COLLECTIBLE BOOK

Fall 2024

**C3 AND AIR 2 | DUSCHOLUX**

Having become the world leader in the sanitary market in the 1960s thanks to the invention of the folding acrylic glass shower cubicle, Duscholux has never stopped researching bathroom wall coverings. Today its novelties are the collection 3c sliding shower doors, without profiles, and Air 2, with thin recessed wall profiles or invisible ultra-flat floor profiles (2.2 mm). The glass of both solutions is treated with the innovative CareTec Pro which creates a transparent protective film on the surface with a water and oil repellent effect, making it possible to clean it with a simple micro-fibre cloth and without detergents.

**QUARTZ AGGLOMERATE | QUARELLA**

Quarella's quartz agglomerate collections stem from a deep reflection on the meaning of contemporary living, linked to an idea of holistic well-being rather than mere functionality, particularly with regard to the bathroom environment. Quarella quartz agglomerate is suitable for covering numerous surfaces – floors, walls, tubs, showers, bathroom furniture, and even accessories. The color palette is varied: from delicate pastels to those of sand and earth, to fresh tones reminiscent of nature, to bright shades such as Quarella Taksim, to bright whites up to sophisticated deep grays and blacks.

TORINO | FRANCESCO LUCCHESI | FANTINI

Simple, measured, and elegant, the Torino faucet collection, designed by Francesco Lucchese for Fantini, is inspired by archetypal geometric elements, bringing the essence of shapes to life, made contemporary by essential lines and volumes. With great attention to functionality, the collection offers soft and sinuous curves that naturally invite use. The spout and the flat, tapered handle connect seamlessly with the cylinder of the structure, creating a harmonious and calibrated interplay of proportions. The collection is available in Deep Black PVD, chrome, matt black, Matt Gun Metal PVD, and Matt British Gold PVD finishes.
