

Sellstrom Long Life Clear Cover Plate

Specification & Data Sheet

Part Number	S19004
Description and Performance	Clear CR-39 Cover Plate provides protection from pitting and scratching. Made of durable, heat resistant material containing CR-39 Monomer. Patented CR-39 allyl diglycol carbonate monomer combines the optics of glass with the durability of a thermoset material. The benefits are clear. Lenses made from CR-39 monomer stand up to scratches, heat and household chemicals; has less chromatic aberration than polycarbonate lenses; are lightweight and less prone to shattering than glass. (Not to be used for Impact Plate.)
Standards Compliance	
Dimensions	Meets ANSI Z87.1 Standards and Federal Specs GGG-H-21 I D
Optical Properties	Cover Plate: 4-1/2" X 5-1/4" Refractive Index Value-1.498
Plate Thickness	Abbe Value-59.3 Density-1.31 g/cm ³ .060
Country of Origin	Made in China
