Cover Letter

I've spotted your job advert for the sound designer and recordist role however when I passed the information to my work coach they couldn't refer me on to apply for it, so instead I've been advised to apply through this advert. I've recently completed my BSc Degree in Sound Engineering and thought this opportunity would be ideal to gain experience working within the industry. I'm looking to expand my knowledge to learn and develop new skills and open up more opportunities.
