TECHNICAL DETAILS - DONNÉES TECHNIQUES - DATOS TÉCNICOS

| EN                                                   | FR                                                       | ES                                                          |                |
|------------------------------------------------------|----------------------------------------------------------|-------------------------------------------------------------|----------------|
| Minimum pressure                                     | Pression minimum                                         | Pression mínima                                             | 1 BAR          |
| Minimum pressure                                     | Pression maximum                                         | Pression máxima                                             | 10 BAR         |
| Recommened working pressure                          | Pression optimale de service                             | Pression de trab. aconsejada                                | 2-5 BAR        |
| Max. water temperature                               | Température maximum                                      | Temperatura máxima                                          | 80° C - 176° F |
| Maximum water temperature reccomended                | Température maximum optimale                             | Temperatura máxima aconsejada                               | 65° C - 149° F |
| Maximum in-let pressure diffe-<br>rence (hot - cold) | Différence max. de pression<br>d'arrivée (chaud - froid) | Diferencial max. de presiön de<br>entrada (caliente - fria) | 1.5 BAR        |

- EN** If water pressure is above 5 bar, it is advisable to install a flow restrictor upstream of the water supply to avoid vibrations and regulate temperature.
- FR** Si la pression de l'eau est supérieure à 5 bar, il est recommandé d'installer un réducteur de pression en amont de l'alimentation afin d'éviter toute vibration et régulariser le réglage de la température.
- ES** Si la presión del agua supera los 5 bar, es preferible instalar un limitador de caudal en la conducción de la alimentación para evitar vibraciones y normalizar la regulación de la temperatura.

**EN** **Advice on product care**  
To clean the surface use a soap and water solution. Never use for any reason cleaning solutions containing abrasive substances, chloric acids, ammonia, vinegar, bleach, domestic acids, disinfectants, or anytype of abrasive pad. **WARNING!** Incorrect cleaning may permanently ruin the surface of the products and in such case the manufacturer may not be held liable for damage. The Manufacturer reserves the right to modify product and accessories at any time without prior notice. Datos, products and sketches included in this document are just for information and do not bind the producer.

**FR** **Conseils pour l'entretien du produit**  
La poussière en surface devra être faite en utilisant un savon liquide dilué dans l'eau. Ne jamais utiliser en aucun cas des détergents liquides contenant des substances abrasives ou à base d'acide, nid'éponges abrasives, vinaigre, ammoniacque, acétone, eau de Javel, acides à usage domestique, désinfectants divers. **ATTENTION!** L'emploi de produits non conseillés peut détériorer irrémédiablement la surface des articles pour lesquels le fabricant ne sera pas responsable. La société se réserve le droit de modifier ses produits et ses accessoires à tout moment et sans préavis. Informations, produits et croquis reproduits dans ce documents sont de nature informative et ne sont pas contractuels.

**ES** **Consejos para el cuidado del producto**  
La limpieza de las superficies se hace utilizando un jabón líquido diluido en agua. No usar en ningún caso detergentes líquidos que contengan sustancias abrasivas ó a base de ácido clorhídrico, estropajossabrasivos, amoniaco, acetona, lejía, ácidos de uso doméstico, desinfectantes varios. **ATENCIÓN!** El uso de productos desaconsejados puede danar irremediamente las superficies de los elementos, de lo cual el fabricante no se hará responsable en ningún caso. La sociedad se reserva el derecho de modificar sus productos y accesorios en cualquier momento y sin previo aviso.

A763AU

- EN** These mixers can be used with high-pressure hot water accumulators or with instant water heaters.
- FR** Ces mitigeurs peuvent être utilisés avec des accumulateurs d'eau chaude à pression ou avec des chauffe-eau instantanés.
- ES** Estos monomandos pueden utilizarse con acumuladores de agua caliente a presión o con calentadores instantáneos.

- Put the system under pressure in order to verify the hold and correct installation
- L'installation sous pression pour en vérifier l'étanchéité et le bon fonctionnement
- Presurizar la planta para comprobar su retención instalación correcta

**EN** Please note, screw and dowel are NOT supplied, they must be chosen according to the support.

**FR** Nota bene, les vis et les chevilles NE sont PAS fournies, elles doivent être choisies en fonction du support.

**ES** Tenga en cuenta que los tacos y tornillos NO suministrados deben elegirse de acuerdo con el soporte.

- Put the system under pressure in order to verify the hold and correct installation
- L'installation sous pression pour en vérifier l'étanchéité et le bon fonctionnement
- Presurizar la planta para comprobar su retención instalación correcta

- Reapply the adhesive to all of the gasket and the surrounding area
- Applique de nouveau le produit collant sur tout le joint et autour
- Volver a aplicar el adhesivo a toda la empaque y la zona circundante

- Figure shows the measures for cutting tiles and distances to pre-drill the cover
- Sur la figure sont indiqués les dimensions pour la découpe des carreaux et entraxes pour percer le revêtement au préalable
- En la figura se indican las medidas para el corte de los azulejos y la distancia entre los orificios para perforar previamente el revestimiento
