# About

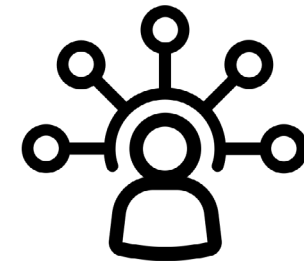

## Composer in all styles

With a background in **classical music harmony** (quartet and orchestra), as well as **jazz** and **DAW**, I compose and produce music in a variety of styles.

## Specialisation

I specialise in **custom sound design**, tailored carefully to your project.

## Experience

My professional experience in PR and **communications** gives me a strong understanding of how to create content that sends a message.

## Simple = Effective

To **have a strong impact** on listeners, I create music that's simple and accessible.

## Independent production

I can deliver **every step of the production process** in my personal studio, giving me complete control over the final product. I also work with a large network of musicians.

## Engagement

I'm there to advise you **throughout the project**: before, during and after delivery.
