Email Integration with ERP

Secure • Controlled • Professional Communication

AccountGST ERP allows integration with Gmail, Outlook, or company email accounts so users can send emails without knowing passwords.

✓ No Password Sharing – Employees can send emails without login access.

✓ Controlled Email Sending – Allow only authorized data sharing.

✓ Centralized Company Email – Send invoices and reports from official email.

✓ Individual Email Access – Allowed users can use their own email.

✓ Email Tracking – Full audit trail of all emails.

✓ Secure Communication – No misuse, no unauthorized sending.

The Risk of Data Loss Without EMAIL ERP Integration

Critical Problem:
Without centralized, secure email functionality, businesses are vulnerable to data being mishandled or misused by employees.

Risk of Data Theft:
Sensitive customer information can be shared outside your organization without control or accountability.
Example: Employees can accidentally or maliciously send critical financial data to unauthorized contacts.

Impact: Data breaches can result in **loss of trust**, **financial penalties**, and **reputational damage**.

Email Integration with ERP – Key Business Benefits

1. Secure Email Communication

All emails are sent from ERP with full control and security.

Benefit: Protect customer and financial data.

2. Prevent Data Leakage

Employees cannot send sensitive data from personal emails.

Benefit: Keep business information safe.

3. Complete Audit Trail

Track who sent, what sent, and when sent.

Benefit: Full accountability and easy audit.

4. Automatic Email Sending

Invoices, reminders, and reports sent automatically.

Benefit: Save time and reduce mistakes.

5. User Access Control

Allow only authorized users to send data.

Benefit: No unauthorized sharing.

6. Professional Communication

All emails sent from company system.

Benefit: Increase customer trust.

7. Avoid Loss & Penalties

Secure system prevents data misuse.

Benefit: Protect reputation and avoid financial loss.

Prerequisites & Compatibility

You only need one **Business Email Account** to configure in the ERP software as the **Master Email ID**.

For other users, you can either assign **individual email IDs** or allow them to use the **same Master Email ID (shared email account)** as required.

We recommend using a **Gmail account** for better and more streamlined working with the ERP software.

Commercial

EMAIL INTEGRATION – SMTP RELAY	Essential Lifetime INR	Business Lifetime INR	Ultimate Lifetime INR	Ultimate Pro Lifetime INR	Enterprise Lifetime INR	Corporate Lifetime INR
SMTP Relay API - Type A	NA	2000	2000	2000

Terms & Conditions
•Prices mentioned above are exclusive of all taxes. Applicable taxes will be charged extra.
•Plugin pricing may differ based on the software variant, as higher variants consume more cloud bandwidth and user I/O resources.
•Renewal charges for plugins, wherever applicable, are subject to change in future depending on cloud infrastructure and maintenance cost.
•All disputes shall be subject to Indore jurisdiction only.
•In case the customer is using more than one software link, plugin purchase will be required separately for each link.
•Plugins will remain active for all companies created under the same software link.

Difference between
Free Email &
Paid Email SMTP Relay API

Free Email Account
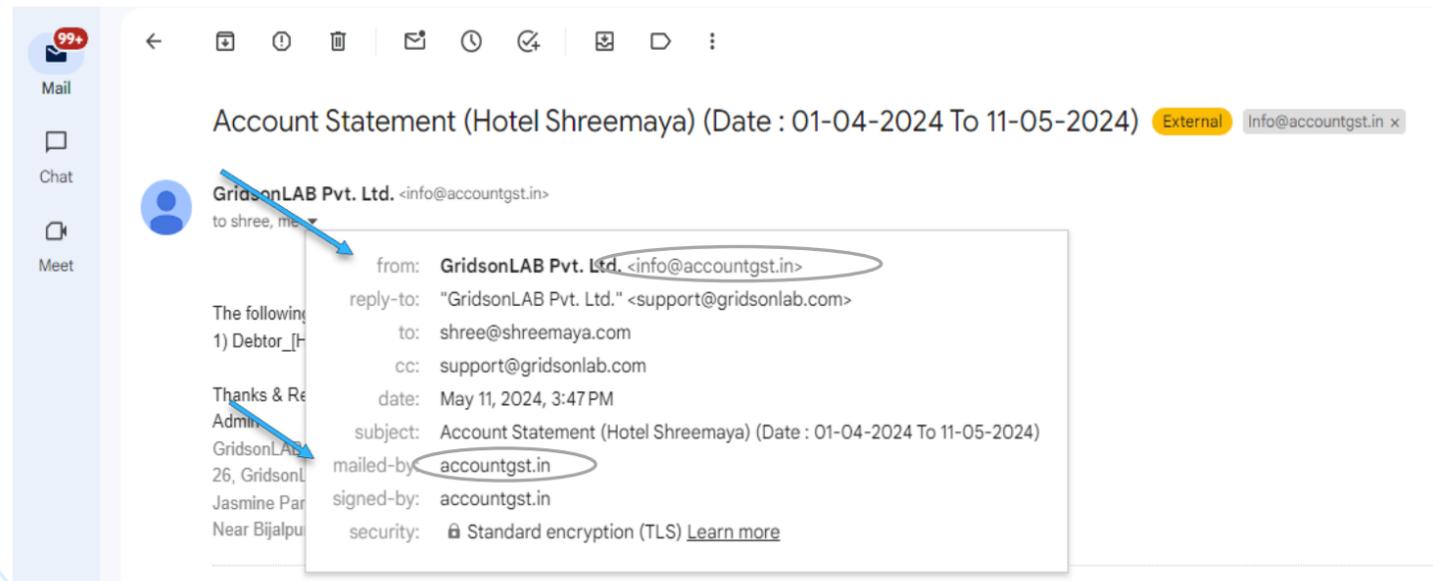

Email Account with SMTP Relay API
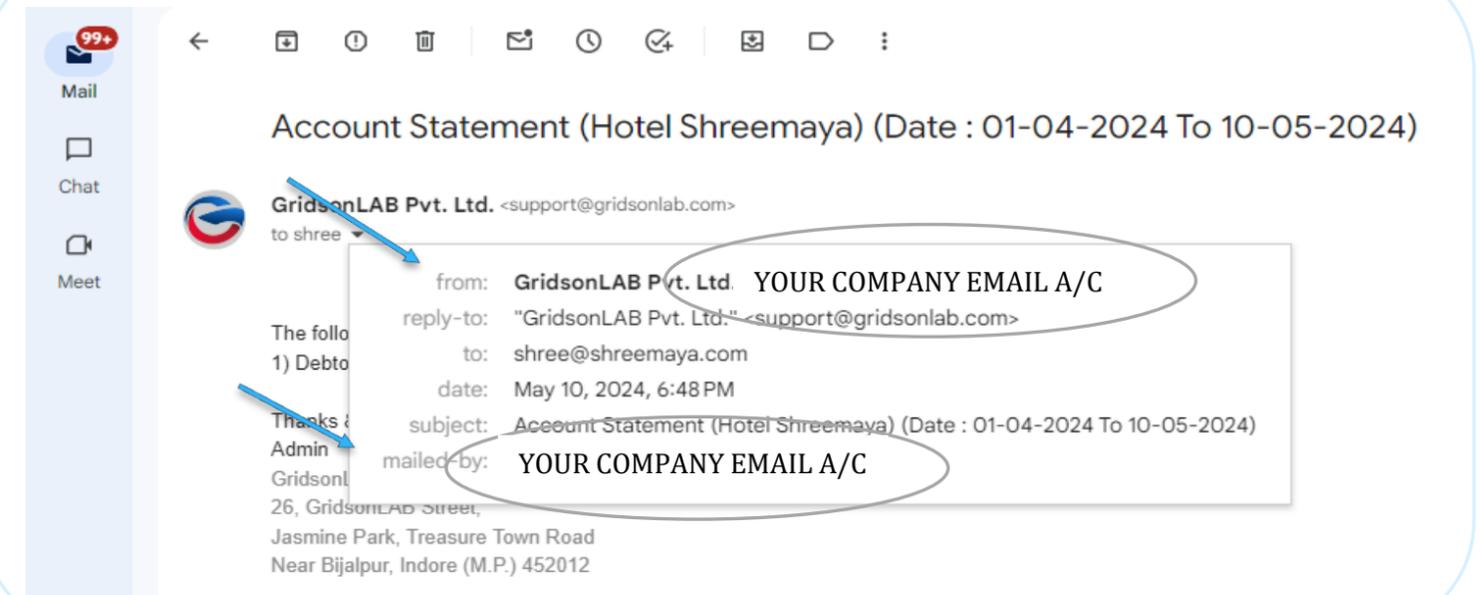

Features	Free Email Account	Email Account with SMTP Relay API
Sender Email ID	Server Email ID	Company Email ID
Mailed By Domain	Server Domain	Company Domain
Legal Authenticity	Unacceptable	Acceptable
MSME Compliance	Not Eligible	Eligible
Email Automation	Not Available	Auto Email and Monthly reminder

Email Configuration in ERP

To configure your email account with ERP, follow the steps below:
1. Go to Dashboard
2. Click on Tool
3. Open Company Setting
4. Select Others
5. Click on Communication
6. Open Email Setup
7. Enter your Email ID, Password, SMTP settings, and Port
8. Click Save

After saving, your ERP will be able to send emails such as invoices, ledgers, outstanding reminders, and reports directly to customers.

Configuration & Integration

User Email Setup
To configure user email setup go to:
Dashboard → Masters → Login Users

Option 1 – User-wise Email
Enter Email ID and Password
→ User will send emails from their own email account.

Option 2 – Common Email
Enter Master Email ID only and leave password blank
→ User will use Company Master Email account.

Email Setup & SMTP Relay – FAQ

Question 1: Can I use multiple email accounts for a particular company?

Yes, you can use either a single email account or multiple email accounts. You can configure different email IDs in each User Login Profile, allowing every user to send emails from their own account, or you can use a common company email.

Question 2: Why do I have to pay for SMTP Relay if I am using my own email account?

SMTP Relay requires communication between the external email server and the internal AWS hosting network. This involves server traffic cost, API development and maintenance, security handling, and server resources, therefore SMTP Relay service is chargeable.

Question 3: If my software contains multiple companies, do I need multiple SMTP Relay APIs?

No, only one SMTP Relay API account is required. The same SMTP Relay service can be used for multiple companies within the same software.

Question 4: Can I use different email accounts for different companies?

Yes, you can configure different email accounts for each company from Company Settings → Email Setup, and users can also have separate email IDs if required.

THANKS!
