

**⚠ Hair colorants can cause severe allergic reactions.**

**Precautions:** For professional use only. Caution! Very strong agent.

Always conduct an allergy test 48 hours before every use. Read and follow instructions. This product is not intended for use on persons under the age of 16. Temporary "black henna" tattoos may increase your risk of allergy. Do not colour your hair if:

- you have a rash on your face or sensitive, irritated and damaged scalp;
- you have ever experienced any reaction after colouring your hair;
- you have experienced a reaction to a temporary "black henna" tattoo in the past.

The color cream is available in 3 colours:

**Usage:** before use perform skin sensitivity test, even if you have previously used the product. Use an oily cream to protect the skin around eyes before dyeing. Mix approx. 1 cm of the cream from the tube with 5-6 drops of the developer in a bowl to achieve homogenous mixture. Apply the mixture on eyebrows using brush. Leave the mixture for 5-10 minutes. Longer time of dyeing gives more intensive color.

Wash the henna with water and soap and rinse off. Afterwards apply moisturising cream.

**Caution!** Always conduct an allergy test before use, even if similar product was used in the past. Apply a small quantity of the dyeing mixture (ratio 1:1) on the inner side of the forearm, leave for 10 minutes and wash off. If no redness or irritations appear within 24 hours, you can begin dyeing. Use immediately after preparation! Do not store the mixture.
