

PRODUCT SPECIFICATION REPORT

Dyna 143° is a solvent cleaner and degreaser composed of selected hydrocarbon solvents, specifically designed for the Zep Dyna Clean and other basin-type parts washers.

DYNA 143° PROD.#0366

Solvent Cleaner for Parts Washing

FEATURES/BENEFITS:

Cleaner and Degreaser	Highly refined, odorless solvents quickly dissolve and flush away grease, oil and other soil
Low Evaporation Rate	Low evaporation rate and vapor pressure assure minimal evaporative loss and employee exposure
High Flash Point	The higher flash point of Zep Dyna 143° (143°F) as compared to mineral spirits (107°F), reduces the flammability hazards of solvent use in the shop area and storeroom.
Economical	When used in a filtered Zep parts washer, such as the Zep Dyna Clean, the solvent is continuously recycled, while any particulates and oils are trapped in filters for disposal.
Versatile	In addition to use in parts washers, it may be used for general degreasing anywhere a solvent cleaner is needed.

APPLICATIONS:

Specifically designed for use in Zep Dyna Clean, Dyna 100 FB, Dyna Brute FB, Super Brute FB, Dyna Mate II parts washers and all Zep filtration systems. It is ideal for removing accumulated soil, grease, and oil deposits from all types of metal. Recommended to clean fuel pumps, filters, master cylinders, valve covers, rocker arms, and other automotive and engine parts. Particularly useful for automotive repair shops, new & used car dealers, truck repair services, motorcycle dealers, bus depots, automotive parts stores, and equipment rental facilities.

COMPANION PRODUCTS:

Zep Dyna Clean, I.D. Red, I.D. Flush, Big Orange, Soy Power, Zepride, Zep 2000, Red Slide, Zep 45, Cherry Bomb, TKO, Ultra Wipes, Zep Gloves, Zep Trash Bags

SPECIFICATIONS:

Physical Form	Liquid
Odor	Slight Solvent
Color	Clear, Colorless
Specific Gravity	0.79
Flash Point	143°F (Pensky-Martens)
pH	N/A
Shelf Life	1 Year Minimum
D.O.T. Shipping Label	Not Regulated
