NEW PRODUCT

Announcement Number: S050720002

TransGo Part# **TFRE-PRO**

Reprogramming Kit™
1996-on 46RE, 47RE, 48RE
(Electronic Governor Units Only)

Also fits: 1995 RE VBs with a 3/16 check ball in lower channel casting

**PATENT
 PENDING**

Up to *75% increase over max factory apply pressure in 1st-3rd plus advanced lockup features for extreme duty work trucks and performance modified trucks

INCLUDES:

- Calibrated patent-pending triple separator plate
- PT limit system
- Recalibrated governor limit system
- Drop-in hardened TV valve and spring
- Innovative line-to-lube components
- Redesigned boost assembly
- New TCC boost tuning plate and bracket
- Detent repair components
- Includes all necessary tools to install components
- Many more upgraded components to increase durability and extend longevity

	Max Factory (psi)		Max TransGo (psi)	*Line increase	
	46RE/47RE	48RE	46RE/47RE/48RE	46RE/47RE	48RE
1st	105		185	75%	
2nd	105		185	75%	
3rd	105		185	75%	
4th	117	137	185	60%	37%
Lock-up	117	137	185	60%	37%

Specifically engineered with more advanced lockup features for extreme duty and performance modified trucks, the all new **TFRE-PRO** Reprogramming Kit™ is calibrated to increase maximum line pressure to 185 psi in all forward ranges for increased holding capacity.

Quicker line rise better matches torque, resulting in short clean shifts that really hold the power. Full control of TCC apply in 2nd, 3rd and 4th gear with optional lock-up in 1st allows you to shift through all gears with TCC “on”. This feature requires manual control of solenoid electrical signals (not provided). Works well with single and multi-clutch converters.
