

## Information Management & Analytics Community of Practice

### Panel Discussion

### Implications and Impacts of AI on Data

12.30pm AEST

Thursday 28<sup>th</sup> September 2023

Join us for a CAUDIT IM&A CoP special event. We'll be facilitating a panel discussion on the "Implications and Impacts of AI on Data" with expert guests from Google, Microsoft and IBM.

#### Meet the panel...

**Ross Farrelly**

Segment Leader of Data Science and Artificial Intelligence, IBM Asia Pacific

Ross has extensive consulting experience in large-scale big data implementations in multiple companies across Telco, Banking and Government verticals in Australia, New Zealand and South East Asia, and works with companies throughout the region to develop and execute on their strategies to adopt and realise the benefits of predictive and generative AI.

Ross has a Master of Applied Statistics, a Masters of Applied Ethics, a first class honours degree in Pure Mathematics and a PhD in Information Systems.

**Elizabeth Antoine**

Regional Analytics Lead & Global Black Belt for Data and AI, Microsoft Asia

Elizabeth's expertise comes from extensive experience in a number of domains including finance, retail, education, healthcare, and e-commerce, and with a particular focus on emerging technologies such as Analytics, Artificial Intelligence, Data mesh, and Data fabric. Her expertise includes a deep understanding of the complex regulatory environments in which these businesses operate, and a deep understanding of the needs and expectations of their customers.

Elizabeth is a University of Melbourne Research Alumni (2010) with a First Class Honors degree in Computer Science and UNSW AGSM Executive MBA candidate.

**Max Kaye**

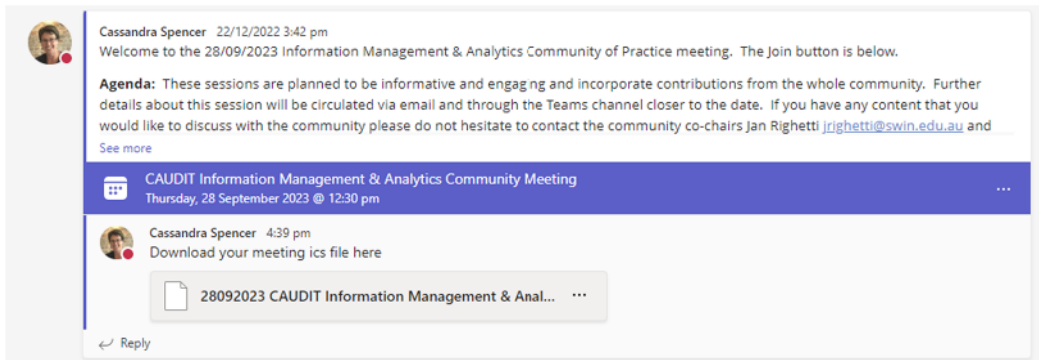

Head of Data Analytics, Google Cloud ANZ

Max Kaye is a experienced industry executive with a proven track record, having worked in the IT industry for over 25 years. Max has had the privilege to work with an extensive number of Australia's largest organisations for Google Cloud, and in his previous roles with his specific areas of focus being:

- Human behaviour modelling and prediction
- Customer insights
- Risk management
- Climate risk modelling
- Logistics optimisation
