

NEW PRODUCT!

Announcement Number: S080620001

Drop-in and Oversized PR Valves
Fits 4L60E, 4L65E, 4L70E, 4L75E 1993-on

BURNT BAND AND 3-4 FRICTIONS?

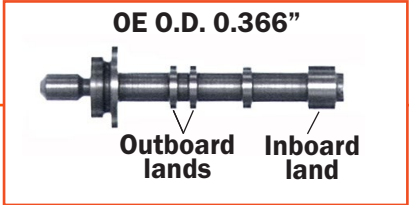

Both are typical symptoms of outboard PR bore wear. Our drop-in valve addresses this number one complaint!

A simple visual check of the valve and its movement within the bore can reveal signs of obvious outboard wear.

- Corrects/Prevents/Reduces:**
- Low main line pressure due to wear at the PR bore
 - Burnt band and 3-4 frictions
 - Stabilizes line pressure at all RPMs
 - Improves shift feel and restores cooler flow in a worn casting

- Drop-in Valve Features:**
- Longer outboard valve lands renew circuit integrity by allowing the valve to operate in unworn (previously unused) portions of the bore distributing load over a greater surface area to increase durability and stability and prevent further wear
 - Drop-in precision USA-made steel valve
 - Machined for full-time line-to-lube
 - Saves replacing pump for worn bore
 - No special tools required

#4L60E-PR
Drop-in Pressure Regulator Valve
Note: The PR valve can be installed while the transmission is in the vehicle on 1993-2006 models only without the input speed sensor. 2007 and later models equipped with the input speed sensor require transmission removal.

PUMP SLIDE AND ROTOR BROKEN?

Broken or damaged pump parts is most often related to inboard PR bore wear, if converter clearance is ok.

Whether you have broken or damaged pump parts, burnt frictions or a combination, our 0.395" oversized valve addresses all these problems.

- Corrects/Prevents/Reduces:**
- Broken or damaged pump parts due to unregulated high main line pressure spikes
 - Stabilizes line pressure at all RPMs
 - Improves shift feel and restores cooler flow in a worn casting
 - Low main line pressure
 - Burnt band and 3-4 frictions

- Oversized Valve Features:**
- For extremely worn bores and/or super high mileage vehicles
 - Machined for full-time line-to-lube

- Toolkit Features:**
- Requires simple, single diameter ream
 - Drill motor friendly
- Includes:** Reusable high quality US-made steel reamer and heat treated sleeve

#4L60E-PR-OS
Oversized Pressure Regulator Valve
Requires# 4L60E-PR-TK (below)
