I am currently studying Film Production at Bournemouth University. Outside of University I take a keen interest in watching films and helping Colleagues to create short films, broadening my knowledge, and expanding my skills relating to the film industry. My ambition is to work behind the camera on one of my many scripts. I will grasp any opportunity to become involved in any role within the film industry. Need a set of hands? I am there.

Thank you for reading.

I wish you the best of health, and happiness.
