

Semi-electric straddle-leg stacker WIDE-E

Why the WIDE-E?

The Pallit WIDE-E is characterized above all by its individually adjustable forks. It is perfect for working with one-way pallets with special dimensions or for picking up Euro pallets crosswise. The WIDE-E is used for loading and unloading trucks without a loading ramp or for working on high racks - electric lifting, manual lowering and moving.

- **Option:** Choose between 2.5m or 3m lifting height
- **High flexibility:** Perfect for pallets with special dimensions.
- Also suitable for picking up Euro pallets crosswise **thanks to wide-track forks**

- **Type of lift:** Pallets can be lifted to 2.5 m or 3 m electro-hydraulically with infinitely variable speed.
- **Durability:** The impact-resistant nylon castors are mounted on ball bearings and are hardly susceptible to maintenance
- Powerful gel battery **with 12V/120Ah**
- **Load capacity of 1500kg**
