

HELIX® 3033

Innovation intertwined with safety. That's the DNA of the Helix® Food Safe Series. The Helix® 3033 features a specialized plaited knit with 13-gauge polyester fibers engineered to stay intact, thereby preventing any glove particles from contaminating food, and an inner HPPE/ fiberglass blend for added comfort and level A6 cut protection.

The 3033 is food-safe and can be used by itself or as an underglove (with an appropriate top-glove solution).

HexArmor® products are cut and puncture resistant, NOT CUT AND PUNCTURE PROOF. Do not use with moving or serrated blades or tools. User shall be exclusively responsible to assess the suitability of the product as specified for any individual application or use. Protection zones are to be used as a general guide. Actual product protection zones may differ. Product features, design, protection zones subject to change. Protected by patents and patents pending.

*HexArmor products are tested to certain FDA requirements; however, they are not certified for comprehensive FDA food-contact compliance. When handling food directly, users are recommended to use a fully FDA-tested disposable nitrile or rubber over-glove. It is the responsibility of the end user to verify that the selected glove configuration is suitable for their specific application and intended use.

UVEX SAFETY GROUP GmbH & Co. KG, parent company of HexArmor®, has achieved a Gold EcoVadis Rating, placing us in the top 5% of sustainable suppliers globally.
