| Recommended installation conditions: | |
| - Hydraulic pressure: | 43 PSI |
| - Hot water temperature: | from 131°F to 149°F |

Versions

The MILANOSLIM shower is available in the THERMOSTATIC version and consists of the following:

A) IN-WALL UNIT including:

- A steel BOX with inlet pipes for the connection of cold and hot water, the system for the waterfall head shower connection.
- A MIXER BODY with thermostatic cartridge and a DIVERTER BODY with 3-way DIVERTER cartridge.
- A lower BODY for the connection of the water plug for the handshower.

The built-in part must be prepared and connected when completing the bathroom sanitary fixtures right before carrying out the facing. 1/2" inlets.

NOTE: The in-wall unit must be installed at framing stage.

MILANOSLIM TRIM including:

- UPPER SHOWER HEAD IN STAINLESS STEEL with antilime system (to connect to the built-in part after carrying out the facing).
- PANEL IN STAINLESS STEEL WITH FRONT JETS.
- WATER PLUG WITH HANDSHOWER AND FLEXIBLE.
- THERMOSTATIC MIXER HANDLE AND DIVERTER HANDLE.

MilanoSlim functioning:

The lower handle controls the thermostatic cartridge to regulate the requested temperature.

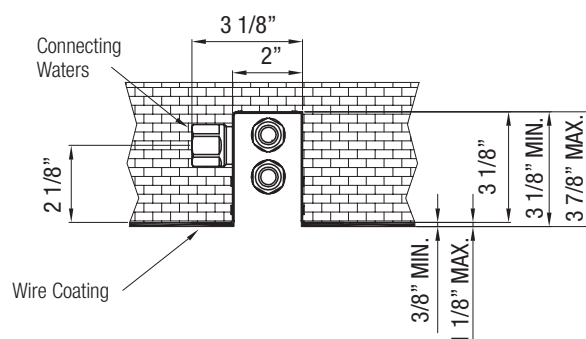

The upper handle opens/closes the water and diverts it to the following outlets:

- UPPER SHOWER HEAD
- FRONT JET
- HANDSHOWER

Base materials:

- Stainless Steel AISI 316
- 38 Polished Stainless Steel
- 93 Brushed Stainless Steel

Guidelines for the set-up
