TBE

## Properties

This conveyor belt model is formed by placing wire loops (eye-links) without gaps between them. The space between the eye-links is the same as the thickness of the wire. It can be preferred in cases where the amount of space in the conveyor belt is not needed (air & luquid flow rate) and the material carried is poured heavy and/or from a certain height.

Technical Properties

A: Coil Pitch

B: TWire Thickness

C: Rod Pitch

D: Plate Thickness

øD: Rod Diameter
