To start the flow of water place your hand in front of the sensor.

Equipped with:

- A **5-minute disable** push button: it is a function which blocks the flow for 5 minutes to allow cleaning operations.

Inside the ABS box, openable by unscrewing the plastic top cover, there are:

- Printed circuit board and some electrovalves, allowing water to flow up to the mixer every time the proximity sensor detects the user's hands.
- Trimmer for sensor fine calibration
- Connector for external power supply
- 2 micro switches regulating the minimum power up time of the electrovalves immediate default, 2s, 4s, 6s
- Alkaline battery compartment 4 x 1,5V type AA

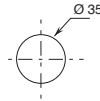

The hands motion detection system features:

- High sensitivity to movement
- Very low-energy levels (also in stand-by status)
