SUMMARY

I am a creative, driven professional with a passion for building web applications. Experienced in all areas of web application development, from planning and architecting, to design and prototyping, to building and QA testing. Looking for a leadership position that leverages my experience and presents new challenges.

SKILLS

JavaScript, ReactJS, Webpack/Gulp/Grunt, AngularJS (1.x), MongoDB, Electron, JQuery, HTML5, SASS/LESS, CSS3, XML, PHP, MySQL, Laravel, Wordpress, Docker, Linux, UNIX, Git, Heroku, Github, Atlassian (Bitbucket, Jira, Confluence).

AWARDS AND ACKNOWLEDGMENTS

- Apple World Wide Developers Conference Scholarship Winner - 2006, 2007
- Baker College Presidents List - Winter, Summer 2006
- Baker College Deans List - Spring 2006

EXPERIENCE

Lead Front End Developer for Consumer Reports / Atlanta, GA / Yonkers, NY.

Jan 2017 - Present

- Lead team responsible for personalization, benefits and shopping parts of the Consumer Reports website. Handle code reviews and pull requests, along with establishing best practices for developers.
- Design and coded Javascript (React, Webpack), CSS (Sass), HTML/JSX for Consumer Reports Chrome Extension (<https://chrome.google.com/webstore/detail/consumer-reports-abmigknmjdpedgfbfjphohjdocmkapak>) and Firefox Add-On (<https://addons.mozilla.org/en-US/firefox/addon/consumer-reports/>). Extension communicates with APIs that provide Consumer Reports data on shopping sites like Amazon, Best Buy, Home Depot, Lowes, etc.
- Built registration flow for Consumer Reports website (React, Sass, Laravel).
- Built React components and backend (Laravel) for Consumer Reports testing platform (YouTest product).

Lead Front End Developer for Nucleus Global / Atlanta, GA.

July 2015 - Jan 2017

- Build front end, responsive web applications that communicate with back end REST APIs, utilizing AngularJS (1.x), NodeJS, Express, MongoDB, JQuery, Gulp, Bootstrap and HTML5/CSS3 (LESS/SASS) technologies. Package applications for mobile delivery using Apache Cordova and desktop delivery using Electron.
- Code review and mentoring of other developers. Lead daily scrums.

Manager, Digital Engineering for Re/code (Revere Digital) / Atlanta, GA.

April 2015 - July 2015

- Managed development and operational support for recode.net, Wordpress VIP based site covering tech news. Utilize Vagrant for development environments. Build code in PHP, CSS, Javascript. Utilized grunt & gulp for task running. Utilize Git/SVN for version control.

Technical Manager for Sports Illustrated / Time Inc, Atlanta, GA / New York, NY.

September 2013 - April 2015

- Manage development/operation support for www.si.com, www.golf.com, including supervision of web development staff and resources (10 developers)
- Lead team and development on Swimsuit project (2014/2015). Used HTML5/JS/MongoDB.
- Lead team building out structured data infrastructure for relaunched www.si.com (launched 6/2014)
 - Utilize data (stats/scores/schedules) provided by Stats LLC in XML/JSON format.
- Manage offshore web development resources (PHP/Wordpress VIP/Drupal/Front end Developers).
 - Assign work and reviewed commits from developers.
- Used Agile methodology, utilized Atlassian Jira/Confluence for project tracking and documentation.
