Welcome to the Next Evolution of Inventory Management
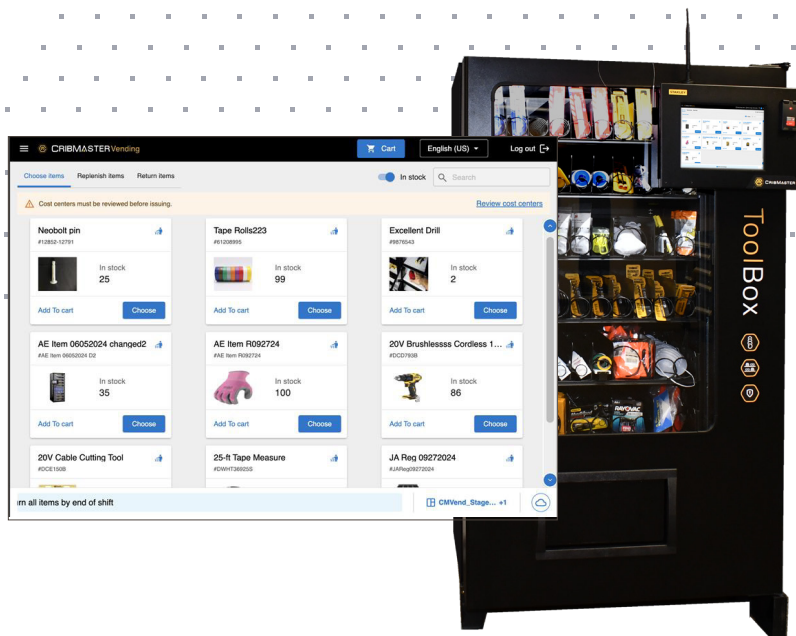

CribMaster Vend

Our Cloud-based vending application CribMaster® Vend improves security and ease of management by integrating with CribMaster Cloud. This enables real-time inventory control and drives our popular ToolBox and ProLock vending devices. The simplified user interface reduces transaction times and increases employee efficiency.

StanleyBlack&Decker

CribMaster Vend

Our CribMaster Vend software features new functions for enhanced control and convenience.

Key Features

Authentication
Simple badge access features on-machine badge scanning & User ID based authentication.

System Security
Secure by default using Microsoft® Azure as our Cloud provider.

Reporting
Automated reporting from CribMaster® Cloud. Features the ability to filter and export data in multiple formats (CSV, PDF, XLS, XML, etc).

Content Management
Upload item images from a mobile device to CribMaster® Cloud. Optimize item search with advanced filtering

User Interface
CribMaster Vend offers an intuitive user experience to simplify training and on-boarding.

Cloud-Based Management
Powered exclusively by CribMaster® Cloud software - a cross platform browser based administrator application.

Inventory Management
Real time data sync with CribMaster® Cloud (under 2 seconds) gives visibility into asset usage. Specifically designed for distributor CMI/VMI applications.
