ANALOG GAUGE

White Premier

ANALOG GAUGE

White Premier features polished stainless steel bezels and clean white dials with modern black and blue graphics. When illuminated, black dial grads become red and pointer lights red. Automotive type light-piping and fog-resistant design combine for outstanding readability.

A comprehensive family of instruments for outboards, stern drives and inboards, including diesels.

Key features:

- > Scratch-resistant curved glass lenses
- > Optional add-on eyebrow bezels
- > US and metric scales with ISO symbols
- > Perimeter lighting for excellent visibility
- > Stainless steel bezels
- > Available standard & fog-resistant lenses (complies with SAE J-1810)

The heart of the Veethree electrical instrument is the Vector air-core movement. This simple, durable movement was pioneered for the harsh marine and industrial environments.

The Vector movement utilizes a permanent magnet that rotates magnetically in an electrical field. All coil windings and attachments are designed to withstand extremes in vibration, temperature, humidity and salt spray. The electrical studs are tin plated to minimize corrosion in the marine environment.

The magnet/spindle assembly is surrounded by a dampening fluid to reduce pointer bounce, especially those generated by fuel sender float fluctuation.

A temperature compensating resistor is utilized to minimize negative effects of temperature extremes on the gauge. All coils are placed in an annealed metal bobbin can to prevent the magnetic field generated by an operating gauge from effecting other instruments on the dash such as compasses and other electronic equipment. Additionally this can protect the gauge itself from negative magnetic effects common in wiring harnesses.
