

## Electric lifting truck ONE+Y

### Why the ONE+Y?

The ONE+Y electric pallet truck is designed for daily transport work with Euro pallets and Euro mesh boxes. It is characterised by its powerful lithium battery, which can be charged in a short time and can also be charged temporarily. The low dead weight of 125 kg predestines it for being taken along in the truck.

- **Easy handling** when charging the battery with only one handle and without additional tools.
- Fast goods handling, due to high **driving speed** of loaded / unloaded: 4 km/h / 5 km/h
- **High load capacity**: the pallet truck has a maximum load capacity of 1500kg

- Versatile **usage** of the lithium pallet truck in warehouses, in distribution centres, in wholesale and retail, in production as well as in the forwarding and logistics industry
- Due to the electronic ignition lock, the pallet truck is **extra safe**
- The **lithium-ion battery** with 48 V / 15 Ah power is completely maintenance-free
- With **battery level indicator** for information on the charge level
