Foreword

Dear Customer,

Thank you for your purchase at Trading EU

These operating instructions describe the correct and safe use of your Pallit sack truck. Please read it carefully and completely before operating the device.

Please note

These operating instructions refer to various models of our hand trucks, which are same in operation and handling. Therefore, there may be deviations in the descriptions to your model. Likewise, all illustrations in these operating instructions are symbol images for reference purposes and therefore do not have to match the design of your hand truck.

Due to revision of design and technology, there may also be deviations between the descriptions listed here and their model.

Any duplication of this manual, even in extracts, is not permitted without the written consent of Trading EU GmbH.

Storage

The operating instructions must be kept in the responsible technical department. they must always be at hand.

Intended use

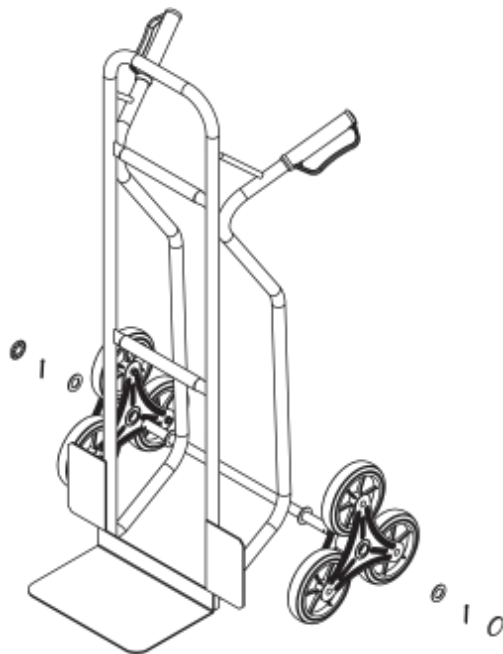

The sack truck is designed exclusively for transporting objects with a maximum weight of 160 kg (HT250A, stair truck) or 200 kg (HT250, steel sack truck). It is not suitable for commercial applications. Use the hand truck only as described in these instructions. Any other use is considered improper and may result in property damage or personal injury.

Trading EU GmbH does not accept any liability for damage resulting from improper use.

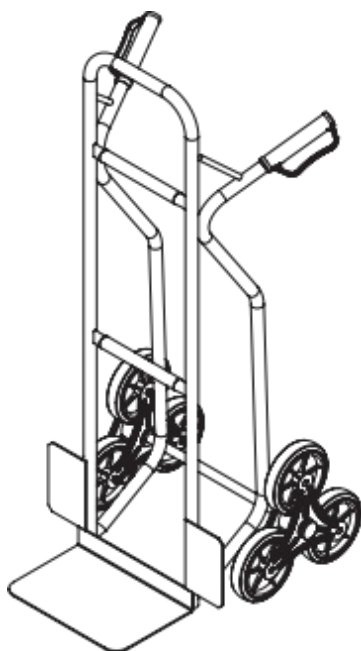

Structure and use

Before use, check the product or individual parts for damage. If you find any damage, do not use the hand truck.

Attention: The tires of the hand truck may leave marks on certain surfaces, such as wood, laminate or carpet.

1. Put the steel tube construction together. Make sure that the fuse is firmly inserted.
2. Mount the R of the on both sides of the frame on the foreseen axis.
3. Place the washer on the axle on both sides.
4. Secure the wheels with the cotter pins provided. These must be bent over for fastening
5. Place the safety caps on the axles and press the cap firmly onto the axle until it clicks into place and cannot be removed.

safety instructions

1. Familiarize yourself with the operating instructions before using the hand truck.
2. Before each use, check the sack truck for tightness of all connections and for possible damage
3. Do not use the hand truck if it has any damage.
4. Only use the hand truck on level and non-slip surfaces.
5. Do not overload the hand truck. The maximum load capacity can be found on the type plate or in the operating instructions -.
6. Be especially careful when using the hand truck near roads, watering or slopes.
7. No people or animals may be transported with the hand truck.
8. The center of gravity of the load must be as close as possible, in the center of the hand truck.
9. Load the hand truck evenly
10. Secure the load from falling down if necessary
11. Keep the hand truck away from children - the hand truck is not a toy
12. Be aware of your surroundings when using the hand truck.
13. When working on slopes, the user must be above the hand truck.
14. The hand truck must not be structurally modified
15. Use only spare parts approved by the manufacturer.
16. Store the hand truck in a dry and clean place.

Disposal instructions

Pay attention to environmental compatibility, health risks, disposal regulations and your local options for proper disposal. For more information, contact your county waste management office.

Separate metals, non-metals, composites and auxiliary materials by type and dispose of them in an environmentally sound manner.

Old devices must not be disposed of with household waste!

In case of outdoor occupation, please dispose of the hand truck according to the rules and regulations of your country.
