

PROTEKTIV HYDRO

VEHICLE PROTECTION
BRILLIANCE AT ITS BEST.
UNMATCHED.

Protektiv HYDRO surface coating is made from a high performance **ceramic formula containing Silicon Carbide (SiC) and Silicon Dioxide (SiO₂)**, delivering extreme durability & hardness.

Protektiv HYDRO has been certified to meet Boeing D6-17487 specification after rigorous testing against stringent standards set out for Boeing compatible products.

EXTERIOR PAINT COATING

PROTECTS AGAINST:

- Weather Induced Oxidisation, Fading & Loss Of Gloss
- Bird & Bat Droppings
- Tree Sap
- Bug Splatter
- Bore Water
- Sunscreen
- Water Marks
- Rail Dust
- Fallen Leaves
- Clear coat delamination *(limited 6 year warranty for vehicles less than 12 months old at date of application).*

WHY DO YOU NEED EXTERIOR PROTECTION?

- Contains abrasion resistant properties
- Eliminates the need to wax and polish
- Provides an outstanding and long lasting shine
- Helps keep your vehicle cleaner for longer
- Once-off application
- No inspections
- Professionally applied
- Maximise re-sale value
- Backed by a nationwide lifetime warranty*

RIGOROUS DURABILITY TESTING

To measure the strength of Protektiv HYDRO's level of durability, we've applied the globally accepted Mohs Hardness Scale, which compares the resistance of a mineral being scratched by ten reference minerals.

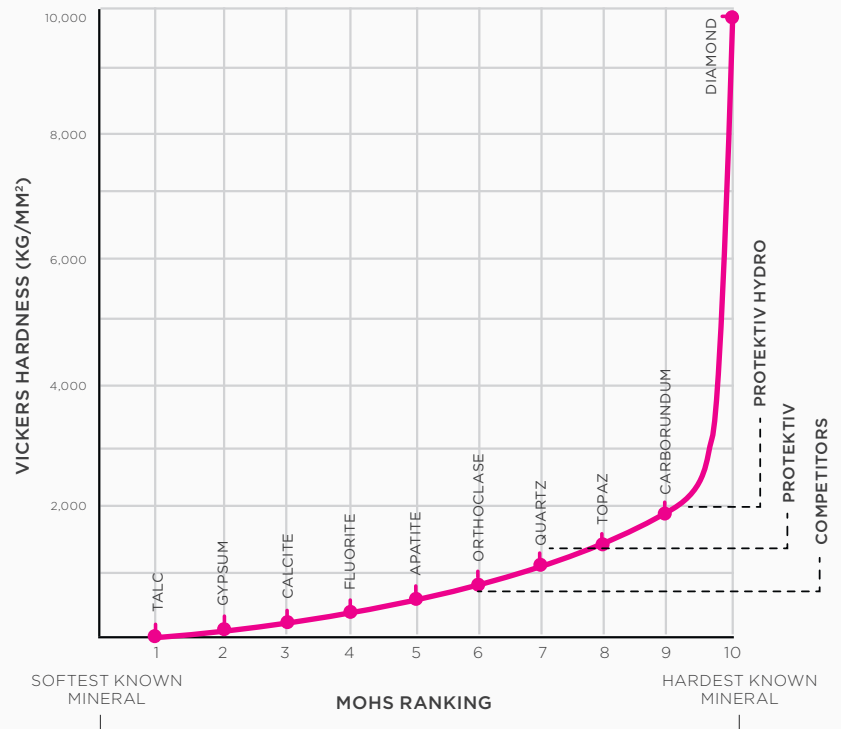

Protektiv HYDRO ranks 9 out of 10 which rates it 4 times harder than quartz-based surface protection products readily available in today's market.

UNTREATED VERSUS TREATED BONNET:

Tested in the harshest of conditions, this muddy water simply sheets off the surface, taking dirt and contaminants with it.

MOHS SCALE OF HARDNESS COMPARISON

Mohs vs. Vickers hardness comparison: This chart compares the hardness of index minerals of the Mohs hardness scale (an integer scale) with their Vickers hardness (a continuous scale). Mohs hardness is a resistance to being scratched, while Vickers hardness is a resistance to indentation under pressure. The graph shows the great difference between the Vickers hardness of Carborundum and diamond - which are only one unit apart on the Mohs hardness scale.

INTERIOR PROTECTION AHEAD OF THE GAME

The Protektiv HYDRO interior program includes 3 superior coatings designed to help maintain the condition of your vehicle's leather, vinyl, fabric & carpet areas, **providing you with a permanent solution.**

LEATHER COATING

HELPS PROTECT AGAINST:

- Dehydration
- Cracking, splitting and hardening[^]
- Discolouration[^]
- Food stains
- Drink stains
- Make-up
- Sunscreen

VINYL COATING

HELPS PROTECT AGAINST:

- Dehydration
- Cracking, splitting and hardening[^]
- Discolouration[^]
- Food stains
- Drink stains
- Make-up
- Sunscreen

FABRIC & CARPET COATING

HELPS PROTECT AGAINST:

- Food stains
- Drink stains
- Discolouration[^]
- Mould and mildew growth
- Make-up
- Sunscreen

EXTRA BENEFITS:

- Once-off application
- No inspections
- Professionally applied
- Helps keep your vehicle cleaner for longer
- Backed by a nationwide lifetime warranty^{*}
