

Installation instructions for the ceiling bracket for cable winches

1. check the package for completeness

Please note: the screws/plugs supplied are intended for concrete ceilings, make sure that they are suitable for the surface to be fixed and replace them with screws and plugs suitable for your surface if necessary.

2. Make sure that the surface on which you want to mount the carrier can withstand the load capacity of the device and the weight of the carrier including the cable winch.
3. Now drill the holes at the appropriate distance from the brackets supplied.
4. Attach the cable winch to the supplied mounting rod
5. Place the mounting rod in the brackets provided and attach it to the pre-drilled holes.
