

45" ALUMINIZED CARBON PARA-ARAMID BLEND COAT

Radiant Heat Protection • Molten Metal Protection • High Heat and Foundry Applications

FEATURES

- Made from 19 oz. aluminized carbon para-aramid blend
- 45" length
- Stand up collar lined with green FR cotton
- Snap closure with leather pull tabs

FABRIC DATA & CERTIFICATIONS

ASTM F955

IRON SPLASH

NO BURN

ALUMINUM SPLASH

NO BURN

EN ISO 11612

C1 C2 C3 **C4** RADIANT HEAT

D1 **D2** D3 ALUMINUM SPLASH

E1 E2 **E3** IRON SPLASH

#602-ACK

Aluminized carbon para-aramid blend combines the strength, flexibility, heat resistance, and cut and abrasion resistance of carbon para-aramid blend, with the radiant heat protection of aluminized protective fabrics. The base fabric is a blend of para-aramid fiber and a carbon yarn. On its own, para-aramid blend is best known for its strength, excellent resistance to cuts and abrasions, and high contact heat. The carbon core further adds to the fabric's durability and chemical resistance, while also providing more flexibility and softness. Aluminized carbon para-aramid blend displays outstanding performance in tests for the EN ISO 11612 and ASTM F955 certifications. It resists both molten aluminum and iron splash, and achieves the highest classification for radiant heat protection.
