I've just completed three years at Perth UHI obtaining my Bachelors of Science degree in Sound Engineering. When playing games or watching films I'm actively thinking about how certain sounds were created and what methods could have been used to achieve them, this process is very intriguing to me. I have an eagerness to learn and develop new skills and techniques within a working environment whilst taking in information from other experienced engineers to further my own knowledge and understanding. I am a motivated, hard working individual with a logical and methodical approach to tasks.

Key skills:

- Being able to work well in a team
- Ability to use initiative
- Work well to deadlines and when under pressure
- A logical approach to problem solving
- Active listening and creative ability
- Attention to detail
- Able to work well with Microsoft Word, Powerpoint and Excel
- Able to work well in various audio DAW's such as Pro Tools, GarageBand and FL Studio
- Experience in using audio middleware program WWise

Education:

Perth College UHI 2018/21 - BSc Degree Sound Engineering

- Recording/mixing songs in Pro Tools as well as sound design projects for film clips.
- Implementing sounds and adding them in to WWise and linking them with game commands
- Recording sounds with a Tascam location recorder and using Pro Tools to edit them
- Using BBC industry standard practice when exporting the finished sound design project (BLITS, GLITS, tones).
- Learned many mixing techniques for both mixing songs and sound for film to enhance the final outcome of the projects.

-Queen Anne High School - 2012-2017

- Higher's- Music, Music technology
- National 5's- English, Creative Computing, Music Technology, Music, History

Hobbies and Interests:

Creating my own sounds whilst playing and recording music is a big part of my life. I have been involved in playing live with bands predominantly playing bass. I like to record music at home using my instruments and music software on my computer. I enjoy going to gigs and seeing bands live. Another hobby of mine is playing video games. Recently I've been making beats at home and putting them up on YouTube under my producer name "svetlost". I make the music

on FL Studio and matching the final music file with a picture I've taken outside and combining them in a video editor before posting the final product online.

Volunteer work placement:

During high school I went on a volunteer placement to the local leisure center. Where I was shown around the facilities and given an insight into how a leisure center runs. My main jobs there were to help maintain and clean the tennis and squash courts. I also was placed into assisting the staff in the creche to help look after the kids and clean the play area.
