

Short pallet truck COMPACT

Why the COMPACT?

The COMPACT short pallet truck is ideal for transporting pallets and pallet cages weighing up to 2500kg over short distances. The high-strength components are highly resilient and durable - ideal for pallet transport with the highest demands.

- With a fork length of **800 mm**, suitable for standardised Euro pallets but also for half and display pallets.
- The very low **tare weight of 56kg** enables mobile use in lorries, containers or Sprinters
- Ideally suited for use in small businesses, wholesale, industry and also in the private sector
- The **plastic-coated handle** ensures unproblematic and comfortable working in cold environments

- Manoeuvring in the tightest of spaces thanks to a small **turning radius of 1275 mm**
- Good manoeuvrability and low rolling resistance thanks to the **forks' single tyres**
- Two options for the swivel castors: **Rubber** for good traction and a smooth ride or **polyurethane** for lower rolling resistance and durability
