

Certificate of Compliance

This statement is to certify that the ingredients used in manufacturing this product(s) are compliant with FDA Code of Federal Regulations Title 21 and can be used in Industrial / Household applications where contact with food may occur.

In manufacturing the product(s), we have sourced FDA-compliant materials. In addition to sourcing safe ingredients, our manufacturer's processes are carried out in accordance with audited international standards to ensure consistent quality at the point of delivery with the objective of providing reliable performance of product and protection for the user.

The finished products, if stored in original packaging under recommended conditions, complies with the regulations mentioned above. Any subsequent changes (for example, contamination due to actual condition of use, use of organic solvents or storage under unfavorable conditions) are out of the scope of this standard.

This statement is issued based on currently applicable FDA requirements for intermittent food contact.
