Re: Report # 2025-02168 – SnapNrack TopSpeed Universal rail-less Solar Photovoltaic Racking System
Subject: Engineering Certification for the State of Mississippi

PZSE, Inc. – Structural Engineers has provided engineering and mounting tables for the SnapNrack TopSpeed Universal Rail-less Racking System, as presented in PZSE Report # 2025-02168, "Engineering Certification for the SnapNrack TopSpeed Universal Solar Photovoltaic Racking System". All information, data, and analysis therein are based on, and comply with, the following building codes and typical specifications:

- Building Codes:
1. ASCE/SEI 7-16, Minimum Design Loads for Buildings and other Structures, by American Society of Civil Engineers
 2. 2021 International Building Code, by International Code Council, Inc.
 3. 2021 International Residential Code, by International Code Council, Inc.
 4. AC428, Acceptance Criteria for Modular Framing Systems Used to Support Photovoltaic (PV) Panels, November 1, 2012 by ICC-ES
 5. Aluminum Design Manual 2020, by The Aluminum Association, Inc.
 6. ANSI/AWC NDS-2018, National Design Specification for Wood Construction, by the American Wood Council

Design Criteria:

Risk Category II
Seismic Design Category = A - E
Basic Wind Speed (ultimate) per ASCE 7-16: up to 180 mph
Ground Snow Load = 0 to 90 (psf)

This letter certifies that the loading criteria and design basis for the SnapNrack TopSpeed Universal Rail-less Racking System Span Tables are in compliance with the above codes.

If you have any questions on the above, do not hesitate to call.
