COLLECTIBLE **BOOK**

FLORA | VINCENT VAN DUYSSEN | FANTINI

The Flora series, designed by Vincent Van Duysen for **Fantini**, has its strong point in the handles: tactile, ergonomic, and protagonists of the collection, they lend charm and character to the entire project. Available in bolder and more graphic versions or in sober and versatile interpretations, the collection always maintains a strong tactile quality and a distinctive visual identity, capable of integrating into any type of environment. Flora presents an industrial aesthetic reinterpreted with contemporary sensibility and carefully calibrated proportions, which give elegance and personality to the product.
