THE SUSTAINABILITY PROMISE

# JAY BLADES X G PLAN

Sustainability is an important part of the Jay Blades x G Plan collection.  
Discover more about the steps we are taking to minimise our impact on the environment.

THE SUSTAINABILITY PROMISE

# JAY BLADES X G PLAN

## SUSTAINABLE FABRICS

Added sustainable fabric options to our latest collection, to offer our customers a responsible choice.

As part of the collection, we offer a sustainable Warwick tweed fabric available across the ranges. This fabric is made from 100% recycled olefin yarns and produced from converted pre-consumer textile waste. During this process there is zero water consumption which saves 250 litres of water per sofa, and it also doesn't contain any harmful chemicals.

## WARWICK

## PACKAGING

All cardboard and plastic bags are 100% recyclable. Our cardboard is made with at least 80% recycled material and our bags are also made with 30% recycled material.

## TIMBER & TIMBER FRAME GUARANTEE

One effective way to minimise our impact on the environment is to build furniture that lasts and that's why we offer a 25-year guarantee on our timber frames.

At G Plan we are committed to sourcing the timber and timber products in the furniture from responsibly managed forests where environmentally appropriate, socially beneficial, and economically viable practices are maintained.

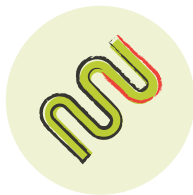

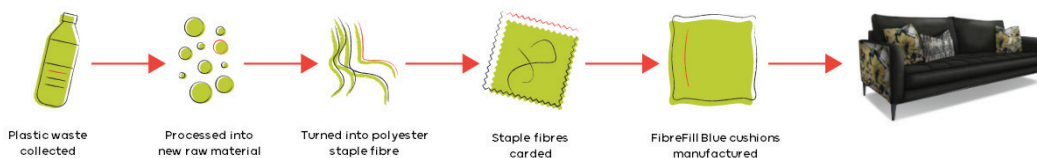

## CUSHION FILLINGS

Working with our suppliers on responsible cushion filling options. Our latest collection features 100% recyclable polyester fibre back cushions.

All of our back cushions are made using 100% recyclable polyester fibre from recycled plastic waste, produced by our supplier Fibreline. The average sofa cushion uses the equivalent of 100 plastic bottles.

## FibreFill Blue

## SPRINGS

All our seat springs are made by our supplier, Wade Springs. All springs supplied are not treated or coated which makes them 100% recyclable. Our springs are also built to last, another effective way to minimise our impact on the environment.

## RESPONSIBLY SOURCED WOOD

We are working with our supplier to deliver 100% of our upholstered products using materials from responsibly managed forests.

## FABRIC, LEATHER & CARBON FOOTPRINT

Partnered with suppliers who are working towards sustainable practices to reduce their carbon footprint.

All our suppliers we've partnered with are looking at new processes and innovations to minimise their impact on the environment as a business. To name a few, Crest (our leather supplier) are implementing initiatives to reduce energy consumption, optimising tanning drums to decrease water usage and increase energy efficiency, ensuring that all water that is consumed is cleaned and reused wherever possible. Wade Springs (our spring suppliers) are also implementing new equipment such as solar panels and low energy light fittings to reduce their carbon footprint.
