Exercises

Holistic
⊥
Analytic

Holistic Thinking

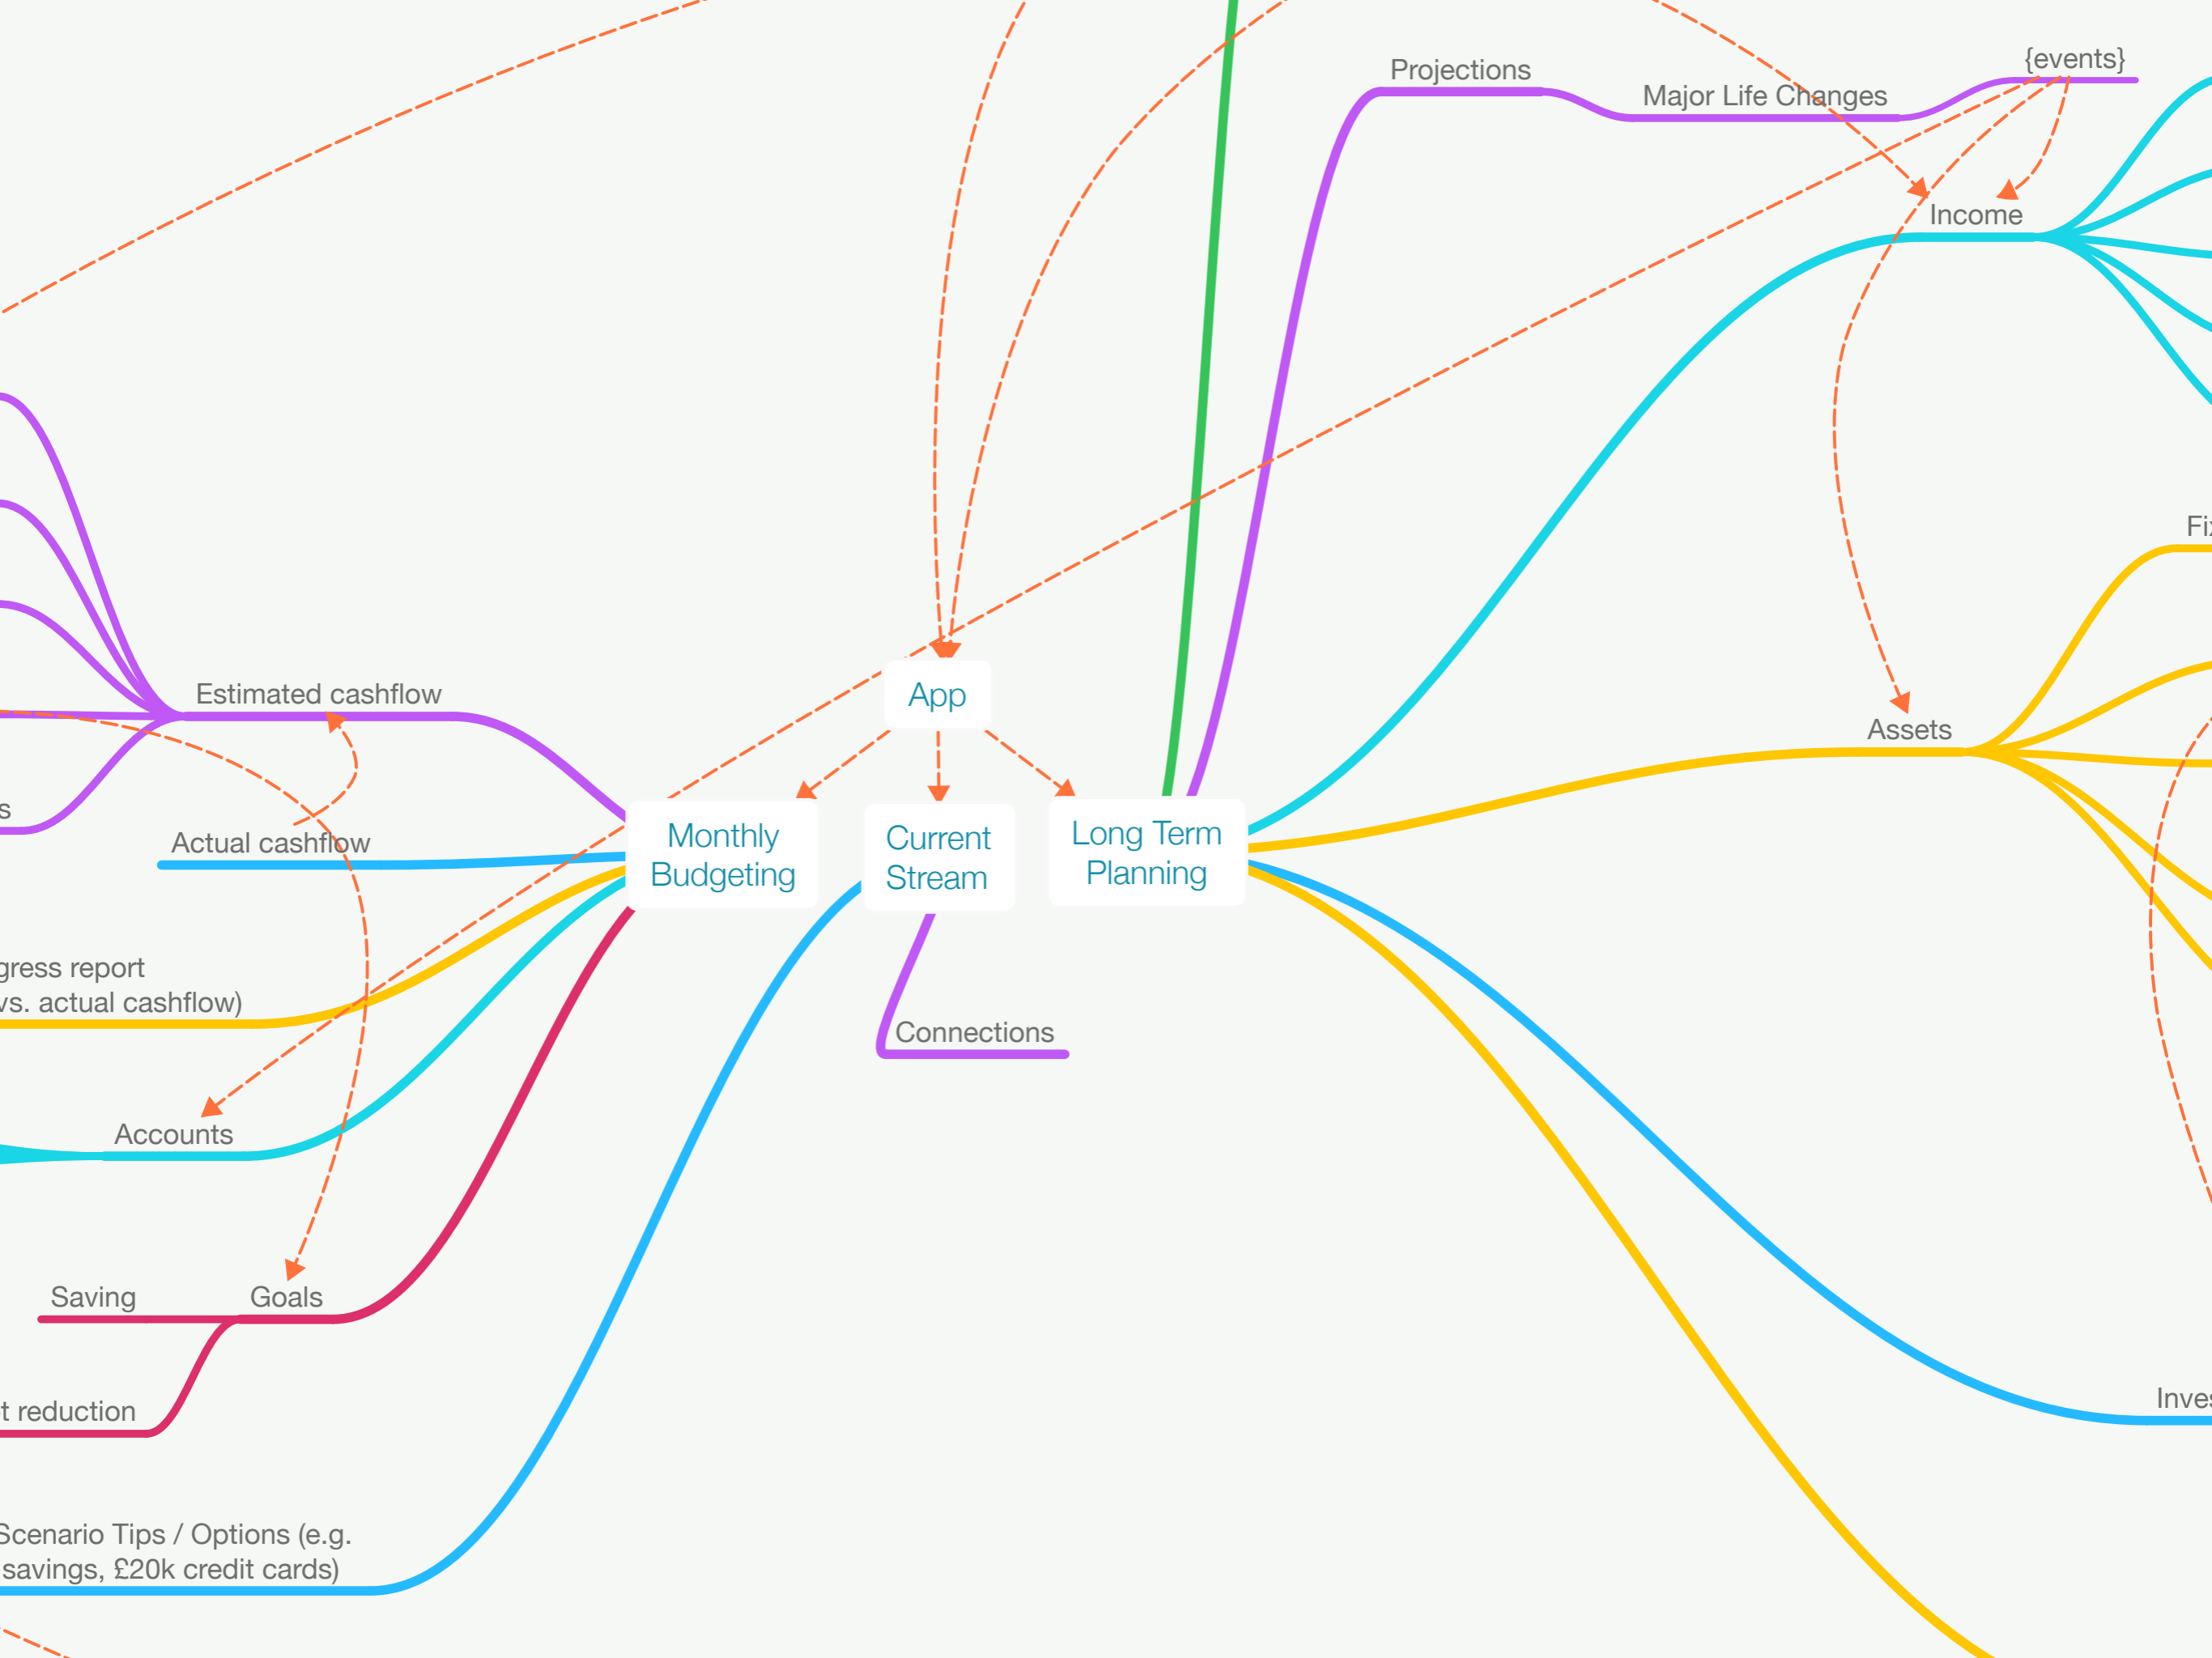

Involves understanding a system by using large-scale patterns and relating them.

Analytic Thinking

Involves understanding a system by thinking about its parts and how they work together to produce larger scale effects.

“Moneyhub” History: Growth

- 1) All-round UXer in a team of 3
- 2) All round UXer in a team of 10
- 3) One of 3-4 UXers in a team of 100

Discover

Behavior-led design research

Define

Workshops and idea generation

Develop

Review ideas through culture thinking and design

Deliver

Prototyping, selection and mentoring

1

DISCOVERY

I have a challenge.
How do I approach it?

2

INTERPRETATION

I learned something.
How do I interpret it?

3

IDEATION

I see an opportunity.
What do I create?

4

EXPERIMENTATION

I have an idea.
How do I build it?

5

EVOLUTION

I tried something new.
How do I evolve it?

STEPS

1-1 Understand the Challenge

1-2 Prepare Research

1-3 Gather Inspiration

2-1 Tell Stories

2-2 Search for Meaning

2-3 Frame Opportunities

3-1 Generate Ideas

3-2 Refine Ideas

4-1 Make Prototypes

4-1 Get Feedback

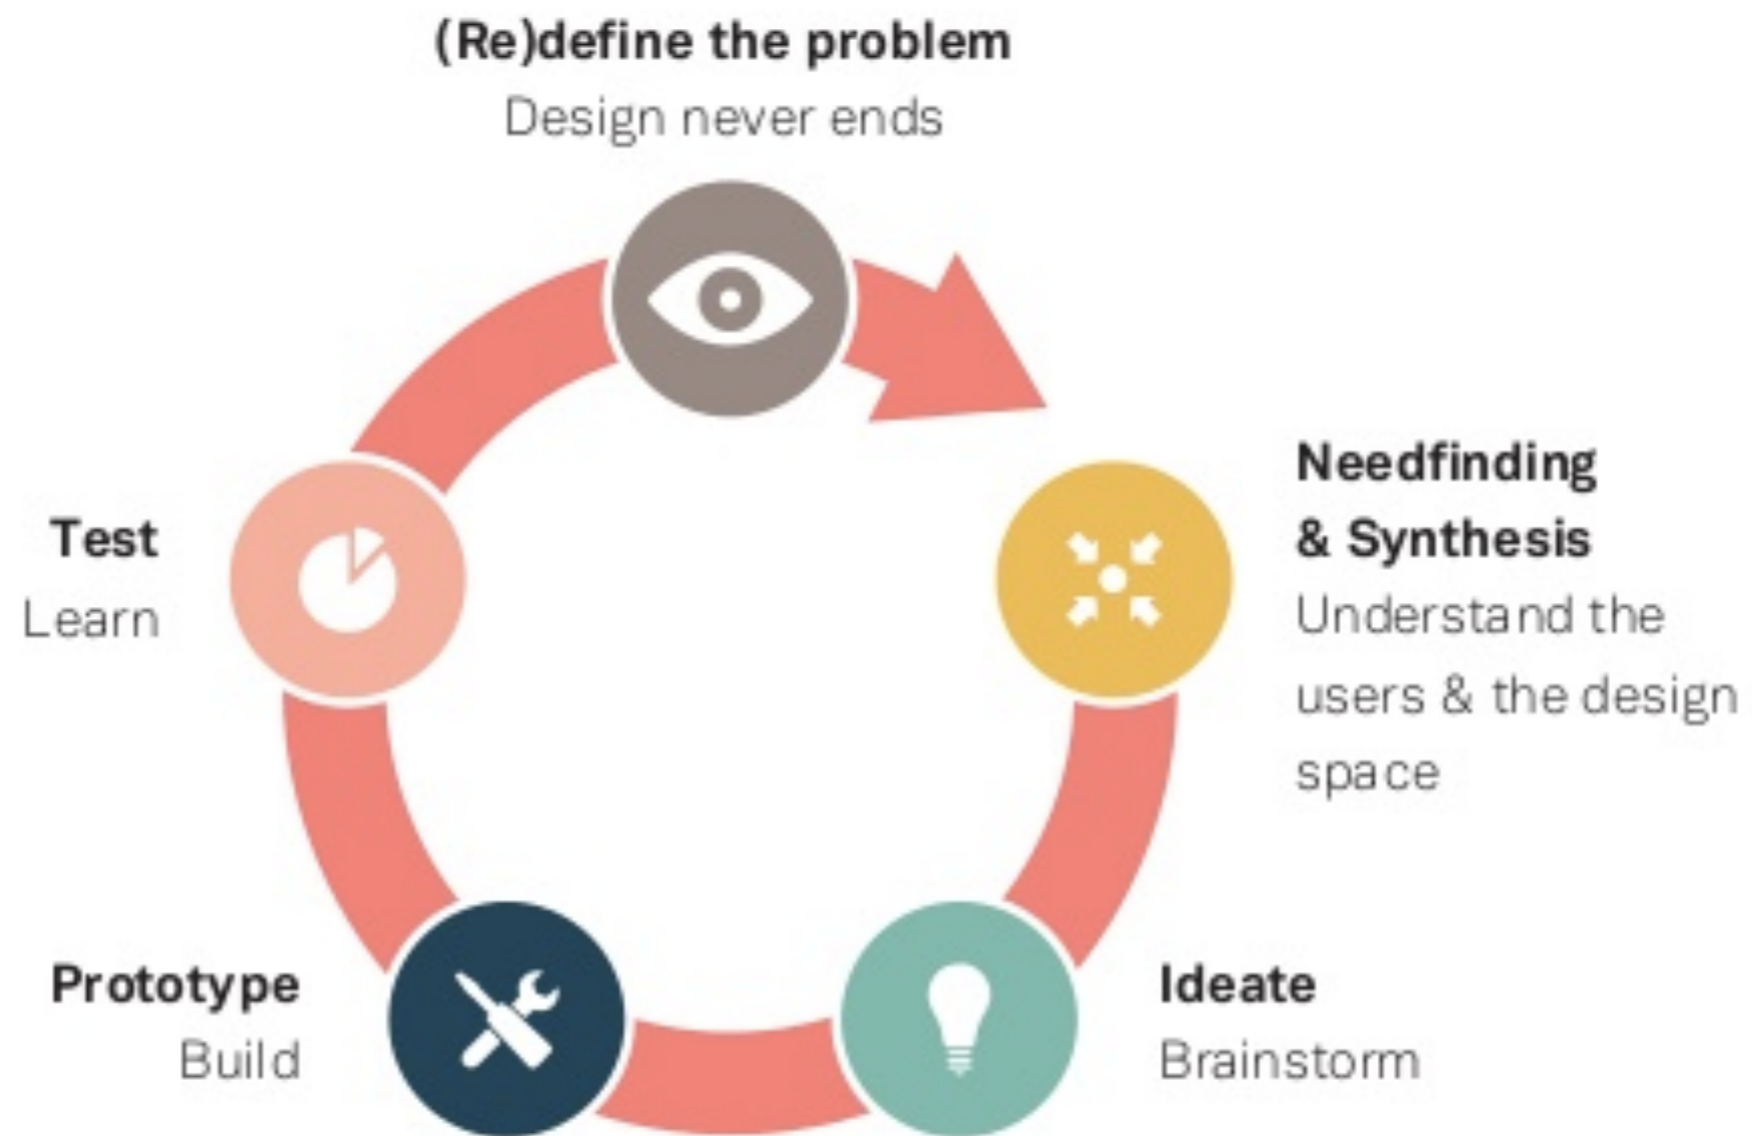

5-1 Track Learnings

5-2 Move Forward

The Design Thinking process oscillates between divergent and convergent thinking modes. It can be helpful to be aware of the mode that corresponds to the design phase you are working through.

Design Thinking Process

Renaissance Human

The braininess of a scientist,
the sensibilities of a poet.

Product Backlog

Sprint Backlog

Sprint

Working increment
of the software

Development Process

90%+ of time concerned with “how” not “what” or “why”

90%+ of time spent tracking and fixing bugs

Ah for the days of waterfall...

Features, epics, stories, issues - building inside out rather than outside in

A small user experience suggestion can mean days or even months of work

Status: Who's in control?

UX vs. Agile Dev

Conflicting expectations around quality, fit, and finish

Working ahead at the same time as trying to support the current

Lack of holistic planning and prioritisation for the user experience

Unclear expectations about the role of UX on the team

Perception of UX as less valued than development

Perception that technical staff is disinterested in users' needs

Being disconnected from the regular activities of the scrum team

UX + Agile Dev

Explicitly train people to recognise inclusion of specialists - reject Agile denigration of specialisation

Clarify role of UX on the team

Include UX goals and needs in sprint retrospectives

Include UX in ongoing communications

Include UX in early product strategy & ideation

Set clear UX goals for each sprint and include UX criteria in definition of done

Thank you
