foam distributes pressure evenly
- Attractive blue colour does not dirty easily
- 28 included Y-tab Velcro fasteners

Reference

Size

LS4103P Universal size - 4 cm x 12 m

1. Ortho 14-100

Pediatric soft foam cervical collar.

Indications

- Slight cervical spine distortions (whiplash)
- Stiff necks
- Neck-induced vertigo

Features & benefits

- Core made of semi-rigid foam
- Tubular jersey cover
- Velcro® fastening at back of neck
- X-ray transparent

Reference Size

OS-MOFT100 Universal size

2. Ortho 14-105

Pediatric bivalve cervical collar with tracheal hole.

Indications

- Medium severity to severe distortion of the cervical spine (whiplash)
- Multiple discopathies of the cervical spine
- Cervical spine traumas
- Pathological instability as a result of cervical spine metastases
- Support of Post-surgical spinal surgery care

Features & benefits

- Non-toxic PLASTAZOTE® structure
- Consists of two enveloping valves with Velcro® closure
- Central front and back rigid support plates
- Radiolucent
- Shaped for perfect fit at chin, neck and shoulders
- Trachea hole

Reference Size

OS-MOFT105 Kids 0-3 years

OS-MOFT105P Kids 4-9 years

pediatric braces

1. Aspen Pediatric Cervical Collar

Unlike most paediatric collars which are simply smaller versions of an adult collar, Aspen® Paediatric Collars were designed with input from nurses to meet the unique needs of children.

Patented features allow these collars to automatically conform and cradle the unique anatomy of the paediatric patient without excessive pressure on their fragile skin.

Integrating innovative features of the Aspen Collar helps ensure the balance between motion restriction and gentle care is achieved.

Indications

- Decompressive procedures
- Fracture management
- Cervicogenic headache
- Cervical disc syndrome
- Postsurgical stabilization
- Musculoskeletal pain
- Trauma / whiplash
- Sprains / strains
- Radiculopathy

Features & benefits

- Safe for the delicate skin
- Gentle by design
- Effective motion restriction

Take care feel better

1. Wheaton Pavlik Harness

Positions the baby's hips in a controlled flexion and abduction.

Indications

- Dysplasia with infants
- Hip luxation and subluxation

Features & benefits

- Movement freedom prevents necrosis of the femur head
- Hook and loop closure can be fixed fast and securely
- Colour-coded straps facilitate application for parents

Reference	Size	Chest circumference
L1620-XS	XS	< 35,56 cm

L1620-XL	XL	> 53,34 cm

2. Ortho 14-700

Pediatric knee immobilizer

Indications

Immobilisation with knee in extension position (post-surgical or post-trauma care)

Features & benefits

- Structure made of double-lined soft foam
- Internal lining in terrycloth
- Rigid but moldable medial, side and back rods made of light metal alloy
- Adjustable supporting plates, inside and lateral
- Patella opening

Reference	Length	Thigh circumference

OS-MOFT700/3	30 cm	33 - 45 cm

3. Ortho 14-800

Pediatric bivalve ankle brace

Indications

- Grade 2 and 3 sprains
- Functional recovery phase after surgical treatment
- Functional recovery after malleolar fractures
- Chronic instability of TT and sporting activity

Features & benefits

- Double-lined foam padding
- Anatomically shaped lightweight durable plastic bivalve structure
- Velcro® adjustment fits any heel width
- Easy to wear thanks to full opening

Reference	Size
OS-MOFT800	Universal size

pediatric braces

1. Ortho 14-805

Pediatric walker

Indications

- Conservative treatment of malleolar fractures
- Severe sprains grade 3
- Post-surgical phase after osteosynthesis of ankle fractures, stabilisation of ligament injuries of the ankle and Achilles tendon
- Stable foot, ankle, tibia and distal fibula fractures

Features & benefits

- Structure made from lightweight, durable plastic
- Non-slip rubber sole
- Inner padding of the sole is made from non-toxic Evazote®
- Struts held in place with Velcro® for a firm grip on the padding
- Soft foam pad with double lining in brushed nylon for Velcro® fastening
- Velcro® fastening straps

terms & conditions

Article 1 – Validity

a) These general conditions apply to every offer made by Moovartes BV, Toekomstlaan 16, 3660 Genk (Belgium), with enterprise number 0433.793.403, Antwerp Register of Legal Entities (RPR), Tongeren division ('Moovartes') and to every agreement entered into between Moovartes and every natural person or legal entity that purchases products from Moovartes for professional purposes (B2B context) or private purposes (B2C context) ('the Customer'), including every order, with the exception of offers and/or orders that the Customer places online on, or agreements entered into through Moovartes' webshop (<https://www.moovartes.com>), to which the general conditions stated there apply.

b) By entering into an agreement with Moovartes and provided that the general conditions were previously made available to the Customer, the Customer acknowledges to be aware of and fully accept these general conditions of sale of Moovartes ('the Conditions'). By entering into an agreement with Moovartes, the Customer expressly waives their own conditions and acknowledges the exclusive effect of these Conditions, unless Moovartes gives its prior, express and written consent to the Customer's conditions. The Customer is expressly informed that the Conditions may change in the future. The Customer is therefore deemed to have read, accepted and approved the Conditions prevailing at that time. However, in a B2C context, the Customer is bound only insofar as Moovartes has given express notice of any amendments to the general conditions.

c) Insofar as Moovartes uses any special conditions and/or deviating provisions in an offer, quotation or agreement, those provisions take precedence over the current Conditions and the current Conditions will then fulfil a supplementary function. Deviations and/or additions to these Conditions are valid only if and insofar as Moovartes has expressly accepted them in writing. If Moovartes has accepted such deviations and/or additions, these Conditions retain a supplementary effect.

Article 2 – Offer - orders

a) Unless expressly agreed otherwise in writing, all offers and/or quotations are without obligation and do not bind Moovartes. Once the Customer clearly and unambiguously places an order with Moovartes in writing (by email, fax or ordinary post), they are bound by their order. An agreement with Moovartes is formed only when Moovartes confirms in writing that it accepts the Customer's written request.

b) Unless Moovartes consents in writing, the Customer cannot cancel an order that Moovartes has accepted. Failing this, Moovartes has the right to charge the Customer fixed compensation of 30% of the order amount (including VAT), notwithstanding Moovartes' right to prove and claim its actual damage suffered. In a B2C context, the fixed compensation amounts to 20% of the order amount, which also applies by analogy in favour of the Customer if Moovartes cancels the order.

Article 3 – Prices

Unless stated otherwise, prices are quoted in euros, based on delivery 'ex works' (Incoterms 2020) and exclude VAT (B2B context) / include VAT (B2C context), customs or import duties and other taxes. If wages, social security contributions, corporation tax, import tariffs, and so forth increase, or exchange rate fluctuations of both domestic and foreign currencies occur, after the agreement is concluded, even if this happens because of a circumstance that was already foreseeable when the offer was issued, these increases may be passed on to the Customer. Moovartes will inform the Customer of this increase immediately and the Customer will then have the option to terminate the Agreement. Moovartes reserves the right to correct mistakes or errors in its quoted prices.

Article 4 – Delivery conditions

a) The delivery periods that Moovartes specifies are purely indicative and are in no way binding on Moovartes unless it expressly states otherwise in writing. The Customer acknowledges and accepts that the delivery of the products is subject to the availability of the products and accessories on the market. If delivery is late, this will not give rise and/or entitlement to compensation, cancellation of the order or termination of the agreement.

b) Risk due to loss or damage passes to the Customer ex works (Incoterms 2020). Transport is always the Customer's responsibility, even if the goods were sold carriage paid to place of destination.

c) Delivery carriage paid is only possible from EUR 125 (excluding VAT).

d) Shipping costs: EUR 17 (excluding VAT) for an order amount less than EUR 125 (excluding VAT).

e) The Customer accepts that the delivery details of the postal/courier service then apply to determine the date of delivery. The Customer is deemed to have taken delivery of the goods on the date that the postal worker/courier presented themselves for delivery at the delivery address, as stipulated in the delivery details of the postal/courier service.

f) In this case, the Customer must somehow check the parcel and the order on delivery. If the Customer notices visible damage on delivery, they must have it recorded on the consignment note within 24 hours, before signing for receipt. The Customer's acceptance of the products without reservation covers any possible defect or non-conformity that could then be identified.

Article 5 – Invoicing and payment

a) Unless agreed otherwise in writing or stated on the invoice, Moovartes' invoices are payable at its registered office within eight days of the invoice date. The Customer is not entitled to demand any discount, to apply setoff, or to withhold an amount for any reason.

b) Notwithstanding the exercise of other rights available to Moovartes, if the Customer fails to pay or pays late, they will be liable to pay the agreed default interest on the outstanding amount at the rate stipulated in Article 5 of the Belgian Act on Combating Late Payment in Commercial Transactions of 2 August 2002, as from the due date of the invoice by operation of law and with no notice of default. The Customer will also be liable to pay fixed compensation of 20% on the outstanding invoice amount (including VAT), subject to a minimum of EUR 40 per invoice, by operation of law and with no demand. If an invoice is unpaid or only partially paid on the due date, or if the Customer fails to comply with any of its other obligations, Moovartes reserves the right, by operation of law and with no notice of default, to suspend performing all agreements with the Customer or to terminate them with immediate effect, with no need for any judicial intervention, and to demand immediate payment of all debts, even those not yet due, or to make deliveries only against cash payment, notwithstanding previous agreements and without prejudice to any other right that Moovartes can assert. The provisions of this Article 5 b) apply by analogy and solely in a B2C context in favour of the Customer with respect to Moovartes if Moovartes does not comply with its obligations, except in case of force majeure.

c) Moovartes may demand that the Customer provide sufficient guarantees to prove their solvency at any time after concluding the agreement.

d) At the risk of forfeiting their rights, and notwithstanding the other provisions of these Conditions, the Customer must submit any complaint about an invoice by registered letter to Moovartes no later than eight days after the invoice date, failing which the invoice will be deemed to have been accepted in full.

e) If the agreement relates to the rental of Kinetec devices and invoices are unpaid or only partially paid on the due date, the Customer must immediately, and within no more than 24 hours, return the Kinetec device and iPad to Moovartes in their original condition and in the original, undamaged packaging.

Article 6 – Retention of title

a) The delivered products remain Moovartes' exclusive property until the price and additional services, including any penalty clauses and interest, have been paid in full. The Customer undertakes, where necessary, to point out Moovartes' retention of title to third parties, for example anyone who tries to attach the products that have not yet been paid for in full. The Customer also undertakes to keep and maintain the products in good condition until the price has been paid in full.

b) If the Customer fails to meet their payment obligations or Moovartes has serious cause to believe that the Customer will not meet those obligations, Moovartes will be entitled, with no form of notice of default or any judicial intervention, to retrieve/repossess the products delivered under retention of title and to do so at the Customer's expense. Late payment of an invoice constitutes serious cause to believe that the Customer will not fulfil their obligations and entitles Moovartes to immediately suspend performing its services and to repossess the products subject to its retention of title. The Customer irrevocably authorises Moovartes to enter the place where those goods are located and to physically retrieve/repossess those goods, or if mounted on movable or immovable property, to dismantle and retrieve/repossess those goods.

Article 7 – Intellectual property

Drawings, technical descriptions, designs and calculations made by Moovartes or on its instructions remain Moovartes' property. These items may not be made available or shown to third parties with a view to obtaining a comparable quotation. They also may not be copied or otherwise reproduced without Moovartes' express written consent. The documents, plans and descriptions form an integral part of the agreement.

Article 8 – Complaints

a) To be admissible, complaints other than those mentioned in Article 4.f regarding the quality and/or quantity of the delivered products must reach Moovartes by registered letter: (a) in case of a complaint regarding a non-conforming delivery when inspection is not possible as provided in Article 4.f, immediately after the delivery (or within 24 hours at most); (b) in case of a complaint regarding a non-conforming invoice, within three (3) days of receipt of the invoice; and (c) in case of hidden defects, within sixty (60) days of the Customer discovering the defect or of when the Customer could reasonably have made the discovery. However, to be admissible in a B2C context, complaints regarding the quality and/or quantity of the delivered products must reach Moovartes by registered letter within these periods: (a) in case of a complaint regarding a non-conforming delivery when inspection is not possible as provided in Article 4.f, immediately after the delivery (or within five (5) days at most); (b) in case of a complaint about a non-conforming invoice, within seven (7) days of receipt of the invoice; and (c) in case of hidden defects, within sixty (60) days of the Customer discovering the defect or of when the Customer could reasonably have made the discovery. Failing this, the Customer will forfeit their rights. Notwithstanding the foregoing, Moovartes can be held liable for hidden defects only (i) if it is shown that the defect was already present at the time of collection and/or delivery, and (ii) provided that the defect manifests itself

within twelve (12) months of the delivery date.

b) Defects caused by accidents, negligence or misuse (by the Customer personally or by third parties) are not covered by the warranty. The warranty also ceases to apply if the Customer and/or third parties have made adjustments to or carried out work on the products.

c) Unless Moovartes and its employees and/or agents act intentionally and/or are grossly negligent, Moovartes will never be liable for trading loss, indirect loss, and/or consequential loss (such as, but not limited to, loss of time, emotional damage, loss of income, and loss of an opportunity), which would directly or indirectly result from the products sold or be related to them. Moovartes is not liable for damage arising as a direct or indirect consequence of force majeure, errors and/or omissions of the Customer and their legal or actual employees, or any other external cause. Any contractual or non-contractual liability and/or obligation of Moovartes is always capped at the amount actually paid by the Customer for the order concerned, excluding VAT.

Article 9 – Force majeure

a) If the performance of Moovartes' obligations becomes impossible or more difficult, expensive and/or time-consuming than foreseen at the time of the Customer's purchase, Moovartes may suspend performing the Agreement for the duration of the force majeure event or definitively terminate the Agreement by means of a written notice to the Customer, without owing any compensation. If the period of force majeure lasts longer than six (6) months in a B2C context, the Customer may terminate the agreement free of charge.

b) Force majeure is any circumstance beyond Moovartes' will and control that prevents it from performing all or part of its obligations. Moovartes defines force majeure as including strikes, fire, operational disruptions, energy failures, failures in a telecommunications or other network or connection, in the communication systems used, measures imposed by the government, a lockdown, pandemic, war, a failure to deliver or late delivery by suppliers, and so forth.

Article 10 – Invalidity – waiver

If any provision of these Conditions is declared invalid, illegal or void, this will in no way affect the validity, legality and applicability of the other provisions. If Moovartes fails to enforce any of the rights summarised in these Conditions or to exercise any associated right at any time, this will never be construed as a waiver of such provision and will never affect the validity of such rights.

Article 11 – Protection of privacy – GDPR

The Customer's personal data will be processed in accordance with Moovartes' privacy notice: <https://www.moovartes.com/pagina/klantendienst/privacy-policy/> (in Dutch).

Article 12 – Disputes

a) Only Belgian law, to the exclusion of the rules of private international law, applies to all agreements concluded by Moovartes.

b) Only the Antwerp Enterprise Court, Tongeren division has jurisdiction to hear any disputes regarding the conclusion, validity, interpretation, performance or non-performance of the Agreement or of these Conditions, notwithstanding Moovartes' right to summon the Customer to appear before the competent court for their place of residence or registered office. In a B2C context, the courts of the Customer's place of residence have jurisdiction.
