

THUNDER B18 IP-BATTERY

USER MANUAL

KEEP THIS USER MANUAL FOR FUTURE NEEDS

Thank you for your patronage!

We are confident that our excellent products and service can satisfy you.

For your own safety, please read this user manual carefully before installing the device.

In order to install, operate, and maintain the lighting safely correctly.

We suggest that the installation and operation should be done by the verified technician and follow the instruction strictly.

CAUTION!

Keep this device away from rain and moisture!

CAUTION!

Unplug mains lead before device's installation, cleaning and maintenance!

Every person involved with the installation, operation and maintenance of this device has to:

-be qualified

-follow carefully the instructions of this manual

INTRODUCTION

Thank you for having chosen this professional moving head.

You will see you have acquired a powerful and versatile device.

Unpack the device. Inside the carton box you should find:

1. One power in cable
2. One 3 Pin DMX cable(5 Pin optional)
3. One mounted bracket
4. One IR remote
5. One English user manual

(Flight case, Clamps are optional, please contact your dealer)

Please check carefully that there is no damage caused by transportation. Should there be any questions, please consult your dealer and don't install this device.

GENERAL GUIDELINES

This device is a lighting effect for a professional use on stages, TV, in discotheques, theaters, etc., The device was designed for indoor use only.

This fixture is only allowed to be operated with the max alternating current which stated in the technical specifications in 6th page of this manual.

Lighting effects are not designed for permanent operation. Consistent operation breaks may ensure that the device will serve you for a long time without defects.

Do not shake the device. Avoid brute force when installing or operating the device.

While choosing the installation-spot, please make sure that the device is not exposed to extreme heat, moisture or dust. Please don't project the beam onto combustible substances. The minimum distance between light-output from the projector and the illuminated surface must be more than 0,5 meter.

If you use the quick lock cam in hanging up the fixture, please make sure the quick lock fasteners turned in the quick lock holes correctly.

Operate the device only after having familiarized with its functions. Do not permit operation by persons not qualified for operating the device. Most damages are the result of unprofessional operation.

Please use the original packaging if the device is to be transported.

For safety reasons, please be aware that all modifications on the device are forbidden. If this device will be operated in any way different to the one described in this manual, the product may suffer damages and the guarantee becomes void. Furthermore, any other operation may lead to short-circuit, burns, electric shock, crash, etc.

SAFETY INSTRUCTIONS

CAUTION!

Be careful with your operations. With a dangerous voltage you can suffer a dangerous electric shock when touching wires!

This device has left the factory in perfect condition. In order to maintain this condition and to ensure a safe operation, it is absolutely necessary for the user to follow the safety instructions and warning notes written in this user manual.

1. In order to guarantee the product's life, please don't put it in the damp places or even the environment over 60degrees.
2. Always mount this unit in safe and stable matter.

The qualified professionals are allowed to carry out the lamp installation, operation and maintenance, but they must guarantee to operate in strict accordance with the instructions referred to.

▲ Important:

Damages caused by the disregard of this user manual are not subject to warranty. The dealer will not accept liability for any resulting defects or problems.

If the device has been exposed to temperature changes due to environmental changes, do not switch it on immediately. The arising condensation could damage the device. Leave the device switched off until it has reached room temperatures.

This device falls under protection-classI. Therefore it is essential that the device be earthed.

The electric connection must carry out by qualified person.

Make sure the power cord is never crimped or damaged by sharp edges. If this would be the case, replacement of the cable must be done by an authorized dealer.

Always disconnect from the mains, when the device is not in use or before cleaning it. Only handle the power cord by the plug. Never pull out the plug by tugging the power cord.

During initial start-up some smoke or smell may arise. This is a normal process and does not necessarily mean that the device is defective, it should decrease gradually.

Please don't project the beam onto combustible substances.

If the external flexible cable or cord of this luminaire is damaged, it shall be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid a hazard.

**CAUTION!**

Never touch the device during operation!
The housing may heat up!

**CAUTION!**

Never look directly into the light source,
As sensitive persons may suffer an epileptic shock.

Please be aware that damages caused by manual modifications to be the device are not subject to warranty. Keep away from children and non-professionals.

CLEANING AND MAINTENANCE

1. To reduce the risk of electrical shock or fire, do not expose this unit to rain or moisture.
2. Do not spill water or other liquids into or on to your unit.
3. During long periods of non-use, disconnect the unit's main power.
4. It should be installed in a well-ventilated place, at a distance of 50 centimeters or more with the walls. At the same time, please check if the fan and ventilation holes are unobstructed.

The following points have to be considered during the inspection

- 1) All screws for installing the devices or parts of the device have to be tightly connected and must not be corroded.
- 2) There must not be any deformations on the housing. Fixations and installations spots(ceiling, suspension, trussing).
- 3) Mechanically moved parts must not show any traces of wearing and must not rotate with unbalances.
- 4) The electric power supply cables must not show any damage, material fatigue or sediments. Further instructions depending on the installation spot and usage have to be adhered by a skilled installer and any safety problems have to be removed.

**CAUTION!**

Disconnect from mains before starting maintenance operation!

In order to make the lights in good condition and extend the life time, we suggest a regular cleaning to the lights.

- 1) Clean the inside and outside lens each week to avoid the weakness of the lights due to accumulation of dust.
- 2) Clean the fan each week.
- 3) A detailed electric check by approved electrical engineer each three month, make sure that the circuit contacts are in good condition, prevent the poor contact of circuit from overheating.

We recommend a frequent cleaning of the device. Please use a moist, lint-free cloth. Never use alcohol or solvents !

TECHNICAL PARAMETERS

BOBDY

Die cast aluminum

Waterproof grade: IP65

Tilt manually adjustable angle

LIGHT SOURCE

Light source: 18X20W RGBWA UV LED

LED lifespan: 50000 hours

OPTIC

Beam angle: 20 ° (optional lens angle of 10 °/40 °)

Spot angle: 32 °

Dimming: No jitter

CCT shortcut key (color temperature 2700K-10000K adjustable)

CONTROL AND PROGRAM

6 touch buttons

Control panel: OLED display screen

Control protocol:

Wired DMX512, IR remote control, APP (WIFI) (supports Apple and Android), 2.4G wireless DMX512 (compatible with Sweden),RDM

DMX channel mode: 4 modes

DMX channels: 2/6/8/11 channels

Software upgrade: Upgrade software through DMX connection

ELECTRICAL

Input power range: AC110V-240V,50/60Hz

Power: 100W

Power socket: Waterproof powercon true1 in&out (Seetronic brand)

Signal: 3-Pin waterproof XLR socket in&out

BATTERY

Battery capacity: 24000mAh

Charging and discharging times: 500 times

Charging time: 7.5H

Full power on: 3.2H

Auto: Self run 7.5H

R:18H

G:13H

B:15H

W:14.5H

A:15.5H

UV:18H

WORK ENVIRONMENT

Maximum ambient temperature: 45 ° C

Minimum operating temperature: 0 ° C

Maximum surface temperature: 65 ° C

Protection level: IP65

INSTALL

Can be installed horizontally/vertically/upside down

Quick lock hole at the bottom

Safety rope hole

FACTORY CONFIGURATION

REMARKS

A. In A001 status mode, press and hold the ENTER key for 3 seconds before the program automatically enters current regulation mode. Press ENTER again to select the color (up and down keys to adjust the value), and then press Menu key to return.

B. The frequency band indicator light is red slow flashing when the host sends, and green slow flashing when the slave receives.

C. The steps for controlling mobile phone WIFI are as follows:

Step 1: Install the app for this software on your phone first (LED LAMP - Stage - LED LIGHT)

Step 2: Switch the lamp display function to WIFI mode (under the menu Program WIFI mode)

Step 3: Open the settings icon on your phone, open WIFI, and search for the WIFI address. The text starting with an LED will appear. For example, "LED-XXX", click on the link

Step 4: The phone returns to the Home screen, finds the APP installed on the phone, opens it, and controls it after the link is successful.

D. In the menu Wireless mode, the 7 frequency bands of wireless 2.4G can be adjusted, and the corresponding light colors of the 7 frequency bands are as follows (01 red/02 green/03 yellow/04 blue/05 light blue/06 purple/07 white)

E. During the charging process, the charging interface will appear on the display screen (if you need to use the lamp while charging, press the MENU button under the charging interface to enter the operation mode and operation mode of the lamp)

F. Over temperature protection function: (1. When the temperature reaches 50 ° 59 ° C, the program will automatically reduce the brightness by 30%; 2. When the temperature reaches 60 ° 69 ° C, the program will automatically reduce the brightness by 25%; when the temperature reaches 70 ° 79 ° C, the program will automatically reduce the brightness by 30%; when the temperature reaches 80 ° C, the program will automatically turn off the light)

G. This lamp supports wired RDM and software online upgrade functions.

APP CONNECTION STEPS

Scan the QR code on the cover to download the LED LAMP APP

1. Select Program and press the up and down keys to select WI-FI and confirm.

2. Select WiFi Mode and press OK. LED-***will be displayed below WiFi.

The mobile phone WLAN needs to be turned on, otherwise it cannot be used!

3. Find the corresponding L-*** in the mobile phone WLAN list and click Connect.

4. Click to open the installed LED LAMP application.

5. Click Add in the upper right corner

6. Select the exclusive module LED LIGHT in Stage to turn on

7. The connection successful.

8. After successful connection, LED LIGHT will be displayed on the home page and you can click it directly to use it without adding it again.
