Speed the Delivery of Your Analytics-Ready Data to Google Cloud

Qlik Data Integration Solutions for the Google Cloud Platform
Qlik Data Integration solutions, speed data replication, ingestion, and streaming across all major database, data warehouse, data lake, and legacy platforms – on premises and in the cloud. Trusted by hundreds of enterprises worldwide, our solutions empower you to easily, securely, and efficiently get more value from your Google Cloud Platform investment.
Qlik Replicate

Our Qlik Replicate® solution, is the foundation for modern, efficient data movement to the Google Cloud Platform. It transfers your data continuously, at high speed, from source(s) to target. With our agentless configuration, you can easily set up, control, and monitor bulk loads and real-time updates through Qlik change data capture (CDC) technology.

Popular Use Cases

Cloud Data Migration

Efficiently load into and continuously update data in Google BigQuery, Google Cloud SQL, and Google Pub/Sub.

Cloud Data Warehousing

Automate and optimize your Google BigQuery cloud data warehouse.

Cloud Data Lakes

Enhance and improve your analytics-ready data sets for Google Dataproc or Google Store data lake initiatives.

SAP Analytics

Liberate and move SAP data for your real-time analytics projects.

Mainframe Modernization

Offload your mainframe data to Google Cloud SQL to reduce MIPs costs and power your new enterprise applications.
Qlik Compose

Our Qlik Compose® solution, automates the design, implementation, and updates of your data warehouses and data marts. It minimizes the traditionally manual and error-prone processes of modelling and deploying data models in Google BigQuery by automating data modeling, ETL code generation, and workflow. Using Qlik Compose, your data architects and project managers can accelerate cloud analytics projects, optimize data warehouse processes, and reduce the time it takes to produce analytics-ready data.
