## #5. Compact Video Recorder

### THE ELMO - SUV-A830 High Speed Micro Video Camera

**RECORD YOUR STUDENTS FOR ASSESSMENT ON A SD CARD**

**Immediate playback – transfer to computer via USB or SD card.**

## #6 USB TURNTABLE – “TTUSB”

**Turn your LPs into WAV or MP3 files, Burn CDs  
Archive those “never to be recorded again” favorites!!**

The TTUSB is a unique, plug and play, USB compatible turntable that makes digitizing your vinyl record collection to your PC or Mac a snap. Packaged with all the necessary cables to connect with a computer or stereo playback system, along with software to remove clicks, pops, and other undesirable characteristics of vinyl, the TTUSB is a comprehensive package that breathes new life into older recordings.

## #7 ALESIS USB-MIC PODCASTING KIT

A paperless way to get information to your students, your parents, your staff – without doing a “group email” or paper flyers of information that never make it to the right hands!

Professional-sounding podcasting for your Mac or PC has never been simpler and more affordable than with Alesis' USB-Mic Podcasting Kit. Just plug the high-quality USB microphone into your computer (with no complicated drivers to install) and use the included Audacity software to record your voice, music, and any other external sounds you wish to include for your final product.

The USB-Mic Podcasting Kit comes with a free 30-day subscription to Alesis' custom podcast website, [www.alesispodcast.com](http://www.alesispodcast.com), to even make broadcasting and distributing your work a snap.

The fastest way to scan music into Sibelius for transpositions,

arrangements, and editions.

**Auralia 3**

*Comprehensive Ear Training*

## ***#9 Piano Wizard***

**Piano Wizard** combines the fun of a video game with the fundamentals of piano lessons.

Fun – Easy to use

Trains the teacher

## ***#10 DocuPen***

Planon introduces the DocuPen RC800 color handheld scanner - the latest technology breakthrough from our R&D efforts. We have been able to achieve full color 24 bit scanning in a remarkably compact and light form that provides you with the ultimate convenience. The RC800 is capable of storing 100's of pages into memory and it takes just seconds to scan a page. Choose the mode you want to scan: black and white, standard color or high 24bit color and the resolution from 100 to 400 dpi. Now you can scan your letters, color documents, pictures and bring them into Paperport software (included with the Docupen). The DocuPen is different from other pen sized scanners in that it scans a FULL PAGE width and therefore scans the entire page including text and graphics in as little as 4 seconds. Other handheld and pen scanners only scan single lines of text or records handwriting and some scanners need to be attached to your computer whereas the Docupen overcomes these limitations. The need for convenient out of office scanning is enormous but has not been satisfied because the products to date did not fulfill that need adequately. There truly is no other product like the RC800 on the market today. Planon continues with its mission of "Redefining the way we work"
