

Permanent — Performance — Protection

Window Film

Window Film

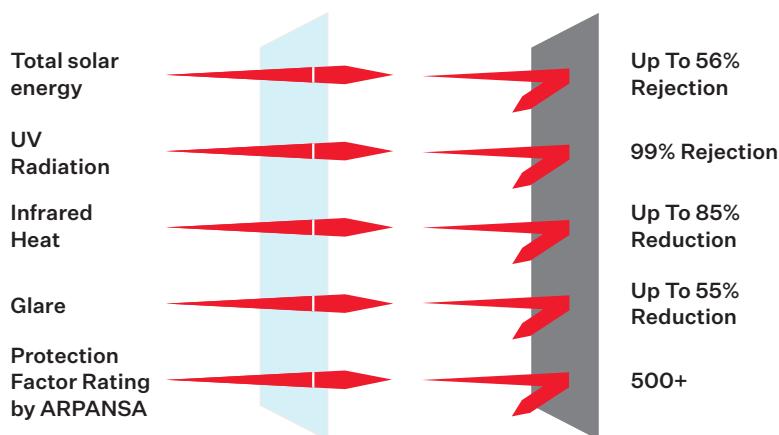

Window Film

Permagard Automotive offers customers two market leading window film products tailored to meet every need. Utilising the very latest in UV and heat rejection technology, Permagard Window Films provide a superior tint solution.

- Manufactured to ISO 9001 standards in the latest state of the art facilities
- Black in colour making it a close fit to factory fitted privacy glass
- Non-metallised construction ensuring no interference with radio or cellular transmissions
- Independently tested by ARPANSA to a maximum Protection Factor rating of 500+
- Backed by Permagard's Nationwide Lifetime Warranty

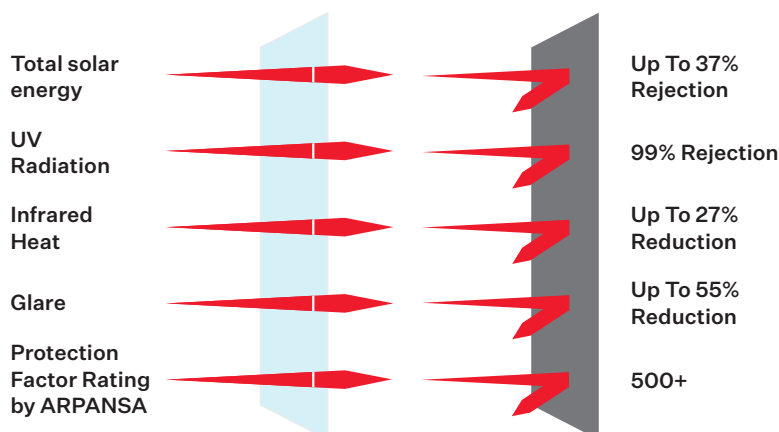

Stratosphere

Permagard Stratosphere incorporates a ceramic nano-particle coating that maximises optical clarity, while building a comprehensive shield of protection from heat, glare and harmful UV and IR rays. Stratosphere films significantly reduce Infrared Heat, resulting in huge reductions in vehicle cabin temperature along with vast improvements in driver and passenger comfort.

Aurora

Permagard Aurora is an advanced colour stable, non-metallised film incorporating the latest fourth generation carbon based polyester materials. The film is black in colour making it a close fit to the privacy glass found on many vehicles today. Aurora is a highly durable, non-reflective film with a tough scratch resistant coating, available in a variety of shades from darkest legal to clear.

Lifetime Warranty*
