

GET YOUR PHONE READY

# HomeSmart® Apps

A smart phone is required for the activation (iOS/Android)

- ▶ Perform any outstanding firmware updates on your phone’s operating system, it will ensure the smart home apps have all the latest features. For instructions on how to update your phone, use either of these links: [Apple Updates](#) | [Android Updates](#)
- ▶ Charge your phone before the start of the activation, if you opt to use video this can drain a phone’s battery very quickly
- ▶ A second smart phone or a laptop is highly recommended to better assist with the activation

Install the following apps on your phone and create accounts for them prior to your activation.

It is recommended you notate the passwords, as they will be used multiple times throughout the activation. Be sure to store in a secure place.

APP NAME	USER NAME	PASSWORD
eero - Home WiFi System <a href="#">iOS</a> / <a href="#">Android</a>		
Amazon Alexa <a href="#">iOS</a> / <a href="#">Android</a>		
Ring - Always Home <a href="#">iOS</a> / <a href="#">Android</a>		
Thermostat <a href="#">iOS</a> / <a href="#">Android</a>		
Garage Access <a href="#">iOS</a> / <a href="#">Android</a>		
Smart Lights, Wi-Fi <a href="#">iOS</a> / <a href="#">Android</a>		

**IMPORTANT:** If you decide to change the Password in the future for your Smart Home Wi-Fi, you will have to re-connect all of your devices, they will NOT automatically re-connect
