## “ An Unforgettable Experience

Our trip to Cambridge was one of the highlights of the Futura course. It was not only a fun day out, but also an inspiring experience that made me think more deeply about studying English and preparing for the Cambridge exam.

We started the day with a relaxing train ride to Cambridge. When we arrived, we had a guided tour of the city and the school. I was really impressed by the beautiful architecture and the historic atmosphere. Walking through the old streets, seeing the famous colleges, and hearing about their traditions made me feel like I was in a different world. The guide told us interesting stories about Cambridge University and it made learning fun.

After the tour, we had some free time to explore the city on our own. Some of us went shopping, others just relaxed.

What I liked most about the trip was how real everything felt. Being there in person made it even more exciting and meaningful. It gave me extra motivation to study for the Cambridge exam because now I feel more connected to the place and its history. It reminded me that learning English isn't just about grammar and vocabulary, it's about discovering new cultures and opening doors to the future. All in all, the trip to Cambridge was a great experience. I had fun with my classmates, learned a lot and came back with new energy to study. I'm very thankful I got to be part of it.
