

## Manual pallet truck with BRAKE

### Why the BRAKE?

The BRAKE pallet truck with manual drum brake is specially designed for transporting and loading Euro pallets on inclines or ramps. Its integrated brake, which serves as both a driving and parking brake, makes it the ideal tool for handling heavy loads in industrial scenarios.

- Reliably loadable with **up to 2500 kg**
- It should be noted that the load must **always be evenly** distributed on the forks
- **Small turning radius** makes it ideal for use in narrow aisles and confined sales areas
- **Ergonomic, rubberised handle** for optimum working conditions even in cold temperatures
- **Robust, fully hydraulic lifting and lowering device**: For smooth lifting and lowering of pallets

- **Powerful braking performance**: the pallet truck stops safely on a 20% incline with a load of up to 600 kg
- Fork length of **1150 mm** designed for the transport of any type of pallet
