# DAS GROSSE GYN BUCH

Selbstbewusst für  
den eigenen Körper entscheiden

Sex, Zyklus, Wechseljahre  
aus weiblicher Sicht  
neu verstehen

Krankheiten erkennen  
und therapieren

Insel

# Contents

## 10 **Gynaecology · A conservative discipline**

---

- 13 Internalised misogyny
- 15 My path to gynaecology
- 19 Patriarchal structures disadvantage everyone

## Our Bodies

What they can do, what they need, and what gives them pleasure

## 22 **Mirror, mirror in my hand · The anatomy of vulva and vagina**

---

- 27 How do I look after my vulva?
- 28 Is vaginal discharge normal?
- 29 Wrinkles, hair, size: How beautiful is my vulva?

## 32 **The clitoris · The great (!) unknown**

---

- 33 Understanding the clitoris
- 35 The story of the discovery of our pleasure organ

## 38 **Enjoying a fulfilled sex life**

---

- 43 From A to G-spot: the erogenous zones of the vulva and vagina
- 45 The female orgasm in the lab and in science
- 48 The desire to come
- 53 Masturbation: healthy, beneficial, and beautiful

## 56 **The pelvic floor · What holds us together on the inside**

---

- 59 Testing and training the strength of our pelvic floor muscles

## 62 **The hymen myth · The history of an illusion**

---

- 66 Bleeding during vaginal penetration (for the first time)

## 68 **All about breasts**

---

- 69 Why they are political
- 71 Evolutionary significance and the anatomy of the breast
- 73 The nipple
- 74 “Breast awareness”, tension, pain, and cysts
- 75 The bra

# Issues & Phases

## in our lives

### 78 **My gynaecologist and me · The general practitioner for women's health**

---

79 As a young girl

80 Finding the right gynaecologist

84 An examination at the gynaecologist, or: it's not all about the vagina

87 Queer people in gynaecology and obstetrics

### 90 **Your cycle · It pays to know it well**

---

91 **The starting point: menstruation**

- From pads to cups: menstrual products
- When it doesn't come, is too heavy, or too painful: menstrual disorders

103 **The maturation of the ovum: the follicular phase**

105 **Better than its reputation: the luteal phase**

- PMS – or how women are declared fundamentally ill

111 Using the phases of your cycle to your advantage

### 113 **Contraception · An unfairly shared burden**

---

114 How is the Pearl Index calculated?

115 Coitus interruptus (the pull-out method)

115 **Condoms and female condoms: also protect against sexually transmitted diseases**

116 **Natural family planning: hormone-free and versatile**

- The Knaus-Ogino or calendar method
- The symptothermal method: contraception based on basal body temperature and cervical mucus

119 Sterilisation

120 **The Pill**

- Taking a break from the pill
- Side effects: thromboses, depression, loss of libido
- Who does the pill suit?

128 **Contraceptive injections**

129 **Intrauterine devices: the coil and its younger siblings**

131 **Three weeks at a time: the vaginal ring**

131 **Under the skin: hormonal implants**

132 **Post-coital contraception: the “morning-after pill”**

133 **Contraception for men**

- Vasectomy: cutting the vas deferens
- Vasalgel
- Vasal control valves
- Testicular warming

135 **The contraception of the future**

### 136 **Sexual harassment and violence · Only yes means yes**

---

139 **What can I do after a sexual assault?**

### 144 **Fertility and Family Planning · Conceiving**

---

145 **Is becoming a mother a default setting?**

148 **I want to get pregnant**

- Anti-müllerian hormone and other indicators
- Can I boost my fertility?
- Having sex to conceive: When, how often, and does doing a headstand afterwards help?

155 **Getting pregnant after the pill: post-pill amenorrhoea**

156 **Medical and social freezing: cryopreserving oocytes**

158 **What can I do if I have trouble conceiving?**

- Endometriosis and fertility
- Progesterone, the corpus luteum hormone
- Clomiphene
- hCG
- Artificial insemination
- In vitro fertilisation (IVF) and intracytoplasmic sperm injection (ICSI)

164 **If you can't conceive**

166 **Pregnancy · An utterly normal exception**

.....

167 **Egg meets sperm**

168 **Different kinds of indicators**

170 **How the weeks of pregnancy and due date are calculated?**

171 **Dos and don'ts**

- Alcohol and "non-alcoholic" drinks
- Nicotine: a harmful substance
- Coffee: a question of moderation
- Medication: inform yourself
- Cosmetics and plasticisers
- Sex is good
- And so is exercise
- Travel: absolutely, but maybe think about the destination
- Job: your employer has a duty
- Highly recommended: vaccinations against whooping cough and influenza
- Food: about toxoplasmosis, listeria, and what's healthy

184 **Cytomegalic inclusion body disease (CIBD)**

185 **Vomiting and morning sickness**

188 **An ode to the midwife**

- From a wise and knowledgeable woman to a Master's in midwifery
- Care and support throughout the entire journey – before, during, and after the birth

192 **Prenatal diagnostics: Ultrasound and blood tests**

- First trimester screening: detailed diagnosis in the early stages
- NIPT: non-invasive prenatal testing to detect trisomy-related chromosomal abnormalities
- Late-term detailed diagnosis methods
- The final ultrasound before birth
- Group B streptococcal infections

198 **Gestoses – pregnancy-related illnesses and complications**

- Pre-eclampsia
- HELLP syndrome
- Gestational diabetes

203 **The baby is coming (early?)**

- Cervical insufficiency and premature labour
- (Prelabour) rupture of membranes

208 **Childbirth · An existential situation**

.....

209 **Preparing for labour: What can I do?**

- From the classic methods to hypnosis and mindfulness
- I'm scared! Birth and the psyche
- In your living room, at a birthing centre, or (midwife assisted) in the delivery room – Where should I have my baby?

215 **How do we want to give birth?**

- It's moving in the right direction – but slowly

220 **Here we go!**

- The latent phase and dilation phase
- The pushing phase
- Pain relief: from acupressure to electrostimulation and the epidural

225 **(Elective) caesarean section: C-section**

- Before and after labour starts
- What happens after the operation?
- Debates surrounding C-sections

231 **Different foetal positions: Head down, face up, breech presentation, transverse presentation, shoulder dystocia**

- Head down, face up
- Breech presentation
- Transverse presentation
- Shoulder dystocia

233 **Immediately after the birth of the baby**

- Delayed clamping and cutting of the umbilical cord
- Birthing the placenta
- Bonding with the baby

235 **The post-partum period · Arriving home and hormonal changes**

---

236 **The initial phases**

- Week one
- Week two
- Week three
- Weeks four to eight

239 **Is it just the baby blues or postpartum depression?**

- Preventative measures: quality sleep, understanding, and good nutrition

241 **Infant nutrition**

- Breastfeeding your baby
- Breastfeeding as a method of contraception
- Formula and pumping breast milk

246 **Sex after childbirth**

249 **Miscarriages**

---

250 **Bleeding during pregnancy – not always a sign of an impending miscarriage**

251 **Anembryonic gestation or a blighted ovum pregnancy**

252 **Ectopic pregnancies – in the fallopian tube or the abdomen**

- Clinical symptoms
- Treatment of an ectopic pregnancy in the fallopian tube
- PUL: a pregnancy of unknown location

256 **A “missed miscarriage” – and what to do next**

- Option 1: Wait and see
- Option 2: Medication
- Option 3: Surgery

260 **Complications: Septic miscarriage and Asherman's syndrome**

260 **After the miscarriage**

261 **Dealing with the loss**

263 **Antibody therapy and preventing Rhesus disease**

265 **Dealing with recurrent miscarriages**

266 **Late miscarriages and stillbirths**

268 **Deciding to terminate a pregnancy**

---

271 **Dealing with an unwanted pregnancy**

- Medical abortion
- Phone-assisted abortion
- Surgical abortion

275 **After the procedure**

276 **Late terminations and foeticides**

278 **Menopause and beyond · A powerful phase of life**

---

279 **One phase of life – many questionable connotations**

- Different names for one phase of life

284 **Everything is changing: What's going on inside your body?**

- Pre-, peri- and post-menopause: various stages of a transformation
- When the change comes early

289 **Menopause and the reproductive organs**

- The ovaries: still important, even after menopause
- The uterus: from turmoil to calm
- The breasts: extensive changes

290 **Hot flashes and other symptoms**

- Hot flashes – what causes them and what you can do about them
- HRT – a cure-all?
- Weak pelvic floor muscles and the consequences
- Osteoporosis
- Dryness in the vulva and vagina
- Not only hormonal: sleep disorders
- Depression and depressive moods

307 **Partnership and sexuality: different and stronger**

308 **Finding joy in aging**

# Sickness & Health

## Prevention, protection, and treatment

### 312 **Prevention · Always a good investment**

312 Joyous and tragic events – and everything in between

313 Illnesses often have more than one cause

314 Prevention: staying one step ahead of disease and illness

### 316 **Healthy living · Especially for women**

316 Negative and positive influences

- Nicotine: really nasty stuff
- Alcohol: preferably as little as possible
- Hard drugs: not a good idea
- Harmful, but sometimes useful: cannabis
- Nutrition, weight, and exercise: small changes can make a big difference

326 What else affects your health?

- Stress
- Psychological factors
- Sex, desire, and sensuality

### 330 **Fibroids, endometriosis, and other non-cancerous conditions**

330 Fibroids – lumps in the muscles of the uterus

- Growing? Dormant? Fibroids are not always predictable
- Treatment: When is it necessary, and what are my options?
- Sometimes unavoidable: surgery
- Alternative therapies
- From nutrition to green tea: preventing fibroids

346 Polyps – growths on the inner walls of the uterus

346 Endometriosis – a mysterious illness developing under the veil of secrecy

- Still a mystery today: How does endometriosis develop?
- What forms does it take?
- Constantly changing: how the condition progresses
- Typically a long journey: diagnosis and treatment
- Minor acts of self-management

358 System errors: benign ovarian conditions

- Ovarian cysts
- Polycystic ovary syndrome (PCOS)

### 369 **UTIs, fungal infections, and inflammation in the genital area · When our natural defences are compromised**

369 A bacterial barrier: the microbiome of the vulva and vagina

- When the microbiome gets out of balance
- How to promote beneficial bacteria

373 UTIs and cystitis

- Using heat, tea, and simple sugars: prevention and treatment
- Getting vaccinated

377 Fungal infections

379 Bacterial vaginosis

### 381 **Sexually transmitted diseases · Making a big comeback**

384 HIV

- The course of the illness
- Preventing infection: pre-exposure prophylaxis (PrEP)
- In case of emergency: post-exposure prophylaxis
- Treating HIV
- HIV and pregnancy

390 **Syphilis**

- The four stages of the disease
- Treatment: the sooner, the better

394 **Gonorrhoea**

- Treat early to protect the fallopian tubes
- Prevention – actually quite simple

396 **Other sexually transmitted diseases we should protect ourselves against**

- Chlamydia
- Genital herpes
- Trichomoniasis
- Hepatitis A, B, and C

401 **Cancer · Finding a tailored treatment plan**

---

405 **What is cancer?**

408 **From surgery to antibodies: the most important treatment methods**

- Surgery
- Chemotherapy
- Radiotherapy
- Chemoradiotherapy
- Therapies involving the immune system
- Hormone therapy
- Supportive care
- Alternative approaches

419 **Recovery**

420 **Breast cancer**

- Active prevention, countering risk factors, improving chances of recovery
- Prevention and diagnosis
- Breast cancer in the history of medicine
- Forms of breast cancer
- At the cutting edge of research: new breast cancer therapies
- Future prospects

446 **Ovarian cancer**

- Difficult to detect
- A major decision: preventive measures for people with gene mutations
- Ovulation as a risk factor
- Symptoms that suggest ovarian cancer
- Therapy
- Prospects for a cure

454 **Endometrial cancer**

- Symptoms and diagnosis
- Therapy: targeted surgery is often enough
- Genetic factors also play a role
- Risk factors and preventative measures

457 **Cervical cancer**

- The role of the human papilloma virus (HPV)
- Nicotine as a risk factor
- Early detection: Pap smear, screening, and other methods
- Diagnosis and treatment

468 **Vulval cancer**

- Self-examination – an effective means of early detection
- Diagnosis and treatment

472 **The future of gynaecology · Independent and digital**

---

476 **Index**

483 **A selection of relevant literature**

494 **Acknowledgements**
